

Grand Canyon University  
Academic Catalog  
2026-2027

Summer 2026

# Academic Catalog Version Record

The following is a record of the major changes made to the Grand Canyon University Academic Catalog. This is not a comprehensive itemization of all of the changes made in this revision cycle, but rather an overview of the more significant updates incorporated into the current version of the catalog.

| Version | Updated  | Changes Made                                                                                                                                                                                                             |

## Right to Change Requirements:

The University reserves the right to make changes of any nature to the calendar, admission requirements, degree requirements, fees, regulations, course offerings, programs, or academic schedules whenever they are deemed necessary or desirable, including changes or modification of course content, class scheduling, offering patterns, canceling of scheduled classes, or other academic activities.

The Grand Canyon University Academic Catalog does not establish a contractual relationship; rather, it sets forth academic and other requirements that students must meet to be granted a degree and, in some circumstances, to continue to be enrolled at the institution. While advisors and other Grand Canyon University personnel are available to guide students with respect to the requirements, students ultimately bear the responsibility of following the requirements.

## Notice of Non-Discrimination

Grand Canyon University does not discriminate on the basis of race, color, national or ethnic origin, sex, disability, age, sexual orientation, gender identity or any legally protected status. Title IX regulations require non-discrimination on the basis of sex or gender, which includes unlawful discrimination based on pregnancy and/or disability discrimination based upon complications related to pregnancy. As a religious institution, Grand Canyon University expressly reserves its rights, its understandings of, and its commitments to Christian principles, and reserves the legal right to hire and employ individuals who support the values of the University.

Inquiries concerning the application of Title IX discrimination or the application of Title IX harassment policies may be submitted to the Title IX coordinator and/or to the Office of Civil Rights for the United States Department of Education:

# Contact Information

---

## General Contact Information

### Web Site

<http://www.gcu.edu/>

### Main Switchboard

Phone: 1-602-639-7500  
Toll-free: 1-800-800-9776

### Main Campus Mailing Address

Grand Canyon University  
PO Box 11097  
Phoenix, AZ 85061-1097

### Main Campus Street Address

Grand Canyon University – Main Campus  
3300 West Camelback Road  
Phoenix, AZ 85017-3030

## Student Contacts

### Admissions Representatives

Responsibility: Assists students with their initial enrollment into a program of study.

Phone: 1-800-800-9776

### Campus Operations

Responsibility: Provide parking passes for campus students, faculty and staff along with issue campus ID cards

Phone: 602-639-7739

### Canyon Health and Wellness Clinic

Responsibility: Assists campus students with health needs.

Phone: 602-639-6215

Fax: 602-639-7830

Website: <http://www.gcu.edu/Campus-Resources/Health-and-Wellness-Center.php>

### Career Services

Responsibility: GCU's Career Services team provides students and alumni with the resources, professional knowledge and support they need to successfully transition from academics into purposeful and satisfying employment.

Phone: 602-639-6606

E-mail: [careerservices@gu.edu](mailto:careerservices@gu.edu)

### Center for Learning and Advancement

Responsibility: Provides learning resources for students through free face-to-face and online tutoring in writing, math (algebra, trigonometry, calculus), accounting, finance, statistics, APA, as well as workshops in test-taking techniques, reading strategies, time management, study skills, and note-taking techniques. The Center also oversees the First Year Experience (FYE) program, Study Abroad, Peer Mentoring, Lifelong Learning Assessment, and the Honors College.

Phone: 1-602-639-8901

Email: [centerforlearning@gu.edu](mailto:centerforlearning@gu.edu)

### Additional Locations

GCU Boswell  
10484 W. Thunderbird, Suite 102  
Sun City, Arizona 85351

Kyrene School District Office  
8700 S. Kyrene Rd.  
Tempe, Arizona 85284

Mesa Community College  
1833 W. Southern Avenue  
Mesa, Arizona 85202

Pima-Salt River High School  
4827 N Country Club Dr

Email: [techsupport@gu.edu](mailto:techsupport@gu.edu)

Website: <http://www.gcu.edu/Learning-Resources/Tutorial-Videos/Technical-Support.php>

# Accreditation, Authorizations, and Approvals

---

## Accreditation

Accreditation is a third-party peer review process which provides the public an assurance that the university is providing a quality education which meets or exceeds the accreditors stated requirements and criteria. Accreditation is key factor which may be recognized by employers, other postsecondary institutions, and licensing bodies. The US Department of Education requires accreditation from a body recognized by the agency as a key requirement for a university being permitted to disperse federal financial aid. In short, in choosing a university, parents and students should ensure their university of choice is accredited.

### Institutional Accreditation

Grand Canyon University has been accredited by the Higher Learning Commission (HLC) and its predecessor continually since 1968. Every ten years, HLC conducts a comprehensive review of the university to ensure the university continues to meet HLC's standards. In June 2021, HLC reaffirmed GCU's accreditation. The next comprehensive visit is scheduled for the 2026-2027 academic year. A listing of programmatic accreditations held within each college is provided below.

#### Higher Learning Commission

The Higher Learning Commission accredits Grand Canyon University.

The Higher Learning Commission  
230 South LaSalle Street, Suite 7-500  
Chicago, Illinois 60604-1411  
Phone: 312-263-0456  
Toll-free: 800-621-7440  
<http://www.ncahlc.org/>

### Programmatic Accreditations

GCU holds multiple programmatic accreditations for over 80 of its programs. These accreditations demonstrate that the accredited programs meet or exceed the standards for the profession set forth by the accrediting body. Programmatic accreditation may help graduates meet the educational requirements for professional licensure or certification. The programmatic accreditations by college are provided below.

#### Colangelo College of Business

##### *Accreditation Council for Business Schools and Programs (ACBSP)*

The Accreditation Council for Business Schools and Programs (ACBSP), 7007 College Boulevard, Suite 420, Overland Park, KS 66211, 913-339-9356, accredits the following programs of the Colangelo College of Business: Bachelor of Science in Accounting, Bachelor of Science in Applied Management, Bachelor of Science in Business Administration, Bachelor of Science in Business Administration with an Emphasis in Business Intelligence, Bachelor of Science in Business Management, Bachelor of Science in Entrepreneurial Studies, Bachelor of Science in Finance and Economics, Bachelor of Science in Marketing and Advertising, Bachelor of Science in Sports and Entertainment Management, Master of Science in Accounting, Master of Business Administration, Master of Business Administration with an Emphasis in Accounting, Master of Business Administration with an Emphasis in Finance, Master of Business Administration with an Emphasis in Health Systems Management, Master of Business Administration with an Emphasis in Leadership, Master of Business Administration with an Emphasis in Marketing, Master of Business Administration with an Emphasis in Project Management, Master of Business Administration with an Emphasis in Strategic Human Resource Management, and Doctor of Business Administration with an Emphasis in Management. The ACBSP requires each school to Summer 2022 University Policy Handbook 10 © 2022 Grand Canyon University. All Rights Reserved. submit a periodic Quality Assurance Report that summarizes recent activity regarding compliance with ACBSP standards. [View our most recent ACBSP Quality Assurance Report](#). View the results of the [Undergraduate Business Field Test](#).

Grand Canyon University's Colangelo College of Business is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of Bachelor of Science in Business for Secondary Education.

#### College of Education

##### *Association for Advancing Quality in Educator Preparation (AAQEP)*

Grand Canyon University's College of Education is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of early childhood, elementary, secondary and special education teachers, as well as administrators.

##### *Association for Advancing Quality in Educator Preparation (AAQEP)*

Grand Canyon University is a member in good standing of the Association for Advancing Quality in Educator Preparation (AAQEP), a national accrediting organization recognized by the Council for Higher Education Accreditation. The programs listed below have been awarded full accreditation by AAQEP through June 30, 2026. Full accreditation acknowledges that a program prepares effective educators who continue to grow as professionals and has demonstrated the commitment and capacity to maintain quality.

AAQEP-Accredited Programs at GCU:

- Initial Programs
- Advanced Programs

Association for Advancing Quality in Educator Preparation  
P.O. Box 7511  
Fairfax Station, VA 22039-9998

[aaqep.org](http://aaqep.org)

#### **College of Nursing and Health Care Professions**

##### ***Commission on Accreditation of Athletic Training Education (CAATE)***

The Bachelor of Science in Athletic Training is currently accredited by the Commission on Accreditation of Athletic Training Education.

CAATE  
2001 K Street NW, 3rd Floor North  
Washington, DC 20006  
P: 512-733-9700

The program is currently applying to CAATE for a change in level of degree and is pending approval.

##### ***Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)***

The Health Information Management accreditor of Grand Canyon University is the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The College's accreditation for the baccalaureate degree in Health Information Management has been reaffirmed through 2030-2031. The College's accreditation for the master's degree in Health Informatics has received initial accreditation through 2033-2034. All inquiries about the program's accreditation status should be directed by mail to CAHIIM, 200 East Randolph Street, Suite 5100, Chicago, IL, 60601; by phone at (312) 235-3255; or by email at [info@cahiim.org](mailto:info@cahiim.org)

##### ***Commission on Collegiate Nursing Education (CCNE)***

The Commission on Collegiate Nursing Education (CCNE), recognized by ED, assesses the quality and integrity of nursing programs. Grand Canyon University's Bachelor of Science in Nursing (Pre-Licensure), Bachelor of Science in Nursing (RN to BSN), Master of Science in Nursing with an Emphasis in Health Informatics, Master of Science in Nursing with an Emphasis in Nursing Education, Master of Science in Nursing with an Emphasis in Public Health Nursing, Master of Science of Nursing with an Emphasis in Nursing Leadership in Health Care Systems, Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult Gerontology, Master of Science in Nursing: Family Nurse Practitioner, Post Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult Gerontology, Post Master of Science in Nursing: Family Nurse Practitioner, Doctor of Nursing Practice, and Doctor of Nursing Practice with an Emphasis in Educational Leadership are accredited by the Commission on Collegiate Nursing Education (<http://www.ccneaccreditation.org>).

Commission on Collegiate Nursing Education  
655 K Street, NW, Suite 750  
Washington, DC 20001  
P: (202) 887-6791

##### ***Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA)***

The Master of Science in Speech Language Pathology (MS-SLP) at Grand Canyon University is a Candidate for Accreditation by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700. Candidacy is a "preaccreditation" status with the CAA, awarded to developing or emerging programs for a maximum period of 5 years.

##### ***Society for Simulation in Healthcare***

The Grand Canyon University Pre-Licensure Nursing Immersive Simulation has been granted Provisional Accreditation from the Society for Simulation in Healthcare (SSH). The SSH accreditation is a peer-reviewed, customized evaluation of the simulation program. With obtaining accreditation, GCU is recognized for its expertise in simulation above and beyond domain expertise. <https://www.ssih.org/>.

Society for Simulation in Healthcare  
P.O. Box 856114  
Minneapolis, MN 55485-6114  
Phone: 866.730.6127

#### **College of Humanities and Social Sciences**

##### ***Council on Social Work Education (CSWE) - BSW***

Grand Canyon University's College of Humanities and Social Sciences' Bachelor of Social Work program is accredited by the Council on Social Work Education.

Accreditation of a baccalaureate or master's social work program by the Council on Social Work Education's Commission on Accreditation indicates that it meets or exceeds criteria for the assessment of program quality evaluated through a peer review process. An accredited program has sufficient resources to meet its mission and goals and the Commission on Accreditation has verified that it demonstrates compliance with all sections of the Educational Policy and Accreditation Standards. Spring 2024 University Policy Handbook 12 © 2024 Grand Canyon University. All Rights Reserved. Accreditation applies to all program sites and program delivery methods of an accredited

program. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

For more information about social work accreditation, you may contact Accreditation.

Council on Social Work Education  
1701 Duke Street, Suite 200  
Alexandria, VA 22314-3457  
Phone: 703-683-8080  
<https://www.cswe.org/>

#### ***Council on Social Work Education (CSWE) – MSW***

Grand Canyon University's Master of Social Work program is accredited by the Council on Social Work Education's Commission on Accreditation.

Accreditation of a baccalaureate or master's social work program by the Council on Social Work Education's Commission on Accreditation indicates that it meets or exceeds criteria for the assessment of program quality evaluated through a peer review process. An accredited program has sufficient resources to meet its mission and goals and the Commission on Accreditation has verified that it demonstrates compliance with all sections of the Educational Policy and Accreditation Standards.

Accreditation applies to all program sites and program delivery methods of an accredited program. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

For more information about social work accreditation, you may contact Accreditation.

Council on Social Work Education  
1701 Duke Street, Suite 200  
Alexandria, VA 22314-3457  
Phone: 703-683-8080  
<https://www.cswe.org/>

#### ***National Addiction Studies Accreditation Commission (NASAC)***

The Master of Science in Addiction Counseling program has been approved for accreditation through the National Addiction Studies Accreditation Commission (NASAC). NASAC is an academic accreditation organization for higher education addiction studies programs.

National Addiction Studies Accreditation Commission (NASAC)  
44 Canal Center Plaza, Suite 301  
Alexandria, VA 22314  
<https://nasacaccreditation.org>

#### ***Council for Accreditation of Counseling and Related Educational Programs (CACREP)***

Grand Canyon University's Master of Science in Clinical Mental Health Counseling (CMHC) for both online and in-person delivery methods, and the Master of Education in School Counseling (SC) are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

CACREP is an independent accrediting organization recognized for its rigorous standards in counselor education. By maintaining accreditation through CACREP, institutions demonstrate the quality and integrity of their programs.

Council for Accreditation of Counseling and Related Educational Programs  
500 Montgomery Street, Suite 350  
Alexandria, VA 22314  
(703) 535-5990  
[www.cacrep.org](http://www.cacrep.org)

#### **College of Engineering and Technology**

##### ***Accreditation Board for Engineering and Technology (ABET)***

The College of Engineering and Technology's Bachelor of Science in Computer Science with an Emphasis in Business Entrepreneurship, Bachelor of Science in Computer Science with an Emphasis in Big Data Analytics, and Bachelor of Science in Computer Science with an Emphasis in Game and Simulation Development programs are accredited by the Computing Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

The College of Engineering and Technology's Bachelor of Science in Biomedical Engineering, Bachelor of Science in Electrical Engineering, Bachelor of Science in Mechanical Engineering, Bachelor of Science in Engineering with an Emphasis in Robotics, and Bachelor of Science in Engineering programs are accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

The College of Engineering and Technology's Bachelor of Science in Electrical Engineering Technology and Bachelor of Science in Mechanical Engineering Technology programs are accredited by the Engineering Technology Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

Pittsburgh, PA 15275

Phone: 412.788.6505

Fax: 412.788.6510

[www.ats.edu](http://www.ats.edu)

## **State Authorizations**

### **Arizona State Private Post-Secondary Education**

Grand Canyon University is licensed in Arizona by the Arizona State Board for Private Postsecondary Education.

Arizona State Board for Private Postsecondary Education

1740 W. Adams St., Suite 3008

Phoenix, AZ 85007

Phone: 602-542-5709

<http://ppse.az.gov>

### **California Bureau of Private Postsecondary Education**

#### ***California Resident Students Rights and Responsibilities Related to the Student Tuition Recovery Fund (STRF)***

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition. You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program. It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF. A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law. However, no claim can be paid to any student without a social security number or a taxpayer identification number.

#### **Colorado Commission on Higher Education**

Grand Canyon University is provisionally authorized by the Colorado Commission on Higher Education to operate to offer laboratory and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

Grand Canyon University  
10700 E Gaddes Avenue, Ste 200  
Englewood, Colorado 80112

#### **Florida Commission for Independent Education**

Grand Canyon University is provisionally licensed by the Commission for Independent Education, Florida Department of Education. As a result, GCU is authorized to offer laboratory and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following locations:

Grand Canyon University  
605 Crescent Executive Court, Suite 500  
Lake Mary, FL 32746

Grand Canyon University  
2901 Southwest 149th Avenue, Suite 200  
Miramar, FL 33027

Grand Canyon University is provisionally licensed by the Commission for Independent Education, Florida Department of Education to offer the Bachelor of Science in Applied Management, Bachelor of Science in Business Management, Bachelor of Science in Homeland Security and Emergency Management, Bachelor of Science in Information Technology with an Emphasis in Cybersecurity, and Master of Business Administration programs at the Eglin Air Force Base.

Additional information regarding this institution may be obtained by contacting the Commission at 325 West Gaines Street, Suite 1414, Tallahassee, FL 32399-0400, toll-free telephone number (888) 224-6684

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, students enrolled in FL programs may file a complaint with the Florida Commission for Independent Education by following the student concern instructions on their website which can be found at the following link: <https://www.fldoe.org/policy/cie/student-concerns.shtml> or by contacting the Commission.

Commission for Independent Education  
325 W. Gaines St, Suite 1414  
Tallahassee, FL. 32399-0400

#### **Idaho State Board of Education**

Grand Canyon University is registered as a Postsecondary Educational Institution with the State Board of Education under Idaho Statute, Title 33, Chapter 24. As a result, Grand Canyon University is authorized to offer skills lab and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

Grand Canyon University  
1144 S. Silverstone Way, Building 2  
Meridian, ID 83642

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, Idaho students may file an appeal with the Idaho State Board of Education by following their student complaint procedures which can be found at the following link: <https://boardofed.idaho.gov/higher-education-private/private-colleges-degree-granting/student-complaint-procedures/>

#### **Missouri Department of Higher Education**

Grand Canyon University is certified to operate by the Missouri Coordinating Board for Higher Education. As a result, Grand Canyon University is authorized to offer skills lab and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

721 Emerson Rd. Suite 500,  
St. Louis, MO 63141

#### **Nevada Commission on Postsecondary Education (CPE)**

Grand Canyon University is licensed by the Nevada Commission on Postsecondary Education (CPE) to operate as a private postsecondary educational institution within the state of Nevada. As a result, Grand Canyon University is authorized to offer skills lab and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

Grand Canyon University  
2485 Village View Drive  
Henderson, Nevada 89074

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, students enrolled in the aBSN – NV program version may file a complaint with the Nevada Commission on Postsecondary Education by filling out the Student Complaint Form which can be found on their website or at the following link:

<https://cpe.nv.gov/uploadedFiles/cpenvgov/content/Students/Complaint%20Form%20Initial%202021.pdf>

This form can be submitted via email, fax, or mailed to the following address:

Nevada Commission on Postsecondary Education  
2800 E. St. Louis Avenue  
Las Vegas, NV 89104

#### **New Mexico Higher Education Department**

Grand Canyon University has been deemed by the New Mexico Higher Education Department to meet the standards for State Authorization through registration under the Post-Secondary Educational Institution Act (Section 21-23-1 et seq. NMSA 1978). As a result, Grand Canyon University is authorized to offer skills lab and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

Grand Canyon University  
6200 Jefferson Street NE  
Suite 300  
Albuquerque, NM 87109

#### **Utah Division of Consumer Protection**

Grand Canyon University is registered under the Utah Postsecondary Proprietary School Act (Title 13, Chapter 34, Utah Code).

As a result, Grand Canyon University is authorized to offer skills lab and simulation components of the Bachelor of Science in Nursing: Pre-Licensure, accelerated (ABSN) program at the following location:

Grand Canyon University  
150 Civic Center Dr  
Ste 100  
Sandy, UT 84070

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, Utah resident students may file a complaint with the Utah Division of Consumer Protection by following the instructions on their website which can be found at the following link: <https://dcp.utah.gov/complaints.html>

The Utah Division of Consumer Protection

160 East 300 South, 2nd Floor  
P.O. Box 146704 Salt Lake City, Utah 84114-6704  
[dcp.utah.gov](http://dcp.utah.gov)  
OR by fax to: (801) 530-6001

#### **Utah Division of Consumer Protection Surety Bond**

Grand Canyon University contributes to the Utah Division of Consumer Protection surety bond. This Utah requirement is used as protection against loss of unearned tuition, tuition paid for credits that a student earned but that are not transferrable to a comparable postsecondary school, book fees, supply fees, or equipment fees.

#### **Wyoming Department of Education (WY DOE)**

Grand Canyon University has been granted a Chapter 30 license by the Wyoming Department of Education (WYDOE) to offer educational services to Wyoming students. For more information, please visit the following link: <https://edu.wyoming.gov/for-district-leadership/school-programs/private-school-licensing/>

Wyoming Department of Education  
122 W. 25th St  
STE E200  
Cheyenne, WY 82002  
<https://edu.wyoming.gov/>

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, students enrolled in the program versions offered on the military base may file a complaint with the Wyoming Department of Education by completing the student complain form which can be found at the following link:

<https://edu.wyoming.gov/for-district-leadership/school-programs/private-%20school-licensing/>

#### **State Authorization Reciprocity Agreements (SARA) Participant**

Grand Canyon University is an institutional participant in the State Authorization Reciprocity Agreement (SARA) initiative. SARA is an agreement among member states, districts and territories that establishes comparable national standards for interstate offering of postsecondary distance education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state. SARA is overseen by a National Council and administered by four regional education compacts. For more information and a list of member states, please visit <http://nc-sara.org/>.

# Program Approvals

Many of GCU's programs are approved by state licensing boards or national certifying agencies to meet the educational requirements for licensure or certification or to permit a graduate to sit for a professional exam. A list of agency approvals and registrations are provided below.

The presence of specific content in textbooks or resources does not imply endorsement by Grand Canyon University. The University complies with accreditation, state, and federal requirements to prepare students for licensure and other professional industry expectations. As these requirements evolve, GCU will update and continue to evaluate materials to align with these professional standards, ensuring students receive necessary content.

## **Colangelo College of Business**

### ***Arizona State Board of Education (ASBE/ADE)***

GCU's Colangelo College of Business is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of Bachelor of Science in Business for Secondary Education.

### ***Certified Financial Planner (CFP®) Board Registered Program***

GCU's Bachelor's in Finance with an emphasis in Financial Planning is a Certified Financial Planner (CFP) Board Registered Program (<https://www.cfp.net/get-certified/certification-process/education-requirement/certification-coursework-requirement/find-an-education-program>). As such, the program meets the education requirements for CFP® certification. Individuals who meet the CFP Board's education requirement are eligible to sit for the CFP® Certification Examination. CFP Board Registered Programs meet the education coursework requirement and help provide the knowledge required to deliver professional, competent, and ethical financial planning services to clients. For more information visit <https://www.cfp.net/contact>.

## **College of Arts and Media**

GCU's College of Arts and Media is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of Bachelor of Arts in Dance Education, Bachelor of Arts in Music Education and Bachelor of Arts in Theatre Education.

Arizona State Board of Education  
1700 W. Washington St.  
Phoenix, AZ 85007  
<https://azsbe.az.gov/>

## **College of Education**

### ***Arizona State Board of Education (ASBE/ADE)***

Grand Canyon University's College of Education is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of early childhood, elementary, secondary and special education teachers, as well as administrators.

Arizona State Board of Education  
1700 W. Washington St.  
Phoenix, AZ 85007  
<https://azsbe.az.gov/>

### ***Nevada Department of Education (NVDoe)***

Grand Canyon University's College of Education is approved by the Nevada Department of Education to offer alternative route to licensure programs that lead to conditional licensure (credentials) for early childhood, elementary, secondary, and special education teachers.

Nevada Department of Education  
700 E. Fifth St.  
Carson City, NV 89701  
<https://doe.nv.gov/>

## **College of Humanities and Social Sciences**

### ***Arizona Board of Behavioral Health Examiners (AZBBHE)***

Grand Canyon University's Master of Science in Clinical Mental Health Counseling program is approved by the Arizona Board of Behavioral Health Examiners as being consistent with the curriculum requirements for LAC or LPC licensure.

Grand Canyon University's Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency and Substance Abuse is approved by the Arizona Board of Behavioral Health Examiners as being consistent with the curriculum requirements for LSAT licensure.

Arizona Board of Behavioral Health Examiners  
1740 West Adams St  
Phoenix, AZ 85007  
<http://www.azbbhe.us/>

### ***Arizona State Board of Education (ASBE/ADE)***

Grand Canyon University's College of Humanities and Social Sciences is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of Bachelor of Arts in History for Secondary Education, Bachelor of Arts in English for Secondary Education and Bachelor of Science in Math for Secondary Education.

### ***California Consortium of Addiction Programs and Professional (CCAPP)***

Grand Canyon University has been approved as an Approved School/Program by the California Consortium of Addiction Programs and Professionals (CCAPP) for the following online programs: Master of Science in Addiction Counseling and Master of Science in Christian Counseling of Substance Use and Addictive Disorders. These programs are approved until February 28, 2025.

Grand Canyon University's Bachelor of Science in Counseling with an Emphasis in Chemical Dependency and Substance Abuse is an Approved School/Program by CCAPP. This program is approved until September 30, 2023.

California Consortium of Addiction Programs and Professionals  
2400 Marconi Avenue, Suite C  
Sacramento, CA 95821  
PO Box 214127  
<https://www.ccapp.us/>

### ***Georgia Addiction Counselors Association (GACA)***

Grand Canyon University has been approved as an Education Provider by the Georgia Addiction Counselors Association (GACA) for the Master of Science in Addiction Counseling and Bachelor of Science in Counseling with an Emphasis in Chemical Dependency and Substance Abuse programs.

Georgia Addiction Counselors Association  
4015 South Cobb Drive  
Suite 160  
Smyrna, GA 30080 <http://gaca.org/>

### ***Wisconsin Department of Safety and Professional Services (DSPS)***

Grand Canyon University has been approved as a pre-certification education program for substance abuse counselors by the Wisconsin Department of Safety and Professional Services for the following online programs: Master of Science in Addiction Counseling, Master of Science in Christian Counseling of Substance Use and Addictive Disorders and Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency and Substance Abuse. These programs are approved through August 2026.

GCU encourages students to follow the appeals process outlined in the University Policy Handbook. However, Wisconsin residents enrolled in one of GCU's nursing programs listed above may file a complaint with the Wisconsin Board of Nursing. The Board accepts online complaints at the following link: <https://dpscomplaintform.wi.gov/dpslsconlinecomplaint.aspx> or mailed at the following address:

Wisconsin Department of Safety and Professional Services  
Division of Legal Services and Compliance  
P.O. Box 7190  
Madison, WI 53707-7190

**College of Engineering and Technology**

***Arizona State Board of Education (ASBE/ADE)***

Grand Canyon University's College of Engineering and Technology is approved by the Arizona State Board of Education to offer institutional recommendations (credentials) for the certification of Bachelor of Science in Biology for Secondary Education and Bachelor of Science in Chemistry for Secondary Education.

***Cyber Defense Education (CAE-CD)***

The College of Engineering, and Technology's Bachelor of Science in Cybersecurity and Bachelor of Science in Information Technology with an Emphasis in Cybersecurity programs were awarded the National Center of Academic Excellence in Cyber Defense Education (CAE-CD) designation.\* CAE-CD designation recognizes college programs that meet the standards of learning concepts and skills outlined by the National Security Agency (NSA) and Department of Defense (DoD), (<https://www.nsa.gov/Academics/Centers-of-Academic-Excellence/>).

**Professional Licensure Disclosures and Field Experiences**

**Professional Licensure Disclosures**

GCU strives to provide accurate, transparent information to students enrolled in all programs intended to lead to a state-issued, professional license. Grand Canyon University periodically reviews the licensure requirements of its programs in all US states and territories. Each student's Enrollment Agreement provides professional licensure disclosures stating whether a program meets the educational requirements for licensure in the student's location. GCU also publishes licensure disclosures publicly on [gcu.edu](http://gcu.edu). The most current disclosures are available on each program's home page clicking the "State Disclosures" link under the "Accreditation and Compliance" header in the toolbar. Students may refer to the information on [GCU.edu](http://GCU.edu) at any time for the current disclosures.

In addition to the public disclosures, GCU provides a direct and timely notification to students if a change to the licensure determination is identified.

**Location and Professional Licensure**

GCU is required to determine the location of distance education students, evidenced by a student's address. If you are considering relocating, or have relocated to another state, territory, or outside of the United States during your program, whether relocation is permanent or temporary, you must contact your Student Services Counselor immediately to determine whether your Program of Study is available in the new location and whether it will lead to professional licensure in the new location. Students must do this before incurring any/additional financial obligations. The new location may have additional requirements that would need to be completed in order to be eligible for certification or licensure. In addition, GCU encourages students to contact their state licensure board to ensure the program will meet their needs.

**Field Placements within the United States**

Students are expected to conduct all field placements, practicum, or student teaching within the state in which they are located at the time of enrollment. Students who seek to conduct field placements, practicum, or student teaching in a state other than the state in which they are located, or who intend to seek licensure in a different state, must disclose this to their Student Services Counselor to determine whether field placement or licensure is possible in the desired location.

**International Military Field Placements**

Military students who are located outside of the United States who are enrolled in programs that contain field placement must complete all placements on a base or in a Department of Defense approved location. Students are advised to contact a Field Experience Counselor to

determine whether field experience can be completed. Students who cannot complete field placements on a base or in a DOD-approved location may be required to take a leave of absence until they return to a location at which placements are allowed.

### **Professional Licensure Outside of the United States**

GCU programs are not designed nor intended to lead to licensure or certification outside of the United States. Student teaching, practicum, internship, or field experience is not permitted outside of the United States.

### **Additional State-Specific Disclosures**

#### ***Iowa Board of Educational Examiners***

Students seeking an Iowa license are advised that successful completion of Grand Canyon University's programs of educator preparation do not qualify you for initial educator licensure by the Iowa Board of Educational Examiners. Candidates seeking licensure in the state of Iowa must first be licensed/certified as educators in Arizona. Grand Canyon University will assist you in understanding the licensure requirements of the Arizona Department of Education prior to completion of your educational preparation program. Arizona Department of Education can be contacted at 800-352-4558 or <http://www.azed.gov/>. Candidates seeking subsequent licensure from the Iowa Board of Educational Examiners must contact that Board (515-281-5849; <http://www.boee.iowa.gov/>) for licensure requirements in Iowa.

#### ***Pennsylvania Department of Education (PADOE)***

Teacher education programs have not been reviewed or approved by Pennsylvania. Candidates will have to apply for certification and meet requirements for certification as out-of-state candidates.

Residents of Pennsylvania should direct questions, complaints, or concerns to:

Pennsylvania Department of Education

<http://www.education.pa.gov/Postsecondary-Adult/College%20and%20Career%20Education/Pages/Students-Complaints.aspx#tab-1>

Pennsylvania Department of Education - Postsecondary and Adult Education

333 Market Street, 12th Fl

Harrisburg, PA 17126-0333

The Arizona State Board for Private Postsecondary Education has granted approval for Grand Canyon University's main Phoenix campus to operate at variable auxiliary locations.

Chandler  
4100 W. Chandler Blvd.  
Chandler, AZ 85226

Kyrene School District  
8700 S. Kyrene Road  
Tempe, AZ 85284

Mesa Community College  
1833 West Southern Avenue  
Mesa, AZ 85202-4822

Phoenix VA Healthcare  
650 East Indian School Road  
Phoenix, AZ 85012-1839

Pima Salt River High School  
4827 N. Country Club Drive  
Scottsdale, AZ 85256-2915

#### **Boswell/Sun City aBSN Location**

10484 W Thunderbird Blvd #102, Sun City, AZ 85351

GCU's Sun City location is comprised of over 21,000 square feet of classroom, lab space, simulation space, and offices including two testing/study rooms, an accommodations testing room, a simulation lab with four simulation rooms, a clinical skills lab, a common area for general student interaction, and multiple small faculty and staff offices.

#### **Tucson aBSN Location**

3500 N Campbell Ave, Tucson, AZ 85719

GCU's Tucson location is comprised of over 16,000 square feet of classroom, lab space, simulation space, and offices including two testing/study rooms, an accommodations testing room, a simulation lab with four simulation rooms, a clinical skills lab, a common area for general student interaction, and multiple small faculty and staff offices.

### **Colorado**

#### **Denver ABSN Location**

10700 E. Geddes Ave Suite 200 Englewood, CO 80112

GCU's Colorado location is comprised of approx. 23,000 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, two simulation labs with eight simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

### **Florida**

#### **Miami (Miramar) ABSN Location**

2901 Southwest 149th Ave Suite 200 Miramar, FL 33027

GCU's Miramar, FL location is comprised of approx. 22,000 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, a simulation lab with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

#### **Orlando (Lake Mary) ABSN Location**

605 Crescent Executive Court Suite 500 Lake Mary, FL 32746

GCU's Lake Mary, FL location is comprised of approx. 22,500 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, a simulation lab with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

### **Idaho**

#### **Boise ABSN Location**

1144 S. Silverstone Way, Suite 200 Meridian, ID 83642

GCU's Idaho location is comprised of approx. 21,000 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, one simulation lab with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

## **Missouri**

### **St. Louis ABSN Location**

721 Emerson Rd. Suite 500, St. Louis, MO 63141

GCU's Missouri location is comprised of approx. 20,000 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, one simulation lab with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

## **Nevada**

### **Las Vegas aBSN Site**

2485 Village View Drive, Henderson, Nevada 89074

GCU's Nevada location is comprised of over 21,000 square feet of classroom, lab space, simulation space, and offices including two testing/study rooms, an accommodations testing room, two simulation labs with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

## **New Mexico**

### **Albuquerque ABSN Location**

6200 Jefferson St NE, Suite 300, Albuquerque, NM 87109

GCU's New Mexico location is comprised of approx. 21,000 square feet of classroom, lab space, simulation space, and offices including testing/study rooms, an accommodations testing room, one simulation lab with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices

## **Utah**

### **Sandy/Salt Lake City aBSN Location**

150 Civic Center Dr, Ste 100, Sandy, UT 84070

GCU's Utah location is comprised of over 26,000 square feet of classroom, lab space, simulation space, and offices including two testing/study rooms, an accommodations testing room, two simulation labs with four simulation rooms, a common area for general student interaction, and multiple small faculty and staff offices.

# About Grand Canyon University

## Vision

Grand Canyon University is a premier Christian University educating people to lead and serve.

## Mission Statement

GCU is a missional, Christ-centered university with an innovative and adaptive spirit that addresses the world's deep needs by cultivating compassionate Christian community, empowering free and virtuous action, and serving others in ways that promote human flourishing.

Through academic excellence, the university equips students with knowledge of the Christian worldview, instilling in them a sense of purpose and vocational calling that enables them to be innovative thinkers, effective communicators, global contributors, and transformative leaders who change their communities by placing the interests of others before their own.

## Mission-Based Student Learning Competencies

Tied to the mission statement of GCU are mission-based competencies that faculty and administration believe are imperative for students to learn. GCU strives to ensure students who progress through their program at different times exit the program with the same foundational knowledge and demonstrable skills, and that graduates bring commensurate knowledge and practical skills to the workforce. Consistent competencies and objectives, regardless of the modality, are the foundation of every program design. All GCU courses provide foundational knowledge and then apply or synthesize the learning. Thus, all graduates of the same program will have developed comparable skill sets.

### Mission-based Bachelor's Competencies

| Domains                                                                                                                                                                                                                                                                                                    | Competencies                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Historical Sketch

Grand Canyon College was chartered on August 1, 1949, with 16 faculty and approximately 100 students, many of them veterans. In 1951 the College put up its first permanent buildings on a 90-acre tract in west Phoenix. Grand Canyon College was fully accredited in 1968 by the Commission on Institutions of Higher Education, 30 North LaSalle Street, Suite 2400, Chicago, IL 60602-2504, 312-263-0456, 800-621-7440.

Established as a Baptist-affiliated institution with a strong emphasis on religious studies, the school initially focused on offering bachelor's degree programs in education. Over the years, the school expanded its curricula to include programs in the sciences, nursing, business, music, and arts, and developed a strong reputation for producing some of the most effective teachers, nurses, health care professionals and fine-arts students in the Southwest.

During planning for the change in institutional organization and status from Grand Canyon College to Grand Canyon University, the institution identified several landmark events that had been and would be pivotal during this transition. These included, but were not limited to, the organization of programs and departments into multiple colleges, the offering of graduate degree programs, the formation of the Grand Canyon University Foundation, and the generosity of several individuals who pledged or gave unrestricted gifts valued at one million dollars or more to launch the University into the next decade and century. In May of 1984, the College trustees voted to prepare for transition to University status on the school's 40th anniversary in 1989. Another landmark event occurred at the turn of the century that moved the University away from being owned and operated by the Arizona Southern Baptist Convention to being self-owned by the Board of Trustees.

By the early 2000's, though, GCU was struggling with maintaining its operations in light of dwindling financial support. In September 2003, the University was at a critical juncture, teetering on the verge of insolvency and facing the prospect of bankruptcy with a limited student body. In early 2004, a small group of investors acquired the University and undertook a mission to salvage GCU by focusing primarily on offering online programs to working adults. With an improving financial structure, but a languishing student body and campus, the University recruited a new leadership team in 2008 to envision a future for GCU that centered around a hybrid campus strategy that combined a thriving, traditional student body with a growing nontraditional student body focused primarily on working adults studying at the graduate level. To generate the additional capital necessary to improve its online campus infrastructure and begin the expansion of its ground, traditional campus, the University completed an initial public offering in 2008.

The University began to implement its vision in earnest by making significant investments in its campus. The University began to see a transformation in the quality and growth of its traditional student body which grew from less than 1,000 students attending its campus in 2009 to approximately 19,000 students in fall 2017, with an incoming GPA of approximately 3.5. GCU's nontraditional student body also made tremendous strides during this time as well, growing from approximately 22,000 students at the beginning of 2009 to approximately 70,000 students at the end of 2017, with greater than 50% studying in graduate programs. Almost 70% of the University's traditional students are studying in rigorous science, technology, engineering, math and business programs and the University expects to see its overall traditional student body expand to approximately 25,000 students by 2025.

In total, since 2009, the University has invested over one billion dollars in facilities and technology infrastructure. The University continues to invest in full-time faculty teaching both traditional and nontraditional students, improved technology infrastructure and programmatic expansion in high-growth, high-demand areas such as engineering, computer science, and information technology. Importantly, the University has been able to self-fund these investments with only nominal increases in tuition for nontraditional students while freezing tuition for traditional students for 10 straight years.

GCU's unique history and recent transformation are distinctive in higher education today as no other university in the country has seen such dramatic change. This is further evidenced in 2018 when GCU transitioned back to a tax-exempt IRS 501(c)(3) institution. This decision provided faculty and students equitable opportunities to participate in academic and co-curricular opportunities with peer-institutions, to operate a philanthropic foundation and provide grant writing and research opportunities for faculty and students, to invest in educational infrastructure allowing the University to continue offering tuition at levels that make private higher education affordable to all socio-economic classes of Americans, to provide employment and career growth opportunities for faculty and staff, and continue to invest in the

communities the University serves. This transition also allowed student-athletes to participate in governance opportunities afforded by the NCAA.

## Board of Trustees

Dr. Fred Miller, Chairman

Medical Director, Retired- Arizona Priority Care and Pima County

B.S. Knoxville College, M.S., PhD, Howard University; M.D. University of Medicine and Dentistry of New Jersey

Peggy J. Chase

President and CEO, *Retired*-Terros Health

## University Seal

When the Grand Canyon College seal was adopted in 1950, two of its major components were the cross and the cactus. The saguaro cactus rises from its desert setting to signify the intellectual opportunity for Grand Canyon University students, counteracting the arid mental state of uneducated man. The cross stands prominently on the horizon as a guide for spiritual enlightenment. Between the outer circle representing the earth and the inner circle representing the wheel of progress, the name of the University and its location are inscribed. The use of the seal is permitted only with approval of the Chief Executive Officer of the University.

# University Mascot and Colors

The University mascot is the antelope. Antelope are native to the region surrounding Prescott, Arizona, near the college's first campus. The mascot reminds us of our heritage and humble beginnings. School colors are purple, black, and white. Students, employees, or contractors of the University shall not use the Grand Canyon University name, logo, or mascot in connection with any commercial venture without written approval of the Chief Executive Officer.

## Statement of Principle

The words of the Alma Mater summarize the attitude and spirit of Grand Canyon University:

### ALMA MATER

*Hail to thee, Grand Can-yon Col-lege*

*Al-ma Ma-ter True.*

*Set a-midst the des-ert's glo-ry,*

*High-est praise to you.*

*So to God our hopes as-pir-ing,*

*This our pledge di-vine,*

*Striv-ing, seek-ing, find-ing, serv-ing*

*God and all man-kind.*

Words and music composed by Dr. Chester S. Bagg

| Christmas Day<br>12/25/26                                                 | X                           | X                                           | X                         | X                                                                 |

Online Note: Online students are encouraged to submit work early if an assignment due date falls directly on a holiday. Students are still responsible for timely submission of work.

Evening Classes Note: Classes with scheduled meeting days of the listed holidays will not meet in-person the week of the holiday. During that week, faculty members and students will participate in the online classroom, following the online participation requirements including posting substantively throughout the week.

Evening Classes and Traditional Students Note: In observation of holidays that fall on weekend days, classes do not meet on the Friday before a Saturday holiday, or the Monday after a Sunday holiday.

# Degrees Offered

---

The University offers curricula leading to the degrees of Doctor of Business Administration, Doctor of Education, Doctor of Nursing Practice, Doctor of Philosophy, Master of Arts, Master of Business Administration, Master of Divinity, Master of Education, Master of Public Administration, Master of Public Health, Master of Science, Bachelor of Arts, and Bachelor of Science, as well as offering graduate and undergraduate certificates. Please refer to the university website ([www.gcu.edu](http://www.gcu.edu)) for the locations/modalities in for each program. Students should be advised that some degree programs at GCU have competitive admissions or require college-specific admission requirements beyond the University level admission requirements. If a program is offered on campus and online, the courses within the program are the same regardless of modality.

## Doctoral Programs

### Doctor of Business Administration

The Doctor of Business Administration (D.B.A.) is designed for those who desire a deeper understanding of business theory and its application to their area of professional interest. Grand Canyon University offers the following emphases for this degree:

- Data Analytics Qualitative
- Data Analytics Quantitative
- Innovation and Corporate Entrepreneurship (Qualitative Research)
- Innovation and Corporate Entrepreneurship (Quantitative Research)
- Management Qualitative
- Management Quantitative
- Marketing Qualitative
- Marketing Quantitative

### Doctor of Education in Organizational Leadership

The Doctor of Education (Ed.D.) in Organizational Leadership program is delivered through a combination of online courses and face-to-face residencies. Aspects of the program's curriculum and instruction are shared by the College of Education, College of Humanities and Social Sciences, College of Nursing and Health Care Professions, College of Theology and the Colangelo College of Business, meeting the needs of master's-prepared professionals seeking a terminal degree in leadership. Grand Canyon University offers the following emphases for this degree:

- Behavioral Health Qualitative
- Behavioral Health Quantitative
- Christian Ministry Qualitative
- Christian Ministry Quantitative
- Health Care Administration Qualitative
- Health Care Administration Quantitative

### Doctor of Education in Teaching and Learning with an Emphasis in Adult Learning

The Doctor of Education in Teaching and Learning program develops educators capable of generating new knowledge and responsibly applying knowledge to achieve educational outcomes as well as mentoring, coaching, and collaborating from the perspective of the Christian worldview. Students will study the major bodies of literature in educational theory and philosophy, Summer 2026 Academic Catalog

will reflect critically on existing theory, will identify appropriate applications of theory, and will conceptualize philosophy from its theoretic foundation. Students will develop academic and research expertise through the study of research methodology.

The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders. Grand Canyon University offers the following emphases for this degree:

- Adult Learning Qualitative
- Adult Learning Quantitative

### Doctor of Health Administration

The doctorate in health administration is a terminal research degree that allows for the development of theoretical knowledge in the healthcare industry and application of that knowledge to the improvement of practice. The program will prepare established professionals to design innovative operational approaches to leadership within healthcare organizations through addressing technology, efficiency, quality, safety, and outcomes. The program will prepare students for careers in health system management, healthcare operations, healthcare research, and health policy. Credits: 60+. Grand Canyon University offers the following emphases for this degree:

- Operational Leadership Qualitative
- Operational Leadership Quantitative

### Doctor of Ministry

The Doctor of Ministry (DMin) is an advanced professional doctoral degree. This doctoral program involves extensive research and the practical application of theory to a specific ministry context. The DMin supports the vocational goals of pastors, church leaders, missionaries, and other Christian leaders through a combination of robust theological reflection, application, and an exploration of various models for ministry. Doctoral students are prepared to engage their ministry context with biblical insight as they develop a theological vision for faithful and effective leadership and service. The program provides a variety of learning and formative experiences while requiring students to engage in extensive academic research in an area of ministry aligned with the student's sense of vocational calling. The DMin entails residency requirements and culminates in a writing project that applies appropriate research methodologies and resources.

### Doctor of Nursing Practice

The Doctor Nursing Practice Degree (DNP) encompasses a mixture of didactic courses and mentored practicum experiences. Each course allows for the demonstration and achievement of programmatic competencies and objectives through real-world health care systems application. The curriculum and instruction meet the needs of master's-prepared nurses seeking a terminal-

practice degree. Grand Canyon University offers the following emphasis for this degree:

- Educational Leadership

### **Doctor of Philosophy in Counselor Education and Supervision**

The doctoral degree in Counselor Education and Supervision is intended to prepare graduates to work as counselor educators, supervisors, researchers, and practitioners in academic and clinical settings. The standards for this program are intended to accommodate the unique strengths of students seeking to enhance their leadership and counseling skills. Grand Canyon University offers the following emphases for this degree:

- Qualitative
- Quantitative

### **Doctor of Philosophy in General Psychology**

The Doctor of Philosophy (Ph.D.) in General Psychology program offers a broad array of courses that increase the understanding of human actions in the past and present. Grand Canyon University offers the following emphases for this degree:

- Cognition and Instruction Qualitative
- Cognition and Instruction Quantitative
- Industrial and Organizational Psychology Qualitative
- Industrial and Organizational Psychology Quantitative
- Integrating Technology, Learning, and Psychology Qualitative
- Integrating Technology, Learning, and Psychology Quantitative
- Performance Psychology Qualitative
- Performance Psychology Quantitative

## **Professional Programs**

### **Education Specialist**

The Education Specialist (Ed.S.) in K-12 Leadership program develops and enhances the learner's ability to grasp, process, and apply doctoral-level constructs that positions them for organizational governance, capacity building, and vision casting.

## **Master Programs**

### **Master of Arts**

The Master of Arts is granted to those students who have completed a bachelor's degree at an accredited, GCU-approved institution and are seeking a Master of Arts degree.

- Autism Spectrum Disorders
- Biblical Studies
  - Emphasis in New Testament
  - Emphasis in Old Testament
- Christian Leadership
- Christian Ministry
- Christian Studies
- Communication
  - Emphasis in Education
- Curriculum and Instruction
- English
  - Emphasis in Education
- Higher Education Student Affairs
- History

- Emphasis in Education
- Reading
  - Emphasis in Elementary Education
- Reading Education K-12
- Teaching English to Speakers of Other Languages
- Theology
- Urban Ministry
- Youth and Family Ministry

### **Master of Business Administration**

The Master of Business Administration is designed for those students who have previously completed a bachelor's degree at an accredited, GCU-approved institution.

- Emphases in:
  - Accounting
  - Business Analytics
  - Christian Leadership
  - Cybersecurity
  - Finance
  - Health Systems Management
  - Leadership
  - Marketing
  - Non-Profit Management
  - Project Management
  - Sports Business
  - Strategic Human Resource Management
  - Supply Chain Management

### **Master of Business Administration and Master of Science in Leadership**

The Master of Business Administration and Master of Science in Leadership is designed for those students who have previously completed a bachelor's degree at an accredited, GCU-approved institution.

### **Master of Business Administration and Master of Science in Nursing**

The Master of Business Administration and Master of Science in Nursing is designed for those students who have previously completed a bachelor's degree at an accredited, GCU-approved institution.

- Emphasis in:
  - Nursing Leadership in Health Care Systems

### **Master of Divinity**

The Master of Divinity is the standard degree for professional ministry preparation and is designed for students who intend to serve in local churches, Christian organizations, and other ministerial roles. The Master of Divinity program offers comprehensive biblical and theological knowledge while developing skills necessary for effective Christian ministry. This degree features a foundational, pastorally oriented program of study that emphasizes the centrality of the gospel, the significance of the church, and the pressing need to advance the Kingdom of God through missions.

### **Master of Education**

The Master of Education degree is designed for students who have previously completed a bachelor's degree at an accredited, GCU-approved institution and may be seeking certification at the elementary or secondary level. An advanced Program of Study is

included in that preparation or can be obtained after certification requirements are completed. This degree is available in the following specialized areas:

- Early Childhood Education
  - Early Childhood Education and Early Childhood Special Education
  - Educational Administration
    - Emphasis in Christian Education
    - Emphasis in School Business and Finance
  - Educational Leadership
    - Emphasis in K-12 Christian Education
  - Elementary Education
  - Elementary Education and Special Education
  - School Counseling
  - Secondary Education
    - Emphasis in Humanities\*
    - Emphasis in Humanities $\phi$
    - Emphasis in Science Technology Engineering and Mathematics\*
    - Emphasis in Science Technology Engineering and Mathematics $\phi$
  - Secondary Humanities Education
  - Secondary STEM Education
  - Special Education
  - Special Education: Moderate to Severe
- \* Initial Program – Leads to Initial Teacher Licensure  
 $\phi$  Initial Program – Does Not Lead to Initial Teacher Licensure

## Master of Public Administration

The Master of Public Administration is designed for those students who have previously completed a bachelor's degree at an accredited, GCU-approved institution.

- Emphases in:
  - Government and Policy
  - Health Care Management
  - Non-Profit Management

## Master of Public Health

The Master of Public Health is designed for those students who have previously completed a bachelor's degree at an accredited, GCU-approved institution.

## Master of Science

The Master of Science is granted to those students who have completed a bachelor's degree at an accredited, GCU-approved institution and are seeking a Master of Science degree.

- Accounting

# General Education Requirements

---

General Education coursework prepares Grand Canyon University graduates to think critically, communicate clearly, live responsibly in a diverse world, and thoughtfully integrate their faith and ethical convictions into all dimensions of life. These competencies, essential to an effective and satisfying life, are outlined in the General Education Learner Outcomes. General Education courses embody the breadth of human understanding and creativity contained in the liberal arts and sciences tradition. Students take an array of foundational knowledge courses that promote expanded knowledge, insight, and the outcomes identified in the University's General Education Competencies. The knowledge and skills students acquire through these courses serve as a foundation for successful careers and lifelong journeys of growing understanding and wisdom.

## General Education Information

### Requirements for Minnesota Students

Minnesota students should refer to the Minnesota-specific General Education requirements below, and consult their Student Services Counselor if necessary.

### Recommended Sequence for Online Students

It is recommended that online students at Grand Canyon University use the suggested GCU Course Options identified in the table below and complete the sequence of general education courses in the following order:

| Bachelor of Arts         | Bachelor of Science      |
|--------------------------|--------------------------|
| UNV-103/303 <sup>Ω</sup> | UNV-103/303 <sup>Ω</sup> |
| UNV-104                  | UNV-104                  |
| PSY-102                  | PHI-105                  |
| ENG-105 <sup>Δ</sup>     | ENG-105 <sup>Δ</sup>     |
| SOC-100                  | PSY-102                  |
| CWV-101/301 <sup>Ω</sup> | CWV-101/301 <sup>Ω</sup> |
| Major Course 1           | Major Course 1           |
| ENG-106 <sup>Δ</sup>     | ENG-106 <sup>Δ</sup>     |
| MAT-144                  | BIO-220                  |
| Major Course 2           | Major Course 2           |
| INT-244                  | SOC-100                  |
| COM-263                  | MAT-154 or MAT-144*      |

Students enrolled in the traditional campus may have a wider variety of options available in which to satisfy their general education requirements. Please contact your Student Services Counselor.

\*Math requirement is dependent on Program of Study.

## Bachelor of Arts

| Competency                                        | Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | GCU Course Options                                                                                                                                                                                                                                                                                                                                       | Total Credits |
|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>University Foundations</b>                     | <p>Upon completion of Grand Canyon University's University Foundation experience, students will be able to demonstrate competency in the areas of academic skills and self-leadership. They will be able to articulate the range of resources available to assist them, explore career options related to their area of study, and have knowledge of Grand Canyon's community. Students will be able to:</p> <ul style="list-style-type: none"> <li>• Demonstrate foundational academic success skills</li> <li>• Explore GCU resources (CLA, library, Career Center, ADA office, etc.)</li> <li>• Articulate strategies of self-leadership and self-management</li> <li>• Recognize opportunities to engage in the GCU community.</li> </ul> <p>Students with fewer than 24 credits will fulfill the University Foundations requirement with a specified lower-division course. An upper-division selection will be made available to students who enter the university with more than 24 credits.</p> | <ul style="list-style-type: none"> <li>• UNV-103/303: University Success, 4 credits</li> <li>• UNV-106: University On-Campus Success, 4 credits</li> </ul>                                                                                                                                                                                               | 4             |
| <b>Effective Communication</b>                    | <p>Graduates of Grand Canyon University will be able to construct rhetorically effective communications appropriate to diverse audiences, purposes, and occasions (English composition, communication, critical reading, foreign language, sign language, etc.). | <b>Critical Thinking</b>                          | <p>Graduates of Grand Canyon University will be able to use various analytic and problem-solving skills to examine, evaluate, and/or challenge ideas and arguments (mathematics, biology, chemistry, physics, geology, astronomy, physical geography, ecology, economics, logic, philosophy, technology, statistics, accounting, etc.). Students are required to take 3 credits of intermediate algebra or higher.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <ul style="list-style-type: none"> <li>• PHI-105: 21<sup>st</sup> Century Skills: Critical Thinking and Problem Solving, 4 credits</li> <li>• MAT-144: College Mathematics or MAT-154: Applications of College Algebra, 4 credits</li> <li>• BIO-220: Environmental Science, 4 credits</li> </ul>                                           | 11-12         |
| <b>Global Awareness, Perspectives, and Ethics</b> | <p>Graduates of Grand Canyon University will be able to demonstrate awareness and appreciation of and empathy for differences in arts and culture, values, experiences, historical perspectives, and other aspects of life (psychology, sociology, government, Christian studies, Bible, geography, anthropology, economics, political science, child and family studies, law, ethics, cross-cultural studies, history, art, music, dance, theater, applied arts, literature, health, etc.).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <ul style="list-style-type: none"> <li>• HIS-144: U.S. History Themes, 4 credits</li> <li>• PSY-102: General Psychology, 4 credits</li> <li>• SOC-100: Everyday Sociology, 4 credits</li> </ul> <p>If the predefined course is a part of the major, students need to take an additional course.</p>                                         | 6-8           |

# Honors College

## Honors College Description

The Honors College at Grand Canyon University oversees the success of honors students as they progress through and complete required coursework in the honors program. Each college has a unique set of courses that must be taken to successfully complete the honors program and to earn a certificate of honors from the Honors College. Each college's honors program is designed to challenge students in the areas of personal and academic growth, as well as influence students' mental paradigms for viewing the world in which they live. This is accomplished by holistically developing competencies in the areas of decision-making and research, ethics, leadership, service, and cultural awareness. In particular, students will drive change that affects their community.

## Honors College Mission

The Honors College at Grand Canyon University is dedicated to cultivating a learner-centric environment that promotes character and integrity, intellectual growth and practical application through interdisciplinary collaboration. We empower students to amplify their purpose through intentional curricula and comprehensive co-curricular experiences. Honors graduates emerge as adept communicators, evidence-based decision-makers and deliberate global contributors while becoming good stewards of their faith and purpose.

## Honors College Goals

While the outcomes of the honors program cannot be confined to a list of specific tangible targets, servant leadership and scholarship are its overarching goals. The honors program:

- Focuses on transforming students academically through a broad exposure to many disciplines while being challenged to higher levels of thinking within those disciplines.
- Expects students to acquire Habits of Mind and novel ways of thinking that prepare them to analyze relevant issues and to become change agents who problem-solve solutions to real-world applications in innovative ways.
- Provides avenues for students to represent the university as ambassadors who display servant leadership through experiential learning and service opportunities.

## Programs Requirements

The following expectations for coursework must be completed in order to earn a special designation upon graduation from the Honors College. The honors program requires 28 credits of honors coursework as well the successful completion of an HON prefix course.

Students that transfer in an approved equivalent of an honors general education course through GCU dual-enrollment or from a college or university must complete an additional honors course.

For questions, please review the Honors College website for additional details at [www.gcu.edu/honors](http://www.gcu.edu/honors) or contact the Honors College at [GCUHonors@gu.edu](mailto:GCUHonors@gu.edu).

# The Colangelo College of Business

## College Description

The Colangelo College of Business (CCOB) focuses on providing cutting-edge and innovative courses designed to meet students' career needs. The College offers Programs of Study for those who desire the traditional four-year baccalaureate degree, accelerated degree-completion programs for working adults, and graduate degrees for working professionals. The College's academically qualified faculty has relevant business and teaching experience and is committed to providing an excellent business education through the primacy of teaching, offering small class sizes, and building student-faculty relationships that foster the student's academic and professional growth.

## College Mission

The Colangelo College of Business challenges and inspires students to be servant leaders with the business skills and values necessary to drive organizational success and positively impact society.

## College Features

The Colangelo College of Business is comprised of two academic schools. Each school serves a unique set of students and offers quality programs to meet specific students' career needs.

## School of Business Studies

The School of Business Studies exists to serve both undergraduates who are preparing to initiate careers and working professionals who are seeking to develop their careers further. All programs within the School of Business Studies are developed in accordance with the accreditation standards of the Accreditation Council of Business Schools and Programs (ACBSP), which requires that a program be in existence for two or more years before it receives accreditation. Programs in the School of Business Studies that have reached this threshold and received ACBSP accreditation include the Bachelor of Science in Accounting, Bachelor of Science in Business Administration, Bachelor of Science in Entrepreneurial Studies, Bachelor of Science in Finance and Economics, Bachelor of Science in Marketing and Advertising, and Master of Business Administration.

## School of Business Studies: Undergraduate Programs

The School of Business Studies offers a Bachelor of Science degree with majors in Accounting, Business Administration, Entrepreneurial Studies, Finance and Economics, Marketing, and Sports and Entertainment Management. The accounting major and the finance and economics major are designed to prepare students for professional practice in corporate accounting and finance or for management positions in business. Completing the requirements for the accounting major qualifies students to sit for the Certified Management Accountant (CMA) examination and for the Certified Public Accountant (CPA) exam in most states. The entrepreneurship major is designed for students who desire to start their own business, or be a change agent for innovation within larger organizations. The business administration major is a broadly-based degree that emphasizes technical, human, and conceptual skills that encompass all functional areas of business. The marketing major combines a strong business core with special emphasis in market forces, marketing strategy, and sales management. The sports and entertainment management major

prepares students to become professional managers in areas such as sports marketing, sports media, amateur and professional athletics, and sports and entertainment event planning.

## Bachelor of Science in Accounting

The Bachelor of Science in Accounting program prepares graduates for a future career working as an accountant. Upon completing the bachelor's degree in accounting, students possess the skills necessary to work in a variety of careers, such as corporate accounting, financial analysis, tax preparation, and internal auditing. Learning the core foundations of accounting principles and procedures, students qualify to sit for the Certified Management Accountant (CMA) exam. Coursework for the bachelor's degree in accounting includes a focus on accounting principles and theories necessary for preparing financial statements in the United States. Principles of management accounting, including decision making, financial analysis, and cost accounting are also examined in this bachelor's degree in accounting.

## Bachelor of Science in Accounting with an Emphasis in Public Accounting

Grand Canyon University's Bachelor of Science in Accounting with an Emphasis in Public Accounting prepares graduates for a future career working as an accountant. Immediately upon completing the bachelor's degree in accounting, students will be provided with the skills necessary to work in a variety of careers within public accounting, such as a staff accountant, tax accountant, or auditor. Graduates may qualify to sit for the Certified Public Accountant (CPA) exam in most states, while continuing to work toward the 150-credit-hour minimum required for licensure. It is recommended that that students continue on to the Master of Science in Accounting in order to meet the educational requirements for becoming licensed as a CPA.

## Bachelor of Science in Applied Business Analytics

Grand Canyon University's Bachelor of Science in Applied Business Analytics program prepares students for career options that include business analytics analyst, business intelligence analyst, data analyst, business analytics manager, and business intelligence manager. Students examine the fundamentals of

database structures, data mining, business analytics, and project management. Students also examine the role of governance and ethics within information technology with specific emphasis on preparing for an audit, complying with government regulations, and understanding data-privacy issues. Graduates are prepared to extract, analyze, and interpret data to help enable decision making within data-driven business environments.

## Bachelor of Science in Applied Entrepreneurship

The Bachelor of Science in Applied Entrepreneurship program addresses the areas of innovation, entrepreneurial spirit, and business skills in order to develop the global citizens, critical thinkers, effective communicators, and responsible leaders required in today's global economy. The program is built on the principles of personal integrity, values, and innovation. It provides students with the personal and business skills to think analytically, ask the right questions, solve problems, and function as entrepreneurs in their own business or intrapreneurs in larger companies.

## Bachelor of Science in Applied Human Resources Management

Grand Canyon University's Bachelor of Science in Applied Human Resources Management program prepares graduates to possess the skills necessary for careers in talent management – one of the essential business functions. Learning the core foundations of Human Resources Management (HRM) principles and procedures, students gain an understanding of how employees are motivated to accomplish organizational goals. Students explore how to align talent with an organization's strategic mission. The program is based on theory interwoven with practice in order for students to gain an understanding of the strategies and skills needed to successfully execute HRM tasks. Students study the theories and best practices of employee recruitment, selection, placement, retention, total compensation, training, development, and performance management.

## Bachelor of Science in Business Analytics

Grand Canyon University's Bachelor of Science in Business Analytics program prepares students for career options that include business analyst, business analytics analyst, business intelligence analyst, data analyst, business analytics manager, and business intelligence manager. Students examine foundational aspects in business, including marketing, accounting, finance, economics, and management. Within the context of business disciplines, students address core areas of business analytics, including data visualization, data mining, and predictive and prescriptive models. Project management and information governance and ethics are also explored. Graduates are prepared to extract, analyze, and interpret data to help enable decision making within data-driven business environments.

## Bachelor of Science in Business Information Systems

Grand Canyon University's Bachelor of Science in Business Information Systems combines a solid business foundation with the technical skills necessary to compete for entry-level management positions in information systems and technology management. Business coursework will address functional area skills such as accounting, economics, statistics, finance, and marketing. Students will also examine the fundamentals of business information systems and technology, including programming, principles of database management, networking, IT project management, and ethical considerations related to IT governance. Innovation and entrepreneurship will be a key focus of the program.

#### Bachelor of Science in Business for Secondary Education (IP/TL)

##### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Business for Secondary Education prepares students to become a junior high or high school business teacher. This program provides initial teacher licensure. The format and courses of this regionally accredited and Arizona State Board of Education approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Teacher candidates must have access to a grade 6-12 classroom to complete the program and practicum assignments, which guide them through 85 hours of observational experiences. The final semester of this Secondary Education program includes a full-time, 15-week student teaching component. Candidates are responsible for contacting their state department of education for licensure requirements and program approval.

#### Bachelor of Science in Construction Management

Grand Canyon University's Bachelor of Science in Construction Management gives students a fundamental foundation within the construction management industry. Students learn the essential terminology, methods, and tools that successful construction managers use to manage projects including but not be limited to pre-construction services, leadership and personal management, scope management, innovated and critical thinking, project scheduling, estimating and cost control, quality assurance, site logistics, and safety and risk management. Students are required to complete 300 industry hours with a licensed contractor, and or pre-approved related industry employer.

### Bachelor of Science in Cybersecurity Management

Grand Canyon University's Bachelor of Science in Cybersecurity Management program prepares students to compete for leading positions in IT security-related fields by developing skills to become an effective managerial liaison between the technical and non-technical cybersecurity spaces. In addition to fundamental business principles such as accounting, finance, economics, management, and marketing, students focus on cybersecurity management principles that relate to an organization's processes, technology, and stakeholders.

### Degree Requirements

|                                                                       |               |

### Bachelor of Science in Economics

Grand Canyon University's Bachelor of Science in Economics program trains students in economic theory along with data analysis and critical thinking skills required to understand and navigate real world economic and business problems. This degree prepares students for careers in business and government, including high-growth industries such as healthcare, finance, and e-commerce. The analytical and business decision making skills developed through this program also help prepare students planning to pursue graduate studies in business, law and public policy.

## Bachelor of Science in Entrepreneurial Studies

Grand Canyon University's Bachelor of Science in Entrepreneurial Studies program addresses the areas of servant leadership, innovation, entrepreneurial spirit, and business skills in order to develop the global citizens, critical thinkers, effective communicators, and responsible leaders required in today's global economy. The program is built on the principles of personal integrity, values, and innovation. It provides students with the personal and business skills to think analytically, ask the right questions, solve problems, and function as entrepreneurs in their own business or intrapreneurs in larger companies.

### Bachelor of Science in Finance

This degree prepares students to enter financial positions in corporations, financial institutions, brokerage firms, and government. Earning a degree in Finance enables students to identify the functions of financial markets and institutions and their integration on a global basis; understand the impact of changing interest rates; determine the value of stocks, bonds, and securities; analyze the appropriate measures of risk and return for various financial instruments; and understand the regulation of the financial industry.

### Bachelor of Science in Finance with an Emphasis in Financial Planning

The Bachelor of Science in Finance with an Emphasis in Financial Planning is an industry-supported program which provides students with an education in the financial planning field and the opportunity to meet both the coursework and the degree requirement to sit for the CERTIFIED FINANCIAL PLANNER(TM) exam—an important step in the path to CFP(R) certification. The curriculum teaches students about the process of personal financial planning. Students learn how to assess clients' personal current and future financial needs, develop goals, evaluate alternatives, develop a comprehensive action plan in alignment with their values to achieve their goals, and monitor and adjust plans in a changing environment. The program focuses on personal financial management, investing, retirement planning, taxes, estate planning, risk management, client communication, and ethics.

### Degree Requirements

|                                                                             |               |

### Bachelor of Science in Supply Chain and Logistics Management

Grand Canyon University's Bachelor of Science in Supply Chain and Logistics Management program addresses servant leadership, innovation, entrepreneurial spirit, and business skills in order to develop the global citizens, critical thinkers, effective communicators, and responsible leaders required in today's global economy. The program prepares students to compete for entry-level positions that focus on both optimizing organizational effectiveness and managing/analyzing global supply chains. In addition to foundational courses in business, students are required to complete courses addressing lean operations, business process management (BPM), and enterprise optimization. Other courses focus on procurement, logistics, and systems aspects of global supply chains. Coverage of topics also encompasses knowledge areas addressed by Lean Six Sigma Green Belt certification.

## Bridge to Master of Science in Accounting

This Bridge to the Master of Science in Accounting program enables students who have earned a bachelor's degree in business disciplines other than accounting to pursue the Master of Science in Accounting degree. The program includes the undergraduate coursework in accounting and management necessary to prepare students for the rigor of the Master's degree. The Bridge to Master of Science in Accounting prepares graduates for a career in the field of public accounting. The degree is designed to enhance theoretical and practical accounting skills for practitioners, researchers and educators. Graduates may qualify to sit for the Uniform Certified Public Accountant (CPA) exam in most states.

## School of Business Studies: Dual-Degree Programs

The Colangelo College of Business offers two dual-degree graduate programs: the Master of Business Administration and Master of Science in Leadership, as well as the Master of Business Administration and Master of Science-Nursing with an Emphasis in Nursing Leadership in Health Care Systems.

Information concerning the Master of Science in Nursing: Nursing Leadership in Health Care Systems program is located in the College of Nursing and Health Care Professions section of the Academic Catalog.

### Master of Business Administration and Master of Science in Leadership

Grand Canyon University's Master of Business in Administration and Master of Science in Leadership (MBA/MSL) dual degree program is designed for students who desire to pursue a traditional MBA degree and a leadership degree concurrently. Graduates will be able to integrate a conceptual foundation for an

executive leadership role that emphasizes the immediate application of ethical and practical leadership skills. They will be able to identify patterns, connections, and relationships across business practices within organizational systems in order to address organizational performance challenges. Students will combine their business management and leadership skills to successfully analyze and evaluate structures, processes, and systems within changing organizational environments in order to build highly effective organizations.

## School of Business Studies: Graduate Programs

The Colangelo College of Business offers the Master of Business Administration (MBA) program provides emphases in Accounting, Finance, Health Systems Management, Leadership, Marketing, and Strategic Human Resource Management. The Master of Business Administration (MBA) degree is designed for working professionals who desire to complete their graduate degree without interrupting their professional careers. The program consists of 39-51 graduate credit hours. It affords students the opportunity to develop cross-functional business-management skills, preparing business practitioners for advanced management and executive positions. Students have the option of completing two emphasis areas as part of their MBA degree. Students with the necessary academic or professional background who complete two courses per semester on a trimester basis will be able to complete the MBA program in just over two years. The Colangelo College of Business MBA Program is fully accredited by the Accreditation Council of Business Schools and Programs (ACBSP).

The Master of Science in Accounting program prepares students to sit for the CPA exam and provides opportunities for current

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

CPAs and accountants to advance their skills in theory, practice, and research.

## Master of Business Administration

The Master of Business Administration program is designed for working professionals who desire to complete a program of study that allows focus across technical, human, and conceptual skills that encompass the functional areas of business. The core courses in the MBA program allow the student to develop strong foundations across accounting, economics, finance, information systems, management, marketing and quantitative methods provided in the core courses. Courses in the critical areas of leadership and human resources management will provide the student the broad management perspective as well as the analytical and interpersonal skills needed to succeed in global business.

## Master of Business Administration with an Emphasis in Accounting

Grand Canyon University's Master of Business Administration with an Emphasis in Accounting program provides students with the capacity for transformational leadership through the application of business practices. The program highlights the impact of the global economy on organizational decision making, planning, and sourcing of organizational resources. Students draw upon interpersonal skills to address each practice, as well as to comprehend the influence that diverse cultures have on it. The use of telecommunications, emerging technologies, and ecommerce applications combine with essential business principles that encompass finance, accounting, economics, marketing, and management, providing students with the capacity to lead and manage business enterprises both effectively and ethically. The program encourages students to be informed critical thinkers and decision makers through active research and the application of quantitative methods that transform raw data into useful information. The program prepares students to compete for advanced management positions in corporate accounting through emphasis coursework that addresses the areas of financial accounting and reporting, management accounting and reporting, and specialized accounting and emerging topics.

## Master of Business Administration with an Emphasis in Cybersecurity

The Master of Business Administration with an Emphasis in Cyber Security program provides the foundation of an MBA, including emphasis on accounting, finance, organizational leadership, management, marketing, and strategic planning, as well as two courses in cyber security. These two courses address cyber security concepts and methodologies specific to enterprise security design such as the NIST Cybersecurity Framework, enterprise governance and compliance, cyber-attacks and countermeasures, and the confidentiality, integrity, and availability of information. Courses utilize case studies and current issues in the field related to a variety of industries and perspectives on cyber security.

## Master of Business Administration with an Emphasis in Leadership

Grand Canyon University's Master of Business Administration with an Emphasis in Leadership program provides students with the capacity for transformational leadership through the application of business practices. The program highlights the impact of the global economy on organizational decision making, planning, and sourcing of organizational resources. Students draw upon interpersonal skills to address each practice, as well as

to comprehend the influence that diverse cultures have on it. The use of telecommunications, emerging technologies, and e-commerce applications combine with essential business principles that encompass finance, accounting, economics, marketing, and management, providing students with the capacity to lead and manage business enterprises both effectively and ethically. The program encourages students to be informed critical thinkers and decision makers through active research and the application of quantitative methods that transform raw data into useful information. The program prepares students to compete for critical leadership roles in current and future organizations through coursework that addresses leadership theory, problem solving, organizational leadership, self-leadership, and highly effective teams.

Master of Business Administration with an Emphasis in Non-Profit Management 54 credits

### Master of Business Administration with an Emphasis in Project Management

The Master of Business Administration with an Emphasis in Project Management degree prepares students for leadership positions specifically in areas of project management. The program is designed for working professionals who desire to complete a program of study that allows students to focus across the technical, human, and conceptual skills that encompass the functional areas of business. The core courses in the MBA program allow the student to develop strong foundations across accounting, economics, finance, information systems, management, marketing, and quantitative methods provided in the core courses. Courses in the critical areas of leadership and human resources management will provide the student the broad management perspective as well as the analytical and interpersonal skills needed to succeed in global business. The emphasis courses in project management are based upon the Project Management Institute's (PMI) project management body of knowledge (PMBOK), and include coverage of the PMBOK topics covered in the required Certified Associate in Project Management (CAPM), Project Management Professional (PMP), and Agile Certified Practitioner (ACP) exams.

### Master of Business Administration with an Emphasis in Sports Business

The Grand Canyon University MBA with Sports Business emphasis is specifically designed for ambitious students who seek to further develop their business knowledge and skills in order to maximize career opportunities within the multi-billion dollar global sports business industry. Graduates receive an MBA diploma from the GCU Colangelo College of Business that is intended for relevance and utility in the modern sports business world. The degree program is immersed with Christian-based business values and entrepreneurship, which are foundations of the GCU experience.

The MBA with Sports Business emphasis examines a broad range of business topics and principles with specific application

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

to some of the sports industry's major job category areas such as sports sales and marketing, entrepreneurship, athletic administration, media, as well as trades and services. While giving a healthy respect to the notable pioneers of the industry, the curriculum primarily explores the current trends and future strategies that seek to help sports organizations remain competitive in a global marketplace. The program highlights the impact of the global economy on organizational decision making, planning, and sourcing of administrative resources. Students draw upon interpersonal skills to address each practice, as well as to comprehend the influence diverse cultures have on it. Coursework addresses how the use of emerging digital, social, and e-commerce technologies combine with essential business principles that encompass finance, accounting, economics, marketing, and management. Graduates from the GCU Colangelo College of Business with an MBA Sports Business emphasis are provided with the capacity to lead and manage sports business enterprises both effectively and ethically.

### Master of Science in Leadership

Grand Canyon University's Master of Science in Leadership program provides students with the skills to develop professionally and gain self-confidence in their own leadership styles. Students learn to integrate a conceptual foundation for an executive leadership role that emphasizes the immediate application of ethical and practical leadership skills as well as the ability to create, communicate, and influence decisions using critical thinking and problem-solving skills that are grounded in theory and research. The program emphasizes establishing and maintaining relationships based on intrapersonal and interpersonal communication skills in order to lead diverse and global organizations.

## Minors

The Colangelo College of Business offers minors in the following areas:

### Minor in Air Force (ROTC)

The U.S. Armed Forces are more sophisticated than ever, demanding well-educated personnel. To meet this demand, GCU offers a robust and relevant education designed specifically for Army and Air Force military service students. Pursue an Army or Air Force minor to sharpen your abilities in team leadership, military history, defense policy and other key areas.

### Minor in Church Planting and Church Revitalization

This minor is intended to equip the student with the entrepreneurial skills to start a church or revitalize an existing church using God's miracle of business principles. Whether the student wants to be a pastor, help plant a church, help grow existing churches or start a company that helps churches, this minor will provide a template and skills that can be used to help the church effectively execute the Great Commandment and the Great Commission.

# The College of Doctoral Studies

## College Description

The College of Doctoral Studies provides planning, administration, and evaluation of GCU doctoral programs. The College is responsible for operations concerning doctoral learners including screening applications, assessing students' needs for support services, interfacing with Enrollment, planning and participating in residencies, helping to develop course materials, and providing support throughout the doctoral process. The College provides oversight to the selection of doctoral faculty and contributes to faculty training and evaluation.

## College Mission

The College develops expert practitioners and researchers who become leaders in the disciplines and communities they serve.

## College Vision

Through innovative uses of technology, collaboration, and learning communities, the College of Doctoral Studies will be the premier provider of online doctoral education.

## College Features

Innovative programs in the College of Doctoral Studies are designed to develop scholars through instruction in theory and research, and through practitioners' knowledge. These activities prepare learners to produce scholarly literature, solve problems, and enhance performance in professional roles. The doctoral programs leverage the knowledge and expertise of faculty, learners, and experts external to the University through learning communities specific to the issues, concepts, and methods of a given discipline. Furthermore, the College of Doctoral Studies emphasizes that graduates apply their professional knowledge and services to the benefit of the community.

## Doctoral Program Goals

The College of Doctoral Studies expects its graduates to:

- Be experts in the concepts and methods of their disciplines.
- Create new ways to explain, predict, and improve performance within their areas of expertise.
- Conduct scholarly research that creates knowledge and leads to effective actions.
- Exercise ethical and effective leadership.
- Lead through critical analysis and creative solutions.

## Doctoral Programs

### Bridge to Doctor of Business Administration with an Emphasis in Data Analytics

Offered online by the College of Doctoral Studies, Grand Canyon University's Bridge to Doctor of Business Administration (DBA) program is designed for ambitious learners with a Master's degree in a field other than business administration. Bridge courses taken prior to the DBA program offer the essential prerequisites to doctoral study. The Bridge to the Doctor of Business Administration with an emphasis in Data Analytics program includes coursework in probability, statistics, finance, accounting, marketing and relational database to help the learner prepare to successfully complete the DBA degree program.

### Doctor of Business Administration: Data Analytics (Quantitative Research)

Graduates of Grand Canyon University's Doctor of Business Administration Program with an emphasis in Data Analytics (Quantitative Research) will be able to create and manage the deployment of data analytics in a variety of industries with the intent to secure competitive advantage. Students will conceptualize enterprise data analytics; apply analytic techniques and software to interpret data; evaluate methods of data and analytic modeling; and apply analytics to support data-driven business decision making. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation.

### Doctor of Business Administration: Innovation and Corporate Entrepreneurship (Qualitative Research)

Graduates of Grand Canyon University's Doctor of Business Administration Program with an emphasis in Innovation and Corporate Entrepreneurship (Qualitative) will learn how to create a company-wide innovation culture. Students learn to encourage and reward participation in the process of proposing new products or processes that result in significant competitive advantage that is difficult for other companies to replicate. Coursework specifically focuses on creating innovation, organizational structure, and prototyping an innovation, product, or process. Moreover, students will learn to secure organizational commitment of advocates resulting in the execution of a scalable solution. Students will apply qualitative methodology to the completion of the student's research dissertation.

#### Doctor of Business Administration: Marketing (Qualitative Research)

Graduates of Grand Canyon University's Doctor of Business Administration Program with an emphasis in Marketing (Qualitative Research) will be able to create and manage data-driven marketing in a variety of industries with the intent to secure competitive advantage. Students will integrate the history, philosophy, and theories of marketing; assess the influence of digital technologies; evaluate data-driven marketing management strategies and analyze the complexities of global marketing. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation.

### Doctor of Education in Organizational Leadership: Behavioral Health (Qualitative Research)

The Doctor of Education in Organizational Leadership program develops the learner's ability to generate new knowledge and responsibly apply knowledge to achieve high-performing entities that allow organizational employees and followers to grow and develop to their full potential. Learners will study the major bodies of literature in leadership, reflect critically on existing theory, and identify appropriate applications of theory in education, business, and other organizational cultures. Learners will develop academic and organizational research expertise through the study of statistical and research methodologies. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop learners who are global citizens, critical thinkers, effective communicators, and responsible leaders. Graduates who earn the Doctor of Education in Organizational Leadership with an Emphasis in Behavioral Health will advance the study of leadership within the field of behavior health with an in-depth, research-based approach to facilitate the leadership abilities and role as a strategic professional.

### Doctor of Education in Organizational Leadership: Christian Ministry (Qualitative Research)

The Doctor of Education in Organizational Leadership program develops the learner's ability to generate new knowledge and responsibly apply knowledge to achieve high-performing entities that allow organizational employees and followers to grow and develop to their full potential. Learners will study the major bodies of literature in leadership, reflect critically on existing theory, and identify appropriate applications of theory in education, business, and other organizational cultures. Learners will develop academic and organizational research expertise through the study of statistical and research methodologies. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop learners who are global citizens, critical thinkers, effective communicators, and responsible leaders. Graduates who earn the Doctor of Education in Organizational Leadership with an

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>£</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

Emphasis in Christian Ministry will advance the study of leadership within the field of Christian ministry with an in-depth research-based approach to facilitate leadership within Christian ministry and society.

### Doctor of Education in Organizational Leadership: Higher Education Leadership (Qualitative Research)

The Doctor of Education in Organizational Leadership program develops the learner's ability to generate new knowledge and responsibly apply knowledge to achieve high-performing entities that allow organizational employees and followers to grow and develop to their full potential. Learners will study the major bodies of literature in leadership, reflect critically on existing theory, and identify appropriate applications of theory in education, business, and other organizational cultures. Learners will develop academic and organizational research expertise through the study of statistical and research methodologies. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop learners who are global citizens, critical thinkers, effective communicators, and responsible leaders. Graduates who earn the Doctor of Education in Organizational Leadership with an Emphasis in Higher Education Leadership will advance the study of leadership within the field of higher education leadership with

an in-depth, research-based approach to facilitate the leadership abilities and role as a strategic professional.

#### Doctor of Education in Organizational Leadership: Organizational Development (Quantitative Research)

The Doctor of Education in Organizational Leadership program develops the learner's ability to generate new knowledge and responsibly apply knowledge to achieve high-performing entities that allow organizational employees and followers to grow and

develop to their full potential. Learners will study the major bodies of literature in leadership, reflect critically on existing theory, and identify appropriate applications of theory in education, business, and other organizational cultures. Learners will develop academic and organizational research expertise through the study of statistical and research methodologies. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop learners who are global citizens, critical thinkers, effective communicators, and responsible leaders. Graduates who earn the Doctor of Education in Organizational Leadership with an Emphasis in Organizational Development will examine organizational culture, communication, and leader/follower interaction, and will analyze organizational models using constructs from research to explain behaviors and events in an organizational setting.

## Doctor of Education in Teaching and Learning: Adult Learning (Qualitative Research)

The Doctor of Education in Teaching and Learning program develops educators capable of generating new knowledge and responsibly applying knowledge to achieve educational outcomes as well as mentoring, coaching, and collaborating from the perspective of the Christian worldview. Students will study the major bodies of literature in educational theory and philosophy, will reflect critically on existing theory, will identify appropriate applications of theory, and will conceptualize philosophy from its theoretic foundation. Students will develop academic and research expertise through the study of research methodology. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders.

## Doctor of Education in Teaching and Learning: Adult Learning (Quantitative Research)

The Doctor of Education in Teaching and Learning program develops educators capable of generating new knowledge and responsibly applying knowledge to achieve educational outcomes as well as mentoring, coaching, and collaborating from the perspective of the Christian worldview. Students will study the major bodies of literature in educational theory and philosophy, will reflect critically on existing theory, will identify appropriate applications of theory, and will conceptualize philosophy from its theoretic foundation. Students will develop academic and research expertise through the study of research methodology. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. The program of study is consistent with Grand Canyon University's mission to develop students who are global citizens, critical thinkers, effective communicators, and responsible leaders.

## Doctor of Health Administration: Operational Leadership (Qualitative Research)

The doctorate in health administration is a terminal research degree that allows for the development of theoretical knowledge in the healthcare industry and application of that knowledge to the improvement of practice. The program will prepare established professionals to design innovative operational approaches to leadership within healthcare organizations through addressing technology, efficiency, quality, safety, and outcomes. The program will prepare students for careers in health system

management, healthcare operations, healthcare research, and health policy.

#### Doctor of Philosophy in General Psychology: Cognition and Instruction (Qualitative Research)

*This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province.*

Grand Canyon University's Doctor of Philosophy (Ph.D.) in General Psychology program offers a broad array of courses that increase the understanding of human behavior and mental processes. The program prepares individuals to engage their knowledge and skills in cognition and instruction in applied settings of teaching and/or conducting psychological research in business, government, or institutions of higher education. Core areas of instruction include five emphasis courses in cognition, research methods as well as history and systems in psychology, personality, and social, biological, and developmental psychology. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. Students are advised to inquire directly with their state if they intend to pursue licensure, as this degree does not lead directly to licensure in and of itself.

### Doctor of Philosophy in General Psychology: Cognition and Instruction (Quantitative Research)

*This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province.*

Grand Canyon University's Doctor of Philosophy (Ph.D.) in General Psychology program offers a broad array of courses that increase the understanding of human behavior and mental processes. The program prepares individuals to engage their knowledge and skills in cognition and instruction in applied settings of teaching and/or conducting psychological research in business, government, or institutions of higher education. Core areas of instruction include five emphasis courses in cognition, research methods as well as history and systems in psychology, personality, and social, biological, and developmental psychology. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. Students are advised to inquire directly with their state if they intend to pursue licensure, as this degree does not lead directly to licensure in and of itself.

## Doctor of Philosophy in General Psychology: Integrating Technology, Learning, and Psychology (Qualitative Research)

*This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province.*

This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province. Grand Canyon University's Doctor of Philosophy (Ph.D.) in General Psychology program offers a broad array of courses that increase the understanding of human actions in the past and present. The program prepares individuals to engage their knowledge and skills in cognition and instruction in applied settings of teaching and/or conducting psychological research in business, government, or institutions of higher education. Core areas of knowledge include history and systems of psychology and cognition, as well as personality, abnormal, social, multicultural, and developmental psychology. Students will be able to employ qualitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. Students are advised to inquire directly with their state if they intend to pursue licensure, as this degree does not lead directly to licensure in and of itself. Entry to this program requires a graduate degree and related coursework. Graduates of Grand Canyon University's Doctor of Philosophy in General Psychology program with an Emphasis in Integrating Technology, Learning, and Psychology will be able to integrate psychology with technology, instruction, and learning to inform research and create solutions to optimize opportunities for stakeholders.

## Doctor of Philosophy in General Psychology: Integrating Technology, Learning, and Psychology (Quantitative Research)

*This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province.*

This degree is not intended for those seeking licensure in clinical practice. Those interested in licensure or certification should identify the applicable requirements by inquiring directly with their state or province. Grand Canyon University's Doctor of Philosophy (Ph.D.) in General Psychology program offers a broad array of courses that increase the understanding of human actions in the past and present. The program prepares individuals to engage their knowledge and skills in cognition and instruction in applied settings of teaching and/or conducting psychological research in business, government, or institutions of higher education. Core areas of knowledge include history and systems of psychology and cognition, as well as personality, abnormal, social, multicultural, and developmental psychology. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation. Students are advised to inquire directly with their state if they intend to pursue licensure, as this degree does not lead directly to licensure in and of itself. Entry to this program requires a graduate degree and related coursework. Graduates of Grand Canyon University's Doctor of Philosophy in General Psychology program with an Emphasis in Integrating Technology, Learning, and Psychology will be able to integrate psychology with technology, instruction, and learning to inform research and create solutions to optimize opportunities for stakeholders.

| <a href="#">MKT-838</a> | Complexity of Marketing                  | 3 credits |

Advanced Graduate Certificate in Marketing 12 credits

### Advanced Graduate Certificate in Performance Psychology

This graduate-level certificate program provides instruction in advanced psychology theories and concepts. The certificate contains an array of courses that increase the understanding of human actions in the past and present with a focus on the enhancement of human performance in a variety of areas. Performance psychology digs deeper into the principles of behavior modification to determine how to improve work and leadership. Those who complete the certificate and want to further explore complex theories of psychology can transfer the

credits directly into GCU's Doctor of Philosophy in General Psychology: Performance Psychology program.

### Professional Programs

#### Education Specialist in K-12 Leadership

Grand Canyon University's Education Specialist in K-12 Leadership program is designed to prepare educators to assume a variety of leadership roles in economically and culturally diverse 21<sup>st</sup> century K-12 educational communities. After foundational instruction in ethics, research, and theory, coursework focuses on educational policy development and decision making, staffing, and organizational leadership, supervision of teaching and learning, instructional and curricular supervision, department and unit management, and other areas related to leadership at the building or district level. The program is aligned with the standards of the Educational Leadership Constituent Council (ELCC) and is consistent with the University's mission to develop learners who are global citizens, critical thinkers, effective communicators, and responsible leaders in a technologically advanced world.

#### Education Specialist in Teaching and Learning

Building a collaborative community focused on student learning requires research, knowledge and the ability plan strategically. Grand Canyon University's Education Specialist (EdS) in Teaching and Learning program is designed to prepare you to assume a expert role in economically and culturally diverse 21st century educational communities. Offered by the College of Doctoral Studies, this accelerated EdS online program streamlines a rigorous curriculum. Unlike the Doctor of Education in Organizational Leadership with an Emphasis in K-12 Leadership, the EdS degree program does not require a residency or dissertation. With an in-depth analysis-based approach, the Education Specialist degree emphasizes theories and models of teaching, learning and leading in elementary, junior high and high school learning environments. Examine the global politics of education and intervention facilitated by government entities. Study professional learning communities, theories of pedagogy, and explore ways to train and develop the team you will lead and support. Students will learn to excel in teaching with the advanced ability to study industry trends, implement new effective teaching strategies based on original research and apply findings to foster greater classroom success.

# The College of Education

---

## College Description

The preparation of teachers and administrators for the public and private schools of this nation is a significant responsibility for the College of Education. The programs seek to ensure the highest level of professional and academic competence of the graduate in the classroom. Consequently, most education courses require a certain number of practicum hours. For more detailed information, please refer to the College of Education Web site at: <http://www.gcu.edu/College-of-Education.php>.

## College Mission

The College of Education (“the College” or “COE”) at Grand Canyon University (“GCU”) is part of a rich heritage of service to the community. For over 60 years, the COE has proudly maintained its place as a prestigious teaching college, ensuring our academic programs meet the changing, diverse needs in education and local communities, and provide opportunities that create meaningful learning experiences for education candidates from a Christ-centered perspective. In addition, the College places great importance on the development of authentic partnerships through practicum/field experience, student teaching, and internships. This work extends from embedded partnerships in the greater Phoenix area to affiliation agreements with schools and districts across the United States. With each partnership, knowing what schools and districts value and what our candidates require to have the best learning experiences and to flourish as practitioners in the field of education remains at the forefront of the College of Education's academic and clinical field work.

The Mission of COE is to inspire excellence in pedagogy and scholarship; advance reflective, innovative, and collaborative teaching practices to maximize student learning and achievement; promote servant leadership in educational communities and engage a diverse and global community of learners with purpose and passion.

Learning, Leading, and Serving are the foundational components of COE's Conceptual Framework. These words symbolize the College's diverse learning opportunities where faculty and staff diligently work alongside candidates to develop a culture of mutual respect, fellowship, and servant leadership within the educational community. COE's Conceptual Framework directly reflects GCU's commitment to serving educational communities in ways that promote human flourishing:

### Learning

We believe that all students can learn and that educators who inspire excellence engage in best practices and maximize student learning achievements. Effective educators are highly experienced and skilled communicators who are dedicated and compassionate, ensuring all students learn to the best of their ability.

### Leading

We believe education is a powerful tool with which to purposefully transform and uplift communities. As our candidates find their purpose and calling within education, the College aims to support candidates to reach their God-given potential and fulfill their passion in education by helping them lead with a keen focus on addressing the world's deep needs.

### Serving

We believe in the spirit of servant leadership and are committed to serving all candidates to enable them to become global contributors who change their communities and the world. As faculty, staff, and candidates, we believe in serving educational communities with an innovative and adaptive spirit and a strong dedication to professional conduct and ethics, respect for the diversity of others, and excellence for all.

## College of Education Promise

Grand Canyon University College of Education's programs are designed to prepare and equip students for a career in the field of education. However, the College of Education's faculty, staff, and college leaders understand the unique opportunities and challenges a career in education might occasionally present. Since 1984, we have upheld the promise to assist COE graduates who need support in an educational setting. The need for assistance may be requested by the Grand Canyon University graduate, the principal, or superintendent. The appropriate assistance will be determined by the College of Education and can range from content-area teaching materials, certification testing resources, course curriculum assistance, or faculty mentoring.

## College Features

The College of Education provides learners with special program features. Practical classroom experience begins as early as the freshman year with a minimum of 100+ hours in the elementary and/or secondary classroom prior to student teaching. Student teaching is offered in semester-long courses.

The Faculty has significant experience in the K-12 school system and many adjunct faculty hold concurrent employment in the classroom and administrative positions.

The courses in education are planned to provide curricula for licensure and continuing professional education of elementary teachers, secondary teachers, special education teachers, and principals. The learner is strongly advised to contact the College of Education and/or the Arizona State Department of Education regarding licensure information. The Grand Canyon University College of Education is approved by the [Arizona State Board of Education](#) to offer initial programs leading to initial teacher licensure of elementary, secondary, and special education teachers, and an advanced program for principal licensure. The Arizona state-approved programs lead to licensure in Arizona. College of Education learners are responsible for contacting their state Department of Education or Licensing Department for licensure requirements and program approval.

---

<sup>^</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

## Benchmarks

Based upon requirements established by the Arizona State Board of Education, all teacher candidates, (i.e., COE learners who are in teacher-education programs), will have to demonstrate competency with essential knowledge, skills, and dispositions that are based upon the Interstate Teacher Assessment and Support Consortium (InTASC). Consequently, certain critical assignments in each course will be developed as benchmarks that serve as check points of learner competencies. Some of the benchmarks will be practicum-based, and others will not. Benchmark rubrics inform learners and instructors of the pre-established levels of competency performance for benchmark assignments.

## Endorsements

Grand Canyon University does not issue endorsements.

Several different types of endorsements are made available through the various State Departments of Education. Learners should contact their respective state agency to determine the range and requirements of endorsements that are offered.

The College of Education offers the following courses for teacher candidates to obtain a full Arizona SEI Endorsement:

- ESL-223N - SEI English Language Teaching: Foundations and Methodologies
- ESL-433N - Advanced Methodologies and Assessments of Structured English Immersion

The College of Education offers the following courses for practicing teachers to obtain a full Arizona SEI Endorsement:

- ESL-523 - English Language Teaching Foundations & Methodologies
- ESL-533 - Advanced Methodologies of SEI

## Undergraduate Programs

Learners are given the choice of undergraduate study in the areas of early childhood education, elementary education, and secondary education with an emphasis in an academic content area, and elementary/special education. The Arizona state-approved programs lead to initial teacher licensure in Arizona. College of Education learners are responsible for contacting their state Department of Education or Licensing Department for licensure requirements and program approval.

The programs are designed to enable learners to demonstrate competency in essential pedagogical and content knowledge, skills, and dispositions that are based upon the Interstate Teacher Assessment and Support Consortium (InTASC) principles and/or the standards of specialized professional associations, depending on the program.

Eligibility for initial educator certification in Washington is based on completion of a state-approved educator preparation program. This program is approved in Arizona. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to <http://pathway.pesb.wa.gov/outofstate> for more information. Teachers are advised to contact their individual school districts as to whether this program may qualify for teacher advancement.

## Bachelor of Science in Early Childhood Education (IP/TL)

### (Initial Program–Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Early Childhood Education program is designed for students seeking initial licensure in the field of early childhood education. The format and courses of this regionally accredited program include instructional strategies, Montessori and other teaching methodologies, assessment techniques, theories of early childhood growth and development, and the effect of family and cultural diversity on early childhood. Courses are taught by experts in their respective fields who share knowledge and experience in areas of early childhood education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the National Association for the Education of Young Children (NAEYC). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in early childhood field experiences that guide students through 130 hours of observational and practice-based experiences. Teacher candidates also complete a 16-week student teaching experience that includes eight weeks in a Birth – Pre-K classroom and eight weeks in a K-3 classroom. Graduates of this program are eligible for an early childhood teaching credential in the state of Arizona.

### Degree Requirements

## Bachelor of Science in Early Childhood Education and Early Childhood Special Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

The Bachelor of Science in Early Childhood/Early Childhood Special Education dual licensure program is a degree for candidates seeking to build skills and knowledge of pedagogy and methodologies in the field of early childhood/early childhood special education development and teaching. The curriculum includes: early childhood development in the cognitive, physical, linguistic, and social/emotional domains; early language and literacy development, interventions and support, including strategies for behavioral interventions; assessment, evaluation and reporting progress; and child, family, and community collaboration and advocacy to promote the education of young children with and without exceptionalities. All courses are directly aligned with specialized professional teacher preparation standards : Interstate Teacher Assessment and Support Consortium (InTASC) principles, International Society for Technology in Education Standards for Teachers (ISTE-E), National Association for the Education of Young Children Standards for Initial and Advanced Early Childhood Preparation Programs (NAEYC), and the Council for Exceptional Children Initial Practice Based Standards Early Interventionists/Early Childhood Special Education (EI/ECSE) . This regionally accredited and Arizona Department of Education approved degree program includes field experiences in special education, inclusive, and general education Birth – Grade 3 classrooms. Teacher candidates also complete a 15-week student teaching experience in an inclusive environment with children Birth to Grade 3. Graduates of this program are eligible for early childhood and early childhood special education teaching certification in Arizona.

## Bachelor of Science in Educational Studies (IP/Non-TL)

### (Initial Program-Does Not Lead to Initial Teacher Licensure)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those who already licensed as teachers.*

Grand Canyon University's Bachelor of Science in Educational Studies develops students for educational opportunities outside of the traditional classroom. An educational studies degree provides foundational skills that focus on developing and applying fundamental pedagogical practices to a variety of settings. The bachelor's degree in educational studies also includes study of educational psychology, literacy, diversity, instructional technology, communications and classroom management. Teaching skills are a cornerstone for a variety of career opportunities. Traditionally, students graduating with an educational studies degree have been interested in education-related jobs that do not require traditional teacher certifications, including parks and recreation, non-profits, workplace training and community programs. After understanding the fundamentals of teaching and learning, students develop skills to effectively teach and train in diverse learning environments.

## Bachelor of Science in Elementary Education and Special Education (IP/TL)

### (Initial Program-Leads to Initial Teacher Licensure)

This program is designed for students who seek an elementary or cross-categorical teaching license to teach children with special needs in the elementary classroom setting. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, Association for Childhood International standards, and/or Council for Exceptional Children standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through observational and practice-based experiences. Teacher candidates must have access to an elementary and elementary-special education classroom to complete the program assignments. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate the students' various learning, behavioral, and social needs. Teacher candidates must be prepared to complete a full-time, 16-week student teaching component at the end of the program. Eight weeks of student teaching are completed in a regular education setting. In addition, eight weeks are completed in an inclusion classroom, resource room, self-contained class, or in a special school, serving students with mild to moderate disabilities and must be completed with a certified special educator. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Furthermore, applicants should consult the University Policy Handbook and a Student Services Counselor to obtain information regarding current policies and procedures inherent in a teacher licensure program.

## Bachelor of Science in Elementary Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Elementary Education program is designed for students seeking initial licensure and preparing for a career as an elementary teacher. The format and courses of this regionally accredited and Arizona State Board of Education approved program include studies and practices in lesson planning and assessments, classroom management, social justice, family and cultural diversity, English as a Second Language, and instructional methods and strategies for a variety of content areas. Courses are taught by experts in their respective fields who share knowledge and experience in areas of elementary education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC), the Association for Childhood Education International (ACEI), and the International Society for Technology in Education (ISTE).

Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in elementary education field experiences that guide students through 120 hours of observational and practice-based experiences. Teacher candidates also complete a 15-week student teaching experience. Graduates of this program are eligible for an elementary education teaching credential in the state of Arizona.

#### Bachelor of Science in Elementary Education with an Emphasis in English as a Second Language (IP/TL)

##### (Initial Program—Leads to Initial Teacher Licensure)

This program is designed for students who seek an elementary teaching license to teach children who are English Learners in an elementary classroom setting. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of linguistics, second language acquisition, and curriculum development. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, and Teachers of English to Speakers of Other Languages (TESOL) standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through 160 hours of observational and practice-based experiences. Teacher candidates must have access to an elementary and an ESL classroom to complete the program assignments. Graduates of the program qualify for the English as a Second Language (ESL) endorsement in the state of Arizona, as well as their Elementary Teacher license. Teacher candidates must be prepared to complete a full-time, 15-week student teaching component at the end of the program. The 15-week student teaching will be completed in a grades 1-8 ESL classroom and must be completed with a certified ESL teacher. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Furthermore, applicants should consult the University Policy Handbook and a Student Services Counselor to obtain information regarding current policies and procedures inherent in a teacher licensure program.

## Bachelor of Science in Elementary Education with an Emphasis in STEM (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Elementary Education with an Emphasis in STEM program is designed for students seeking initial licensure and preparing for a career as a K-8 elementary teacher who is also seeking a special focus on STEM education. The format and courses of this program include studies and practices in lesson planning and assessments, classroom management, family and cultural diversity, English as a Second Language, and instructional methods and strategies for a variety of content areas. This program emphasizes content knowledge to meet the needs of 21st century learners by specializing in STEM. Courses are taught by experts in their respective fields who share knowledge and experience in areas of elementary education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society for Technology in Education (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in elementary education field experiences that guide students through 120 hours of observational and practice-based experiences. Teacher candidates also complete a full-time, 15-week student teaching component at the end of the program. ## Bachelor of Science in Elementary Education with an Emphasis in Teaching Reading (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Elementary Education with an Emphasis in Teaching Reading program is designed for students seeking initial teacher licensure and are preparing for a career as an elementary teacher. The format and courses of this regionally accredited and Arizona State Board of Education approved program include studies and practices in lesson planning and assessments, classroom management, social justice, family and cultural diversity, English as a Second Language, reading instruction and assessment and instructional methods and strategies for a variety of content areas crossing the span of Kindergarten through Grade 8. Courses are taught by experts in their respective fields who share knowledge and experience in areas of elementary education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC), the Association for Childhood Education International (ACEI), and the International Society for Technology in Education (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly supporting reading during elementary education field experiences that guide teacher candidates through 120 hours of observational and practice-based experiences. Teacher candidates will be exposed to elementary learning environment practicums completed in a 15-week student teaching experience. Graduates

of this program are eligible for an elementary education teaching credential in the state of Arizona.

## Graduate Programs

Learners are given the choice of graduate study for a Master of Education in the areas of elementary education, secondary education, early childhood education, special education, and educational administration. The Arizona state approved programs lead to initial teacher licensure in Arizona. College of Education learners are responsible for contacting their state Department of Education or Licensing Department for licensure requirements and program approval.

Master of Education (IP/Non-TL) programs are available in the areas of elementary education, secondary education, early childhood education, and special education. Master of Education (AP/CPE) programs are available in the following areas: special education for certified special educators; curriculum and instruction: reading/elementary or secondary; curriculum and instruction: technology; educational leadership; and teachers of English to speakers of other languages (TESOL). A Master of Arts in Teaching (AP/CPE) with an emphasis either in professional learning communities or teacher leadership is available as well. These programs do not lead to licensure.

The graduate program framework provides for the professional growth of the practitioner and permits demonstration of competency in essential pedagogical knowledge, skills, and dispositions that are based upon Interstate Teacher Assessment and Support Consortium (InTASC) principles, Interstate School Leaders Licensure Consortium/Educational Leadership Constituent Council (ISLLC/ELCC) standards, and/or the standards of specialized professional associations, depending on the program. The framework is a cyclical process of inquiry, reflection, application, evaluation, and additional reflection. These elements are incorporated into activities and assessments in each course of a program through a combination of collaborative and individual work. Graduate programs in education are provided in two learning formats; both online and traditional campus courses are available to the learner.

Eligibility for initial educator certification in Washington is based on completion of a state-approved educator preparation program. This program is approved in Arizona. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to <http://pathway.pesb.wa.gov/outofstate> for more information. Teachers are advised to contact their individual school districts as to whether this program may qualify for teacher advancement.

The following programs are not intended to lead to teacher certification. Teachers in Washington are advised to contact their individual school districts as to whether this program may qualify for salary advancement. Programs: Master of Education in Early Childhood Education (IP/Non-TL); Master of Education in Educational Leadership (AP/CPE); Master of Education in Elementary Education (IP/Non-TL); Master of Education in Secondary Education (IP/Non-TL); Master of Education in Special Education (IP/Non-TL); and Master of Education in Teaching English to Speakers of Other Languages (AP/CPE).

## Master of Arts in Autism Spectrum Disorders (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

During the program of study, professional educators survey the unique characteristics of students with autism spectrum disorders (ASD) and the core challenges associated with language and communication, social skills, behavior, and processing. From this foundational knowledge, educators design and implement program planning and service delivery. As a result, educators demonstrate knowledge, skills, and abilities in implementing evidence-based and multi-faceted methodologies and strategies necessary in teaching and engaging students with ASD. In addition, educators collaborate as a member of a multi-disciplinary team with service providers and effectively interact with families.

## Master of Arts in Curriculum and Instruction (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Arts in Curriculum and Instruction program is designed for educators who seek to further develop the strategies and skills needed to be curriculum designers or instructional leaders in a variety of professional settings. The program of study includes coursework, research, and practical field experiences that provide graduates with a scholar/practitioner approach to curriculum development, professional development, and assessment of learning. Graduates from the Master of Arts in Curriculum and Instruction program are prepared to research,

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

develop, and implement standards-based curriculum to increase student academic achievement. Coursework and field experiences are prepared for individuals who are already licensed as teachers and/or who have at least one year of teaching or related experience. Program applicants must submit a copy of a current teaching license or provide evidence of a minimum of one year of verified, full-time experience in curriculum or instruction. This curriculum and instruction program does not lead to licensure. The assignments within each course will guide students through 60 hours of observational and practice-based experiences. Candidates must have access to a classroom under the supervision of a certified teacher to complete the field experience and capstone course.

#### Master of Arts in Higher Education Student Affairs

The Master of Arts in Higher Education Student Affairs prepares professionals for a career in student affairs administration at higher education institutions. Graduates of this program will understand how student affairs administrators directly contribute to the social development, academic success, and overall well-being of students. Coursework includes foundational knowledge in student development theory and the history of Student Affairs while introducing topics relevant to the major service areas within student affairs. Areas of focus include operations management, campus community, health and safety, crisis management, spiritual life, housing, legal aspects of student affairs, and campus partnerships.

#### Master of Arts in Reading Education K-12 (AP/CPE)

##### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Arts in Reading Education K-12 degree is designed for current teaching professionals who would like to become reading specialists or interventionists to increase the educational success of K-12 students. Candidates focus on working with students to develop their reading abilities through a process of screening, intervening, remediating, and monitoring the progress of reading skills. Applicants to this program are required to submit a copy of a current teaching license or provide evidence of a minimum of one year of teaching experience. The format and courses of this regionally accredited program are

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

aligned to the International Literacy Association (ILA) and the Interstate Teacher Assessment and Support Consortium (InTASC) standards. Courses are taught by experts in their respective fields who share knowledge and experience in the areas of curriculum and instruction, cognition, emergent literature, linguistics, phonics, and developmental and corrective reading processes. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through observational and practice-based experiences. Students must have access to K-12 classrooms to complete the practicum courses and program assignments.

### Master of Arts in Reading Education K-12 Effective April 2026 (AP/CPE)

#### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Arts in Reading Education (K-12) program is designed for current teaching professionals aiming to enhance the educational success of K-12 students through reading or literacy development and instruction. The program emphasizes collaboration and supervision, integrating the principles of the Science of Reading. Candidates focus on boosting students' reading abilities through a comprehensive process of screening, intervention, remediation, and progress monitoring. Collaboration among educators is encouraged to enhance these instructional approaches. Applicants must submit a copy of a current teaching license or demonstrate at least one year of teaching experience. The curriculum and courses of this regionally accredited program comply with the standards set by the International Literacy Association (ILA), the Interstate Teacher Assessment and Support Consortium (InTASC), and the Association for Advancing Quality in Educator Preparation (AAQEP). Taught by domain experts, the courses cover curriculum and instruction, cognition, emergent literacy, linguistics, phonics, and both developmental and corrective reading processes, all within the framework of the Science of Reading. The program offers

opportunities to apply concepts, theories, and research, with assignments that guide students through observational and practice-based experiences. Students must have access to K-12 classrooms for completing practicum courses and program assignments, ensuring a practical, supervised learning environment.

## Master of Arts in Teaching English to Speakers of Other Languages (TESOL) (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Arts in Teaching English to Speakers of Other Languages (TESOL) is designed for teaching professionals with an interest in working with English language learners (ELLs) in or out of the classroom. The format and courses of this regionally accredited program are tailored to meet the needs of the adult learner and to maximize strengths that the working educator possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of linguistics, second language acquisition, and curriculum development. All courses are directly aligned with the Interstate Teacher Assessment and Support Consortium (InTASC) and the Standards for the Recognition of Initial TESOL Programs in P-12 ESL Teacher Education (TESOL). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in TESOL field experiences and a practicum that guide students through 110 hours of observational and practice-based experiences. Candidates must have access to a P-12 classroom with ESL students to complete the practicum course and program assignments. Graduates of the program may be eligible for the ESL and/or the BLE endorsement in the state of Arizona, and are prepared to become leaders in ESL/BLE/TESOL at the P-12 classroom, school, and district level.

## Master of Education in Early Childhood Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Early Childhood Education program is designed for students seeking initial licensure in the field of early childhood education. The format and courses of this program include developmentally appropriate instructional strategies, child-centered and other teaching methodologies, assessment and data literacy, theories of early childhood growth and development, and the effect of family and cultural diversity on early childhood. Courses are taught by experts in their respective fields who share knowledge and experience in areas of early childhood education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the National Association for the Education of Young Children (NAEYC). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in early childhood field experiences that guide students through 130 hours of observational and practice-based experiences. Teacher candidates also complete a birth to preschool practicum and a 15-week student teaching experience in a K-3 classroom. Graduates of this program are eligible for an early childhood teaching credential in the state of Arizona.

## Master of Education in Early Childhood Education (IP/Non-TL)

### (Initial Program—Does Not Lead to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Early Childhood Education NITL program is designed for students seeking information in the field of early childhood education. The format and courses of this regionally accredited program include instructional strategies, Montessori and other teaching methodologies, assessment techniques, theories of early childhood growth and development, and the effect of family and cultural diversity on early childhood. Courses are taught by experts in their respective fields who share knowledge and experience in areas of early childhood education, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the National Association for the Education of Young Children (NAEYC). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in early childhood field experiences that guide students through 118 hours of observational and practice-based experiences (36 credits). This program does not lead to licensure.

## Master of Education in Early Childhood Education and Early Childhood Special Education (IP/TL)

### (Initial Program—Leads to Teacher Licensure)

Grand Canyon University's Master of Education in Early Childhood and Early Childhood Special Education dual licensure program is a degree for candidates seeking to build skills and apply best-practice pedagogy and methodologies in the field of early childhood education and early childhood special education development. Graduates of this master's program are prepared to become informed educators in public and private schools and other settings requiring a teaching license. The curriculum includes early childhood development in the cognitive, physical, linguistic, and social/emotional domains, including strategies for behavioral interventions; early language and literacy development, interventions and support; assessment, evaluation and reporting progress; and child, family, and community collaboration and advocacy to promote the education of young children with and without exceptionalities. All courses are directly aligned with specialized professional teacher preparation standards: Interstate Teacher Assessment and Support Consortium (InTASC) principles, International Society for Technology in Education Standards for Educators (ISTE-E), National Association for the Education of Young Children Standards for Initial and Advanced Early Childhood Preparation Programs (NAEYC), and the Council for Exceptional Children Initial Practice-Based Standards Early Interventionists/Early Childhood Special Education (EI/ECSE). This degree program includes field experiences in special education, inclusive, and general education birth through Grade 3 classrooms. Teacher candidates also complete a 16-week student teaching experience that includes eight weeks in a K-3 general education classroom, and eight weeks in a Birth-3 special education classroom. Graduates of this program are eligible for early childhood and early childhood special education teaching certification in Arizona.

### Master of Education in Educational Administration (AP/PL)

#### (Advanced Program for Principal Licensure)

This program is designed for individuals interested in educational administration in the PK-12 setting and seeking a K-12 principal's license. Applicants for this program are required to provide documentation of two years of verified teaching experience. The Interstate School Leaders Licensure Consortium (ISLLC) and the Educational Leadership Constituent Council (ELCC) standards form the foundation of this regionally accredited and Arizona-approved program of study. Courses are taught by expert practitioners in their respective fields who share knowledge and experience in areas of school leadership, administrative/leadership foundations, creating/sustaining positive school cultures, PK-12 legal issues, public school finance, curriculum development, professional development/empowerment of teachers, and instructional leadership. As an opportunity to apply theory to practice, practicum/field experience hours are embedded throughout the program. The Action Planning process frames these experiences. Field work within each course guides Principal Candidates through observation, practice, and hands-on leadership experiences. Principal Candidates must be prepared to complete three clinical internships for a total of 270 hours. Graduates of the program are well-prepared to be informed educational administrators in public and private schools, and other settings requiring a principal's license.

### Master of Education in Educational Administration with and Emphasis in Christian Education (AP/PL)

#### (Advanced Program for Principal Licensure)

The Master of Education in Educational Administration, with an Emphasis in Christian Education, licensure program is designed for teachers or administrators interested in advancing their careers as Christian educational leaders in the PK-12 setting. The program is designed with the Association of Christian Schools International (ACSI) accreditation guidelines in mind and allows for students to be ACSI eligible. Applicants for this program are required to provide documentation of two years of verified teaching experience. Course topics include Christian leadership, curriculum theory and development, assessment data and analysis, crisis and change, school law, finance, management, and character development focusing on human flourishing within multiple school settings including the Christian school environment. Graduates would be well-suited to establish an ethos around character education in their schools. In addition,

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

candidates must be prepared to complete three clinical internships for a minimum of 300 hours in an approved PK-12 school setting. This program prepares candidates for educational administration in multiple school settings including Christian schools that require state licensure or certification.

#### Degree Requirements

|                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                       |            |

## Master of Education in Educational Administration with an Emphasis in School Business and Finance (AP/PL)

#### (Advanced Program for Principal Licensure)

The Master of Education in Educational Administration with an Emphasis in School Business and Finance program is designed for individuals interested in educational administration in the PK12 setting and seeking a principal's license with a focus on school business and finance. Applicants for this program are required to provide documentation of two years of verified teaching experience. The National Educational Leadership Preparation (NELP) standards and the Professional Standards for Educational Leaders (PSEL) form the foundation of this regionally accredited and Arizona-approved program of study. Courses are taught by expert practitioners in their respective fields who share knowledge and experience in areas of school leadership, administrative foundations, creating and sustaining positive school cultures, PK12 legal issues, finance, curriculum development, professional development and empowerment of teachers, and instructional leadership. Mission driven ventures are explored to ensure both communities and the greater good of society are served. Graduates would be well-suited to establish an ethos around character education in their schools. Principal candidates must be prepared to complete three clinical internships for a minimum of 300 hours. Graduates of the program are well prepared to be informed educational administrators in public and private schools, and other settings requiring a principal's license.

## Master of Education in Educational Leadership (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Education in Educational Leadership (APCPE) program is designed for individuals interested in educational leadership or administration in the PK-12 and social services settings for children, but who must postpone a school site-based administrative internship or do not choose to seek a K-12 principal's license. The National Education Leadership Preparation Program Recognition Standards (NELP) and the Professional Standards for Educational Leaders (PSEL) standards form the foundation of this program of study. Courses are taught by expert practitioners in their respective fields who share knowledge and experience in the areas of school and business leadership, administrative foundations, organizational theory and culture, PK-12 legal issues, public school finance, curriculum development, and instructional and team leadership. The program includes an action research project culminating in a capstone with a 30 hour practicum requirement. Graduates of the program are prepared to become educational leaders at home, church, or private schools, or other settings not requiring a principal's license. To be admitted into this program, two years of teaching experience is strongly recommended. Students who complete this program and then desire to secure a principal's license will be required to complete the requirements of the Master of Education in Educational Administration program.

## Master of Education in Educational Leadership with an Emphasis in K12 Christian Education (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Education in Educational Leadership with an Emphasis in K12 Christian Education, non-licensure program is designed for teachers or administrators interested in advancing their careers as Christian educational leaders in a PK-12 setting. The program is designed with Association of Christian Schools International (ACSI) accreditation guidelines in mind and allows for students to be ACSI eligible. Course topics include Christian leadership, curriculum theory and development, assessment data and analysis, crisis and change, school law, finance, management, and character development focusing on human flourishing within multiple school settings including the Christian school environment. The program includes an action research project culminating in a capstone with a 30 hour practicum requirement. Graduates would be well-suited to establish an ethos around character education in their schools. This program prepares candidates for educational leadership in multiple school settings including Christian schools that do not require state licensure or certification.

## Master of Education in Elementary Education (IP/TL)

### (Initial Program-Leads to Initial Teacher Licensure)

The Master of Education in Elementary Education (Eligible for Institutional Recommendation/Credential) program is designed for individuals interested in the education of children in elementary and/or middle school who are seeking initial teacher licensure. Course topics include developmental psychology, assessment, managing learning environments, literacy concepts, and instructional planning and strategies that support diverse learning needs including dyslexia. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society for Technology in Education (ISTE). Graduates of the Master of Education in Elementary Education program are prepared to become informed educators in public and private schools and other settings requiring a teaching license. Opportunities are provided to apply concepts, theories, and research throughout the program, particularly in elementary education field experiences that guide students through 104 hours of observational and practice-based experiences. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult student and to maximize the content knowledge the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of elementary education, and educational psychology.

## Master of Education in Elementary Education (IP/Non-TL)

### (Initial Program-Does Not Lead to Teacher Licensure)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The program is designed for any individual interested in the education of children in elementary or middle school. The format and courses of this regionally accredited program are tailored to meet the needs of the adult learner and to maximize the content knowledge that teacher candidates possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of educational psychology, philosophy, methodology, and curriculum development. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within many of the courses guide students through more than 100 hours of observational and practice-based experiences. Students have the option of transferring into the version of the program that leads to initial teacher licensure up to, but not after, the time of degree posting. Graduates of the program are prepared to become informed educators in the home, church, private schools, and other settings not requiring a teaching license. This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.

## Master of Education in Elementary Education and Special Education (IP/TL) vb21

### (Initial Program—Leads to Teacher Licensure)

This program is designed for students who are seeking dual certification in elementary education (K-8) and mild to moderate education (K-12). The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, Association for Childhood International standards, and/or Council for Exceptional Children standards. Opportunities are provided to apply concepts, theories, and research throughout the program with focused experiences that guide students through 113 hours of observational and practice-based experiences in both K-8 elementary settings, as well as K-12 special education mild to moderate settings. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate the students' various learning, behavioral, and social needs. Teacher candidates must be prepared to complete a full-time, 16-week student teaching component at the end of the program. Eight weeks of student teaching are completed in a K-8 general education setting, and 8 weeks are completed in a K-12 mild to moderate setting for students with disabilities. Student teaching settings must be completed with a certified elementary education teacher for the first eight weeks, and a certified special education teacher for the last eight weeks. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Teacher candidates should consult the Grand Canyon University Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a teacher licensure program. Graduates of this program are eligible for the Moderate to Severe Disabilities Special Education, K-12 Certificate and the Elementary Education, K-8 Certificate in the state of Arizona.

Courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, Association for Childhood International standards, and Council for Exceptional Children standards. Opportunities are

provided to apply concepts, theories, and research throughout the program with focused experiences that guide students through 113 hours of observational and practice-based experiences in both K-8 elementary settings, as well as K-12 special education mild to moderate settings. Graduates of the program are prepared to work with all students in these settings and to implement individualized educational plans to accommodate various learning, behavioral, and social needs. Graduates of this program are prepared to become informed educators in the home, church, private schools, and other settings not requiring a teaching license. This program does not include a student teaching component, and does not therefore lead to licensure.

### Master of Education in Elementary Education and Special Education (IP/Non-TL) vb22

#### (Initial Program—Does Not Lead to Teacher Licensure)

This non-licensure program is designed for candidates interested in the education of children in elementary (K-8) and mild to moderate special education (K-12) settings. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the candidate will possess upon graduation. Courses are taught by

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>£</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

experts in their respective fields who have significant proficiency in the course content. Courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, Council for Exceptional Children (CEC), International Society of Technology Educators (ISTE-E), and Association for Advancing Quality in Educator Preparation (AAQEP) standards. Opportunities are provided to apply concepts, theories, and research throughout the program with focused experiences that guide students through 100 hours of observational and practice-based experiences in both K-8 elementary settings, as well as K-12 special education mild to moderate settings. Graduates of the program are prepared to work with all students in these settings and to implement individualized educational plans to accommodate various learning, behavioral, and social needs. Graduates of this program are prepared to become informed educators in the settings not requiring a teaching license. This program does not include a student teaching component and does not therefore lead to licensure. (45 credits).

## Master of Education in Secondary Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Secondary Education ITL program is designed for candidates interested in the education of children in Grades 6-12 who are seeking initial teaching licensure. The format and courses of this program are tailored to meet the needs of the adult learner, introduce pedagogy, and maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of secondary education and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society of Technology Educators (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in secondary education field experiences that guide students through 100 hours of observational and practice-based experiences. The final semester of this program includes a full-time, 15-week student teaching component. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Teacher candidates are required to produce documentation of successful completion of the content area exam(s) in the intended field in order to student teach. Teacher candidates may be eligible for the secondary education teaching license in the state of Arizona. (41 credits)

## Master of Education in Secondary Education with an Emphasis in Humanities (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Secondary Education with Emphasis in Humanities ITL program is designed for candidates interested in the education of children in the Humanities areas in grades 5-12 who are also seeking initial

teaching licensure. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of secondary education, humanities, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society of Technology Educators (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in secondary education field experiences that guide students through 100 hours of observational and practice-based experiences. The final semester of this program includes a full-time, 15-week student teaching component. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Teacher candidates are required to produce documentation of successful completion of the content area exam(s) in a Humanities field in order to student teach. Teacher candidates who student teach in a middle grades setting may be eligible for the middle grades endorsement, in addition to the Secondary Education teacher license in the state of Arizona.

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Secondary Education with Emphasis in Humanities ITL program is designed

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

for candidates interested in the education of children in the Humanities areas in grades 5-12 who are also seeking initial teaching licensure. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of secondary education, humanities, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society of Technology Educators (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in secondary education field experiences that guide students through 100 hours of observational and practice-based experiences. The final semester of this program includes a full-time, 15-week student teaching component. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval. Teacher candidates are required to produce documentation of successful completion of the content area exam(s) in a Humanities field in order to student teach. Teacher candidates who student teach in a middle grades setting may be eligible for the middle grades endorsement, in addition to the Secondary Education teacher license in the state of Arizona.

## Master of Education in Secondary Education with an Emphasis in Humanities (IP/Non-TL)

### (Initial Program–Does Not Lead to Teacher Licensure)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

Grand Canyon University's Master of Education in Secondary Education with Emphasis in Humanities ITL program is designed for candidates interested in the education of children in the Humanities areas in grades 5-12. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of secondary education, humanities, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society of Technology Educators (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in secondary education field experiences that guide students through 100 hours of observational and practice-based experiences. This program does not lead to licensure.

### Master of Education in Secondary STEM Education (IP/TL) Nevada ARL

#### (Initial Program—Leads to Teacher Licensure)

Grand Canyon University's Master of Education in Secondary STEM Education program is designed for candidates interested in the education of adolescents and young adults in the Science, Technology, Engineering and Mathematics (STEM) areas in grades 6-12 who are also seeking alternative route licensure in the state of Nevada. The format and courses of this regionally accredited and Nevada-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in the areas of secondary education, STEM, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC) and the International Society of Technology Educators (ISTE). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in secondary education field experiences that guide students through 101 hours of observational and practice-based experiences. The final semester of this program includes a

full-time, 15-week student teaching component. Teacher candidates are required to produce documentation of successful completion of required Nevada teaching exams that include content exams in biology, physics, or mathematics in order to progress in this program.

### Master of Education in Special Education (IP/TL)

#### (Initial Program—Leads to Initial Teacher Licensure)

This program is designed for any individual interested in the education of children with mild to moderate special needs in the K-12 setting who also wish to seek initial teaching licensure. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of adult learners and to maximize strengths that teacher candidates already possess. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles and Council for Exceptional Children Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide teacher candidates through observational and practice-based experiences. Teacher candidates must have access to a K-12 special education classroom to complete the program assignments. The classroom setting must have mild to moderate disability categories represented, which may include: emotional disability, learning disability, intellectual disability, physical impairment, and/or health impairment. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate various learning needs. Teacher candidates must be prepared to complete a full-time, 15-week student teaching

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

component at the end of the program that must be completed with a certified special educator. Students/applicants are responsible for contacting their state department of education for licensure requirements and program approval. The student/applicant should consult the Grand Canyon Academic Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in an initial teacher licensure program.

### Master of Education in Special Education (IP/TL) Nevada ARL

#### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Special Education program is designed for those who wish to seek an initial teaching licensure in Mild to Moderate Disabilities Special Education in grades K-12, who are also seeking alternative route licensure in the state of Nevada. The format and courses of this regionally accredited and Nevada-approved program are tailored to meet the needs of the adult learner and to maximize the content knowledge that the candidate already possesses. Courses are taught by experts in their respective fields who share knowledge and experience in the areas of mild to moderate disabilities in special Education, and educational psychology. All courses are directly aligned with standards from the Interstate Teacher Assessment and Support Consortium (InTASC), the Council for Exceptional Children (CEC) Initial Preparation Standards, and the International Society of Technology Educators (ISTE).

Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in special education field experiences that guide students through 97 hours of observational and practice-based experiences. The final semester of this program includes a full-time, 15-week student teaching component. Teacher candidates are required to produce documentation of successful completion of required Nevada teaching exams that include content exams in special education in order to progress in this program.

### Master of Education in Special Education (IP/Non-TL)

#### (Initial Program—Does Not Lead to Teacher Licensure)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

Grand Canyon University's Master of Education in Special Education develops educators for special education opportunities not requiring licensure. This program is designed for any individual interested in the education of children with mild to moderate special needs in grades K-12, who does not seek initial teaching licensure. The format and courses of this regionally

Δ Writing intensive course | ♦ Fulfills General Education requirement | ♯ Honors Major Course | Ω Non-Transferable

accredited program are tailored to meet the needs of adult learners and to maximize strengths that students already possess. Courses are taught by experts in their respective fields who share knowledge and experience in areas of learning disabilities, emotional and behavioral disabilities, and other physical and cognitive impairments. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles and Council for Exceptional Children Standards. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide educators through observational and practice-based experiences. Students must have access to a K-12 special education classroom to complete the program assignments. The classroom setting must have mild to moderate disability categories represented, which may include: autism, traumatic brain injury, emotional disability, learning disability, intellectual disability, physical impairment, and/or other health impairments. Traditionally, students graduating from a special education non licensure program have been interested in education-related jobs that do not require traditional teacher certifications, including parks and recreation, non-profits, workplace training and community programs. Graduates of the program are prepared to work with special needs populations and implement individualized educational plans to accommodate various learning needs. The student/applicant should consult the Grand Canyon Academic Catalog, the University Policy Handbook, and an academic advisor to obtain information regarding current policies and procedures inherent in a non-licensure program.

## Master of Education in Special Education: Moderate to Severe (IP/TL)

### (Initial Program–Leads to Initial Teacher Licensure)

Grand Canyon University's Master of Education in Special Education Moderate to Severe (ITL) program is designed for candidates interested in the teaching of children and young adults with moderate to severe exceptionalities in the K-12 setting who also wish to seek initial teaching licensure. Graduates of the program are prepared to work with K-12 students with moderate to severe exceptionalities and implement individualized educational programs (IEPs) to help these students reach their fullest potential. Courses are taught by experts in their respective fields who share knowledge and experience in areas including intellectual disability, autism, traumatic brain injury, emotional disability, specific learning disability, orthopedic impairments, developmental delay, and other health impairments. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, International Society of Technology Educators (ISTE), Council for Exceptional Children (CEC), and Association for Advancing Quality in Educator Preparation (AAQEP) standards. Teacher candidates study topics such as ethical and legal practices; collaboration with internal and external stakeholders; diagnosis and assessment in special education; characteristics of disabilities and disorders; the implementation of communication and behavior strategies; and the use of assistive technologies for individuals with moderate to severe exceptionalities. Classroom management methods, classroom structures, and educational planning are also explored. Opportunities are provided to apply concepts, theories, and research throughout the program. Field experience assignments within specific courses guide teacher candidates through 100 hours of observational and practice-based experiences. The special education degree program concludes with a full-time, 15-week student teaching component that must be completed with a certified special educator. In order to complete the 100 hours of field experience and student teaching requirement, teacher candidates must have access to K-12 special education settings serving a population of students with moderate to severe exceptionalities. Teacher candidates are responsible for contacting their state department of education for licensure requirements and program approval.

## Master of Education in Special Education: Moderate to Severe (IP/Non-TL)

### (Initial Program—Does Not Lead to Teacher Licensure)

Grand Canyon University's Master of Education in Special Education Moderate to Severe (NITL) program is designed for any individual interested in the education of children and young adults with moderate to severe exceptionalities in the K-12 setting. This program does not lead to teacher licensure. Graduates of the program are prepared to work with K-12 students with moderate to severe exceptionalities and implement individualized educational programs (IEPs) to help these students reach their fullest potential. Courses are taught by experts in their respective fields who share knowledge and experience in areas including intellectual disability, autism, traumatic brain injury, emotional disability, specific learning disability, orthopedic impairments, developmental delay, and other health impairments. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles, International Society of Technology Educators (ISTE), Council for Exceptional Children (CEC), and Association for Advancing Quality in Educator Preparation (AAQEP) standards. The program includes topics such as: ethical and legal practices; collaboration with internal and external stakeholders; diagnosis and assessment in special education; characteristics of disabilities and disorders; the implementation of communication and behavior strategies; and the use of assistive technologies for individuals with moderate to severe exceptionalities. Classroom management methods, classroom structures, and educational planning are also explored. Opportunities are provided to apply concepts, theories, and research throughout the program. Field experience assignments within specific courses guide candidates through 100 hours of observational and practice-based experiences. In order to complete the 100 hours of field experience, candidates must have access to K-12 special education settings serving a population of students with moderate to severe exceptionalities.

## Master of Science in Education Policy (AP/CPE)

The Master of Science in Education Policy is designed for professionals who wish to deepen their understanding of education policies across the entire educational spectrum, from early childhood through higher education. In this program, students engage in rigorous coursework to meticulously research, assess, and formulate education policies. They will build their research skills to analyze both qualitative and quantitative data, enabling them to make evidence-driven policy decisions. Students will learn to identify and address challenges, opportunities, and innovation to improve student outcomes. By analyzing comprehensive data and research findings, students gain insights into the impact of current and proposed policies on various communities. They will also develop skills in proficient communication, persuasive advocacy, and collaborative stakeholder engagement. This program equips students to become adept education policy analysts capable of proposing positive, evidence-driven policy solutions. Courses are taught by experts in the field who share their knowledge and experience in education policy analysis and development.

## Master of Science in Instructional Design (AP/CPE)

The Master of Science in Instructional Design program is designed for professionals who wish to further their skills in instructional design and/or curriculum development, as well as the use of emerging technology for training purposes. In this program, students learn to apply theory, research, analysis, and problem-solving skills to solve a variety of issues related to training, education, and organizational performance. The program helps students build their research skills, so they can collect and analyze appropriate data to make evidence-driven design decisions. Students learn to use learning theories, instructional design models, and design thinking in the analysis, design, development, implementation, and evaluation of instructional interventions. Students also develop the skills necessary to create, assess, and manage training materials using technology and multimedia tools. The combination of these skills will help students to identify learning needs, determine desired outcomes, and create learning interventions within educational institutions and corporate training environments. Learning theory and systematic design approaches are the fundamentals of instructional design that are accomplished in this program. Courses are taught by experts in their respective fields who share knowledge and experience in the areas of curriculum and instructional design. Technology Requirement: Students are responsible for providing their own Adobe Captivate software and a computer that meets the technical requirements to run the software. The version of Adobe Captivate should not be older than the 2019 release. Verify the University Technology Requirements and Programmatic Technology Requirements in the University Policy Handbook available on [www.gcu.edu](http://www.gcu.edu).

## Master of Science in Instructional Technology (AP/CPE)

### (Advanced Program for Continuing Professional Education)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Master of Science in Instructional Technology program is designed for current teaching professionals who have an interest in becoming a technology specialist or coach. The format and courses of this regionally accredited program are aligned with the International Society for Technology in Education (ISTE) Standards for Coaches and the Interstate Teacher Assessment and Support Consortium (InTASC) standards. Courses are taught by experts in their respective fields who share knowledge and experience in the areas of technology-based instructional theories and models, digital literacies and new media, ethical and equitable technology integration, technology for student assessment, multimedia instructional strategies, distance learning, andragogy, and coaching. This program includes field experiences that help develop the students' understanding of the complexity of being a leader in the school setting, classroom technology use and training, development of a vision for technology, and ensuring smooth day-to-day technology integration in teaching. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within each course guide students through 60 hours of observational and practice-based experiences. Candidates must have access to a K-12 school classroom with technology to complete the capstone course and program assignments. Graduates of the program are prepared to become leaders in technology at the K-12 classroom, school, and district levels.

## Graduate Certificate of Completion Canyon L.E.A.P. to Teach, Elementary Education

The Canyon L.E.A.P. to Teach pathway, Elementary Education Graduate Certificate of Completion pathway option is intended for candidates interested in becoming a teacher of record in their elementary classroom by pursuing a non-traditional route to teacher licensure with the support of their school district. The structured pathway prepares teacher candidates for an elementary education certification through an immersive learning experience

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

that includes daytime teaching, LEA provides professional development and mentor support, Grand Canyon University (GCU) College of Education graduate coursework and Grand Canyon Education (GCE) Canyon Professional Development. The post baccalaureate certificate serves as an alternative route for entering the field of education to champion students mental, emotional and social development, as well as to provide students with an academic foundation and passion for learning. Canyon L.E.A.P. to Teach candidates will have the opportunity to complete coursework, LEA provided professional development and Grand Canyon Education professional development with the support of all three stakeholders. Starting with a week-long in person boot camp before the fall semester begins, candidates will continue their development in partnership with GCU, GCE and the LEA through two formal LEA evaluations, two informal GCU observations each semester, and two GCE coaching sessions each semester. During the year, candidates will also complete four online GCU teacher education courses, four in person Saturday workshops, a culminating capstone, and LEA-led professional development and mentoring. This three-pronged approach ensures that the candidates are well-supported in the pathway as they develop their pedagogical skills.

### Graduate Certificate in Instructional Design

The Graduate Certificate in Instructional Design offers specialized training for professionals seeking advanced skills in instructional design. Through a focused curriculum, students gain expertise in applying theoretical frameworks, research methodologies, and emerging technologies to address training, educational, and organizational performance challenges. Emphasizing evidence-driven approaches, the program covers key concepts such as learning theories, instructional design models, and design thinking principles. Participants develop proficiency in utilizing technology and multimedia tools for creating, assessing, and managing training materials. Led by experienced faculty, this certificate program provides practical insights and strategies for crafting impactful learning instructional solutions tailored to diverse educational and corporate training settings.

### Graduate Certificate of Completion in Teaching English to Speakers of Other Languages (TESOL)

*This program does not include a student teaching component, and does not therefore lead to licensure, but may lead to career advancement for those already licensed as teachers.*

The Graduate Certificate of Completion in Teaching English to Speakers of Other Languages (TESOL) is designed for teaching professionals with an interest in working with English language learners (ELLs) in or out of the classroom. The format and courses of this regionally accredited program are tailored to meet the needs of the adult learner and to maximize strengths that the

<sup>^</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

working educator possesses. Courses are taught by experts in their respective fields who share knowledge and experience in areas of linguistics, second language acquisition, and curriculum development. All courses are directly aligned with the Interstate Teacher Assessment and Support Consortium (InTASC) and the Standards for the Recognition of Initial TESOL Programs in P–12 ESL Teacher Education (TESOL). Opportunities are provided to apply concepts, theories, and research throughout the program, but particularly in TESOL field experiences and a practicum that guide students through 40 hours of observational and practice-based experiences. Candidates must have access to a P-12 classroom with ESL students to complete the practicum course and program assignments. Graduates of the program are prepared to become leaders in ESL/BLE/TESOL at the P-12 classroom, school, community college, and district level (18 credits).

# The College of Arts and Media

## College Description

The College of Arts and Media is dedicated to providing its students with the finest training possible in their chosen fields. All disciplines and majors within the College require a thorough and exhaustive study of subject-specific theory and related performance to translate theory into active and exciting participation and presentation. All of the College's faculty are dedicated professionals who are active within their fields and therefore can offer students the unique opportunity of their current professional expertise as well as classroom knowledge.

## College Mission

The College of Arts and Media endeavors to create an environment where students can be challenged to excel throughout all of their class work as well as in their performance opportunities. Faculty members strive to imbue students with the tools to create, analyze, lead, and teach through the eventual mastery of their chosen disciplines.

## College Features

Currently, the College consists of four departments, Dance, Music, Production, and Theatre.

The Department of Dance offers a Bachelor of Arts in Dance and Bachelor of Arts in Dance Education.

The Department of Music features seven degrees, a Bachelor of Arts in Music Education-Choral: Voice, a Bachelor of Arts in Music Education-Choral: Piano, a Bachelor of Arts in Music Education-Instrumental: Brass, Percussion, Woodwind, Strings, a Bachelor of Arts in Music Education-Instrumental: Piano, a Bachelor of Arts in Music with an Emphasis in Piano, a Bachelor of Arts in Music with an Emphasis in Instrumental Music, and a Bachelor of Arts in Music with an Emphasis in Voice. The Department of Music features nine ensembles—Canyon Choral Society, Canyon Chorale, Canyon Singers, Critical Mass, Thundering Heard Pep Band, Thunder Big Band, Symphonic Band, Percussion Ensemble and Woodwind Ensemble.

The Department of Production offers a Bachelor of Arts in Advertising and Public Relations with an Emphasis in Advertising Design, Bachelor of Arts in Digital Design with an Emphasis in either Animation or Web Design, and a Bachelor of Arts in Digital Film with an Emphasis in either Production or Screenwriting.

The Department of Theatre offers a Bachelor of Arts in Theatre and Drama and a Bachelor of Arts in Theatre Education. Both departments have several performing groups. The Department of Theatre presents the Grand Canyon University's Ethington Theatre Series, which is comprised of five productions performing over 30 times annually.

## Department of Dance

Grand Canyon University's Department of Dance is dedicated to the training of dancers, teachers, and choreographers by blending both the theory and the practice of dance performance and its related disciplines.

In addition to regular classroom studies, dance major students will take part in the Ethington Dance Ensemble in numerous capacities, including performance, choreography and technical production, thus allowing them to explore the creative process from rehearsal to live performance. This global approach to

dance education creates a multifaceted graduate who is prepared to succeed in today's marketplace.

### Bachelor of Arts in Dance

The Bachelor of Arts in Dance program is designed to train multi-faceted dance professionals who may succeed in a range of career paths related to dance. Experiences in the program promote creativity and entrepreneurial spirit, blending the theory and practice of dance performance and choreography.

Additionally, coursework in technology, kinesiology, and pedagogy prepares students with practical skills for their chosen profession with interdisciplinary applications in many fields. The mission of the Dance program is to cultivate an understanding of dance and its relationship to culture and human flourishing from a Christian worldview, preparing outstanding artists who can make a difference in the lives of the global community.

## Bachelor of Arts in Dance for Secondary Education (IP-TL)

### (Initial Program - Leads to Initial Teacher Licensure)

The Bachelor of Arts in Dance for Secondary Education is a program designed to prepare and certify candidates for the instruction of Dance Arts in a secondary education environment. All courses are directly aligned with the Interstate Teacher Assessment and Support Consortium (InTASC), National Association of Schools of Dance (NASD), and the International Society of Technology in Education (ISTE-E) standards. The program spans 126 credit hours of instruction and practicum experience resulting in a recommendation for an Arizona initial certificate to work in the State's schools. The relationship between the College of Arts & Media and the College of Education ensures student teachers will receive both content knowledge, and the means to convey that knowledge in their classrooms from faculty in both colleges. Opportunities are provided to apply concepts, theories, and research throughout the program. Assignments within many of the courses guide students through 100 hours of observational and practice-based experiences, and the final semester of the program includes a full-time student teaching component. These educational settings

must be state-certified environments, and mentor teachers must be fully certified. Graduates of this program are prepared to become informed educators in public and private schools and other settings requiring teaching licensure. The program is designed to train dance educators and practitioners by blending the theories and practices of dance and its related fields. In addition to regular classroom studies, Dance for Secondary Education majors are required to participate in the Ethington Dance Ensemble for our bi-annual concert series. Students serve in numerous capacities, including onstage and offstage disciplines, thus allowing them to explore the creative process from rehearsal to live performance. The mission of our Dance for Secondary Education program is to cultivate an understanding of dance and its relationship to culture and human flourishing from a Christian worldview, preparing outstanding teaching artists who can make a difference in the lives of their students.

### Degree Requirements

|                                                         |               |
|---------------------------------------------------------|---------------|
| Total General Education                                 | 34-40 credits |
| Total Dance for Secondary Education Major               | 86 credits    |
| Total Electives                                         | 0-6 credits   |
| <hr/>                                                   |               |

## Department of Music

The Department of Music offers various areas of study for students desiring to pursue music as a profession; provides classes, ensembles, and private music instruction for students majoring in other fields; and contributes to the cultural environment of the University community.

The Department of Music is dedicated to developing the musicianship of each student through excellence in the classroom and all performance facets. Students from the entire University join with music majors in performing in a variety of ensembles and productions throughout the year.

The Music Department exists to provide accessible and affordable quality undergraduate music education to the next generation of musicians and music educators in the context of a Christian liberal arts university.

The music department aspires to provide strong undergraduate academic programs, multiple music performance opportunities, and a welcoming environment where future musicians and music educators are constantly challenged to greater levels of academic and artistic achievement in order to achieve success in their chosen disciplines.

Each of these mission statements are reflected in the Mission-based Bachelor's Competencies. These competencies are critical components embedded into each undergraduate-level, music program.

## Music Education Programs

Grand Canyon University's Bachelor of Arts in Music Education program is designed for students devoted to developing their musical abilities and refining performance skills in order to teach in elementary and secondary schools. The music education curriculum is driven by standards created by the National Association of Schools of Music. Additionally, course topics and objectives have been aligned to the Interstate Teacher Assessment and Support Consortium (InTASC) standards.

In the liberal arts setting, in addition to performance, the Bachelor of Arts in Music Education curriculum provides a balanced program of applied music, theoretical and historical studies, professional education studies, and field work experiences. An emphasis is placed on contemporary music education with training and experiences designed to meet the varying needs of today's schools. Students selecting the music education program will need to determine whether they want to pursue a choral or instrumental emphasis. Private instruction in an applied instrument or voice is also required.

The mission of our music education program is to prepare outstanding educators who can make a difference in the lives of their students. Integral to the music education program at Grand Canyon University is the opportunity for students to perform in public. Choir concerts, voice and piano recitals, as well as smaller vocal ensembles are a staple of the musical landscape at GCU. The music education program, in conjunction with the theatre program, produces the University Theatre series, which presents a series of major productions annually. Auditions for all of the productions are open to the entire student body. Scholarships are available by audition and interview.

The Music Department will assign a variable of 14 ensemble courses total, through placement audition, throughout the entirety of the music program effective Fall 2014. Ensembles can include: MEN-308: Canyon Chorale, MEN-348: Jazz Band, MEN-318: Collaborative Music Ensemble, MEN-312: Opera Workshop, MEN-305: Musical Theatre Workshop, MEN-314: Canyon Singers, MEN-306: Canyon Choral Society, MEN-338: Wind Ensemble, MEN-336: Pep Band, or MEN-334: Percussion Ensemble.

### Bachelor of Arts in Music Education – Choral: Voice (IP/TL)

Grand Canyon University's Bachelor of Arts in Music Education program is designed for students devoted to developing their musical abilities and refining performance skills in order to teach in elementary and secondary schools. The music education curriculum is driven by professional degree standards from the National Association of Schools of Music (NASM). Course topics and objectives are aligned to the Interstate Teacher Assessment and Support Consortium (InTASC) standards. The degree leads to Arizona Initial Teacher Licensure in K-12 Music. In the professional studies setting, the Bachelor of Arts in Music Education curriculum provides a balanced program of applied music, theoretical and historical studies, professional education studies, and field work experiences. An emphasis is placed on 21st century music education best practices, with training and experiences designed to meet the varying needs of today's schools. When selecting the Bachelor of Arts in Music Education degree, students declare an instrumental or choral emphasis on a primary instrument. The mission of our music education program is to cultivate an understanding of music and its relationship to

<sup>Δ</sup> Writing intensive course | ♦ Fulfills General Education requirement | <sup>Δ</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

culture and human flourishing from a Christian worldview, preparing outstanding educators who can make a difference in the lives of their students. Students develop their musical gifts and talents to serve diverse audiences through required participation in a variety of individual and ensemble performances integrated into the GCU community experience. Performance scholarships for program majors and Pep Band members are available by audition and interview ([www.gcu.edu/auditions](http://www.gcu.edu/auditions)).

#### **Bachelor of Arts in Music Education – Instrumental: Brass, Woodwind, Percussion, or Strings (IP/TL)**

Grand Canyon University's Bachelor of Arts in Music Education program is designed for students devoted to developing their musical abilities and refining performance skills in order to teach in elementary and secondary schools. The music education curriculum is driven by professional degree standards from the National Association of Schools of Music (NASM). Course topics and objectives are aligned to the Interstate Teacher Assessment and Support Consortium (InTASC) standards. The degree leads to Arizona Initial Teacher Licensure in K-12 Music. In the professional studies setting, the Bachelor of Arts in Music Education curriculum provides a balanced program of applied music, theoretical and historical studies, professional education studies, and field work experiences. An emphasis is placed on 21st century music education best practices, with training and experiences designed to meet the varying needs of today's schools. When selecting the Bachelor of Arts in Music Education degree, students declare an instrumental or choral emphasis on a primary instrument. The mission of our music education program is to cultivate an understanding of music and its relationship to culture and human flourishing from a Christian worldview, preparing outstanding educators who can make a difference in the lives of their students. Students develop their musical gifts and talents to serve diverse audiences through required participation in a variety of individual and ensemble performances integrated into the GCU community experience. Performance scholarships for program majors and Pep Band members are available by audition and interview ([www.gcu.edu/auditions](http://www.gcu.edu/auditions)).

## Music Programs

The Bachelor of Arts in Music program is designed for serious students who wish to devote themselves to developing musical

skills, understanding composition, and refining their performance skills. The program is a true liberal arts degree, allowing participation in varied performing ensembles and studies while simultaneously preparing students for a variety of careers both within and outside the field.

The Music Department will assign a variable of 16 ensemble courses total, through placement audition, throughout the entirety of the music program effective Fall 2014. Ensembles can include: MEN-308: Canyon Chorale, MEN-348: Jazz Band, MEN-318: Collaborative Music Ensemble, MEN-312: Opera Workshop, MEN-305: Musical Theatre Workshop, MEN-306: Canyon Choral Society, MEN-315: Critical Mass, MEN-338: Wind Ensemble, MEN-336: Pep Band, or MEN-334: Percussion Ensemble.

## Bachelor of Arts in Commercial Music

Grand Canyon University is a premier Christian University, educating people to lead and serve. The Bachelor of Arts in Commercial Music will prepare students to become global citizens, critical thinkers, effective communicators and responsible leaders in the commercial music and entertainment world by providing an academically challenging, values-based curriculum from the context of our Christian heritage.

This program will train learners to perform in music in the 21st century market with focus in popular music performance, music and entertainment business. In this program students will receive training in all aspects of the music industry encompassed in the performance of live music including developing a performing technique through private instruction, foundational knowledge of music, sound reinforcement, recording, video production, social media, and business, taught from a distinctively Christian world view in the context of a solid academic Christian liberal arts education.

## **Bachelor of Arts in Music with an Emphasis in Instrumental Performance**

The Bachelor of Arts in Music program is designed for developing musicians who wish to devote themselves to developing musical skills, understanding composition and refining their performance skills. The program is a Bachelor of Arts professional degree, aligned with the National Association of Schools of Music (NASM) standards. The degree allows participation in varied performing ensembles and studies, while simultaneously preparing students for a variety of careers both within and outside the field. Some students enter this program with aspirations of teaching private lessons or owning their own studio. Others wish to pursue their master's degree so they are able to teach studio lessons or other music courses at the collegiate level. Performance scholarships for program majors and/or Pep Band members are available by audition and interview. Students selecting the Bachelor of Arts in Music program will need to determine whether they want to pursue an instrumental, piano or voice emphasis, and a primary instrument must be declared. Private instruction in an applied instrument or voice is required. Additionally, in order to meet NASM professional degree standards, the sixteen (16) elective credits present within the program must be taken from a specified pool of music-related electives. Adherence to this requirement will be checked by the department at regular intervals as part of normal progression through the degree. Integral to the Bachelor of Arts in Music program at Grand Canyon University is the opportunity for students to perform in public. Ensemble concerts and solo recitals, as well as smaller chamber ensembles, are a staple of the musical landscape at GCU. The music program, in conjunction with the theatre program, produces the University's Ethington Theatre series, which presents a series of major productions annually. Auditions for all productions are open to the entire student body.

### **Degree Requirements**

|                                                                              |               |

## Bachelor of Arts in Music with an Emphasis in Voice Performance

The Bachelor of Arts in Music program is designed for developing musicians who wish to devote themselves to

developing musical skills, understanding composition and refining their performance skills. The program is a Bachelor of Arts professional degree, aligned with the National Association of Schools of Music (NASM) standards. The degree allows participation in varied performing ensembles and studies, while simultaneously preparing students for a variety of careers both within and outside the field. Some students enter this program with aspirations of teaching private lessons or owning their own studio. Others wish to pursue their master's degree so they are able to teach studio lessons or other music courses at the collegiate level. Performance scholarships for program majors and/or Pep Band members are available by audition and interview. Students selecting the Bachelor of Arts in Music program will need to determine whether they want to pursue an instrumental, piano or voice emphasis, and a primary instrument must be declared. Private instruction in an applied instrument or voice is required. Additionally, in order to meet NASM professional degree standards, the sixteen (16) elective credits present within the program must be taken from a specified pool of music-related electives. Adherence to this requirement will be checked by the department at regular intervals as part of normal progression through the degree. Integral to the Bachelor of Arts in Music program at Grand Canyon University is the opportunity for students to perform in public. Ensemble concerts and solo recitals, as well as smaller chamber ensembles, are a staple of the musical landscape at GCU. The music program, in conjunction with the theatre program, produces the University's Ethington Theatre series, which presents a series of major productions annually. Auditions for all productions are open to the entire student body.

### Degree Requirements

|                                                                       |               |
|-----------------------------------------------------------------------|---------------|
| Total General Education                                               | 34-40 credits |
| Total Music with an Emphasis in Voice Performance Major               | 80 credits    |
| Total Electives                                                       | 0-6 credits   |
| Total Bachelor of Arts in Music with an Emphasis in Voice Performance | 120 credits   |

## Department of Production: Advertising and Graphic Design Digital Design and Digital Film

The Department of Production is committed to the development of strong artistic leaders in the fields of Digital Design—Animation/Web Design and Digital Film—Production/Screenwriting.

The Bachelor of Arts in Digital Design prepares graduates for careers in the expanding digital arts and media fields, including social media and the Web, animation, and print design industries. Students learn to plan, analyze, and create visual solutions to communication problems for the global world. The program focuses on the development of creativity, communication, and problem-solving skills that demonstrate critical thinking and ethical leadership.

Each Grand Canyon University Digital Film student receives a strong foundation in narrative storytelling, creativity, technical

skills, film history, and the hands-on experience necessary to design and deliver effective and affecting stories through the medium of digital film. The integration of scriptwriting and production allows Digital Film graduates a unique breadth of experience which will help prepare them to succeed in the ever changing marketplace of filmmaking.

### Bachelor of Arts in Advertising and Graphic Design

The Bachelor of Arts in Advertising and Graphic Design program develops students into creators of innovative advertising solutions utilizing integrated media strategies. The curriculum includes creative thinking, strategic problem solving, collaboration, brand and campaign development, and technology training for multi-platform campaigns. Students choose an emphasis area in Advertising Design, Public Relations, or Advertising Design Management. Students will be creative drivers of the concept and strategy, those who know the ins and outs of bringing ideas from paper to reality. Central to our curriculum are three Studio courses, where students work on active client projects with their peers. Projects grow in complexity, mirroring the progression of job skills in an advertising agency. Students will graduate with portfolios containing a broad variety of projects, exposure to the advertising industry at both the local and national levels, and possessing skills to match current industry job requests for designers, art directors, and creative specialists.

#### Technology Requirements

Students can view the programmatic technology requirements in the University Policy Handbook.

## Bachelor of Arts in Broadcasting

This program focuses on developing skills to create and deliver content for the evolving field of broadcast communication. Learners examine modern and emerging media platforms, mass media theories, storytelling techniques, ethics in broadcasting, as well as technical skills to produce quality content for a comprehensive spectrum of platforms. Students learn how to create compelling stories that reflect integrity, accuracy, and fairness. This program provides students with the skills and experience necessary to become valued members in the news, sports, entertainment, and other mass communication fields.

## Bachelor of Arts in Digital Design with an Emphasis in Animation

The Bachelor of Arts in Digital Design with an Emphasis in Animation program prepares students to work as entry-level designers in a variety of exciting industries that use motion graphics including advertising, marketing, social media, journalism, and corporate communications. Students learn the design process, including concept development, visualization techniques, stylistic trends, composition, typography, color theory, image creation, and static and sequential composition using industry standard motion graphics software. While building all these skills, students create dynamic visual content in every studio course. Motion graphics pervade digital advertisements, social media videos, and brand experiences. The job opportunities for students with these skills span all sectors of the economy and will offer growth opportunities well into the future. This is a 4-year, 120-hour, traditional campus or online liberal arts program. The design education courses fall into three categories: foundational creative and skill development, motion graphics, and portfolio development. A mid-program portfolio focuses on preparing students to pursue internships and the fourth-year portfolio prepares students for employment and continued education. Students are expected to make these

portfolios both industry ready and innovative in nature. Grand Canyon University is committed to teaching students to think critically and creatively about using their skills to improve and enrich society. Throughout the program students develop their communication, creativity, and problem-solving skills, because GCU believes in the development of the whole student. Examples of ethical leadership and the integration of a student's faith with their work are shown through profiles of Christian designers and guest speakers. Students can express their personal faith within design projects, as well as when choosing companies and causes to create content for. GCU is committed to building a creative community that is connected to the local and national design industry. The GCU Design Club (a multifaceted student design organization) and the student chapter of AIGA (Professional Association for Design) both provide opportunities for students to participate in extracurricular design events and career networking. Students are required to have both a personal laptop (meeting program specifications) and a subscription to the Adobe Creative Cloud for the duration of the program. Certain courses may require additional hardware and/or software.

### Technology Requirements

Students who major in the Bachelor of Arts in Digital Design must purchase specific design-related technology, including hardware and software that will be used throughout all of the courses that comprise the Digital Design major.

## Bachelor of Arts in Digital Design with an Emphasis in Web Design

The Bachelor of Arts in Digital Design with an Emphasis in Web Design prepares students to work as entry-level designers in a variety of exciting industries that use screen-based content including advertising, marketing, branding, social media, and corporate communications. Behind every screen today is a digital designer deciding what content goes where, what moves, and how to marry form and function to create an enjoyable brand journey. Students learn the design process, including concept development, visualization techniques, stylistic trends, composition, typography, color theory, user experience and interface concepts, and responsive design. Students will also learn fundamentals of HTML and CSS, content management systems, analytics, and create dynamic visual content in every studio course. The program aims to create adept designers with a set of skills that appeal across all sectors of the economy and will offer growth opportunities well into the future. This is a 4-year, 120-hour, traditional campus or online liberal arts program. The design education courses fall into three categories: foundational creative and skill development, motion graphics, and portfolio development. A mid-program portfolio focuses on preparing students to pursue internships and the fourth-year portfolio prepares students for employment and continued education. Students are expected to make these portfolios both industry ready and innovative in nature. Grand Canyon University is committed to teaching students to think critically and creatively about using their skills to improve and enrich society. Throughout the program students develop their communication, creativity, and problem-solving skills, because GCU believes in the development of the whole student. Examples of ethical leadership and the integration of a student's faith with their work are shown through profiles of Christian designers and guest speakers. Students can express their personal faith within design projects, as well as when choosing companies and causes to create content for. GCU is committed to building a creative community that is connected to the local and national design industry. The GCU Design Club (a multifaceted student design organization) and the student chapter of AIGA (Professional Association for Design) both provide opportunities for students to participate in extracurricular design events and career networking. Students are required to have both a personal laptop (meeting program specifications) and a subscription to the Adobe Creative Cloud for the duration of the program. Certain courses may require additional hardware and/or software.

### Technology Requirements

### Bachelor of Arts in Digital Film with an Emphasis in Production

Grand Canyon University's Bachelor of Arts in Digital Film with an emphasis in Production develops professionals in digital media for film and video. This program cultivates an understanding of film and its relationship to cultures and human flourishing from a Christian worldview. The student's artistic vision is refined through collaboration, storytelling, project management, and hands-on experience while honing technical skills and business acumen. Students will be prepared for entry-level careers in entertainment, marketing, advertising, religious organizations, non-profits, and documentary productions.

### Bachelor of Arts in Digital Film with an Emphasis in Screenwriting

Grand Canyon University's Bachelor of Arts in Digital Film with an emphasis in Screenwriting develops professional writers for film, television, and digital platforms. This program cultivates an understanding of film and its relationship to cultures and human flourishing from a Christian worldview. Through compelling characters, story structure, formatting, narrative storytelling, and professional skills such as pitch presentation and networking, students advance their artistic voice. The program provides students with the skills necessary to create and deliver effective messages to prepare for entry-level careers in entertainment, marketing, advertising, religious organizations, non-profits, and documentary productions.

## Bachelor of Arts in Game Design

As one of the most dynamic fast growing industries in the world, including the vibrant e-sports area, job growth is strong in entertainment, technology, and educational game design arenas. Most businesses are exploring the use of virtual worlds and games for training, sales, and scalability. Millions of young people play games on a daily basis. This is a degree that allows them to channel that passion into a career. We're focused on the student who is most interested in the look and story of games. This is a program designing for the user experience.

## Bachelor of Arts in Music Production

The Bachelor of Arts in Music-Production prepares students for a career producing music in the 21st century with focus in classical and popular music, film, video, and multimedia music industries and their application in the current music and entertainment business and industry. In this program students will receive training in all foundational aspects of music and the creative process as well as developing skills in recording, sound reinforcement, sound editing, music production and postproduction, sound reinforcement, video production, social media, and business, taught from a distinctively Christian world view in the context of a solid academic Christian liberal arts education. Grand Canyon University is a premier Christian University, educating people to lead and serve. The Bachelor of Arts in Music-Production will equip students with knowledge of the Christian worldview through academic excellence, instilling in them a sense of purpose and vocational calling that enables them to be innovative thinkers, effective communicators, global contributors, and transformative leaders who change their communities by placing the interests of others before their own by providing an academically challenging, values-based curriculum that embraces a distinctive Christian worldview.

### Bachelor of Arts in Social Media

The Bachelor of Arts in Digital Social Media prepares students to design, write and produce content for social media campaigns, blogs, websites, email marketing, and other digital media activities. Coursework teaches digital media design through the continuum of production including strategic planning and target audience definition; creation of infographics, photographic and video imagery; and copywriting for short and long digital formats. Students also learn how to design and extend a brand, build social media calendars, drive engagement, utilize effective SEO (Search Engine Optimization) strategies, use industry-standard data reporting tools and evaluate the findings. Graduates of the program will be employed as Social Media Managers, Social Media Producers, Digital Content Creators, Digital Media Managers, and other job titles in the growing world of digital marketing. Advertising agencies, corporations, individuals and businesses in all fields utilize social media to deliver their digital content. GCU graduates will have the practical skills to design and produce digital social media content while supporting the business expectations of the employer.

## Department of Theatre

The Department of Theatre provides the foundation needed to pursue careers in academic, professional, and community theatre. Students receive a comprehensive knowledge of the body of dramatic literature, theatre history, and practical experience in the production and performance of drama.

The Department of Theatre, in conjunction with the Department of Music, produces the Grand Canyon University Theatre Series which presents five major productions annually. Additionally, the department offers a student-directed series of productions that are performed on campus. Auditions for all productions are open to the entire student body.

### Bachelor of Arts in Theatre and Drama

The Bachelor of Arts in Theatre and Drama program provides students the foundation needed to pursue careers in community and professional theatre, the entertainment industry, and/or graduate study. Students are given the opportunity to receive a comprehensive knowledge of theatre history and dramatic literature, as well as practical experience in production and performance. The Theatre program, in conjunction with the Music program, produces the University Theatre series, which presents a series of major productions annually. Auditions for all of the productions are open to the entire student body.

Prospective students may complete an audition for performance scholarship consideration, but it is not required for acceptance into the major.

## Bachelor of Arts in Theatre for Secondary Education (IP-TL)

### (Initial Program - Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Arts in Theatre for Secondary Education (leads to credential) degree program is designed for students interested in teacher certification for the education of children in grades seven through twelve. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Courses are taught by experts in their respective fields who share knowledge and experience in areas of educational psychology, philosophy, methodology, and curriculum development. All courses are directly aligned with the Interstate New Teacher Support and Assessment Consortium (InTASC, April 2011), National Association of Schools of Theatre (NAST-Handbook, 2015-2016), and the International Society of Technology in Education (Standards-T2008) standards. Opportunities are provided to apply concepts, theories, and research throughout the program.

Assignments within many of the courses guide students through over 100 hours of observational and practice-based experiences, and the final semester of the program includes a full-time, 15-week student teaching component. These educational settings must be state certified environments and mentor teachers must be fully certified. Teacher candidates are responsible for contacting their state department of education for certification requirements and program approval. Furthermore, teacher candidates should consult the Grand Canyon University Academic Catalog, the University Policy Handbook, and an academic counselor to obtain information regarding current policies and procedures inherent in a teacher credentialing program. While completing a solid path in theatre content knowledge, learners will complete the methodological courses necessary to become certified secondary educators. All education courses will be offered and designed by the College of Education. Graduates of the Bachelor of Arts in Theatre for Secondary Education program are prepared to become informed educators in public and private schools and other settings requiring a teaching credential. Students and applicants are responsible for contacting their state department of education for certification requirements and program approval. All students entering the program must audition; at which point

scholarships may be awarded. The program is designed to train theatre educators and theatre practitioners by blending both the theory and the practice of theatre education/performance and its related fields. In addition to regular classroom studies, students are encouraged to take part in the Ethington Theatre Series in a variety of capacities, including onstage and offstage disciplines, thus allowing learners to explore the creative process from rehearsal to live performance. This global approach to theatre education training creates a graduate who is multi-faceted and prepared to succeed in today's marketplace.

## Minors

### Minor in Advertising and Graphic Design

Communication using fundamentals of advertising can be used across a variety of disciplines in many settings. The Advertising and Graphic Design minor at Grand Canyon University introduces students to the foundations of design and methods of production. The student is familiarized with a fundamental understanding of advertising principles that have many applications.

|                                         |                                |            |

| Minor in Animation      |                                | 16 credits |

### Minor in Dance

A minor in Dance is designed to develop a student's physical and cognitive skills and knowledge in the art of dance. Dance studies enhance any other area of study by providing opportunities to develop character, leadership skills, cooperation, and respect for others. Dance reflects cultural influences throughout the world and transcends religious barriers in its ability to communicate universal truths, leading to a shared understanding and expression of the human experience.

### Minor in Musical Theatre

The minor in Musical Theatre at Grand Canyon University introduces students to the foundations of musical theater styles and history and advances principles applied to the form through courses in acting, movement, and voice production. The minor in Musical Theatre provides students from all majors the opportunity to focus on effective communication, using the body and the voice, and to develop critical thinking skills, analyzing music, text, and movement from a wide variety of styles and cultures. The minor specifically complements theatre, music, or dance majors in their major program of study with an artistic form that broadens marketability within the industry and promotes self-development, artistic exploration, and creative innovation.

|                                  |                                  |            |

# The College of Humanities and Social Sciences

## College Description

The College of Humanities and Social Sciences (CHSS) is dedicated to providing its learners with rigorous programs and the highest levels of pedagogy. Faculty and staff work to create a Christian-based learning environment focused on expanding students' understanding while preparing them for professional environments. Using practical experiences students learn in-depth knowledge of their fields of study, problem solving skills, rational thinking, leadership, and effective communication. Faculty and staff build meaningful relationships with students through extracurricular communities related to their discipline of study.

## College Mission

In the College of Humanities and Social Sciences, we cultivate in our students a profound sense of purpose rooted in a Christian perspective that prioritizes the intrinsic value and dignity of every individual. Our faculty inspire and enhance the lives of our students through deep learning experiences and meaningful curriculum that provide opportunities for direct application of new skills. By studying both the humanities and social sciences, our learners ultimately embark on a journey that will transform and enrich individual lives and communities so they may flourish.

## Humanities Programs

The Humanities programs are designed to tell the stories, stimulate the ideas, and provide the words that help students make sense of their lives and the world in which they live. The programs introduce students to people and cultures that they have never met or experienced, places they have never seen or visited, and ideas that may have never crossed their minds. Through study of how others have lived and thought about life, students will begin to discern what is important in their own lives and what they might do to make them better, what is right or wrong, and the impact that heritage and history have on their thoughts and experiences. Graduates of the humanities programs will enter the workforce with a solid understanding of themselves and the human conditions. They will have the cultural knowledge and communication skills to address the challenges that we face together in our families, our communities, our nation, and our global society.

### Bachelor of Arts in Communications

Students majoring in communication engage in a thoughtful exploration of how the construction of messages, communicator characteristics, and contextual factors influence professional and personal lives. The Bachelor of Arts in Communication program at GCU provides opportunities for scholarship in organizational, political, mass mediated, interpersonal, and intercultural communication contexts. The organizational emphasis allows students to focus on communication skills directly applicable to public relations, political communication, human resources, sales, and marketing. This program, like the greater GCU community, embodies Christian virtues in the way people communicate with each another. Faculty act as guides, collaborators, and mentors as students find their purpose. Students who earn their degree in communication work in a wide variety of contexts. Students at GCU learn the skills necessary to be competitive in both for profit and nonprofit sectors. Common careers for communication majors with an organizational emphasis are public relations specialists, corporate trainers, campaign managers, community

action directors, account executives, sales representatives, and human resources coordinators.

### Bachelor of Arts in Communications with an Emphasis in Broadcasting and New Media

This program emphasis is for people who are passionate about mass communication and media. Examination of modern communication techniques, learning about theories of mass media, the characteristics and effects of mass communication channels, developing skills to interpret visual and verbal communication in the mainstream and social media, learning about new media tools will prepare students to apply critical thinking when it comes to analyzing different media content. It will also give them practical skills on the job market like being able to create effective press releases, podcast, pitch a news story or recognize the effects of media on consumers.

### Bachelor of Arts in Communications with an Emphasis in Interpersonal Communication and Human Relationships

This program emphasis is for people who are passionate about building healthy relationships and who recognize that the 21st century economy, with all of its technological advancements and innovations, is still grounded in effective relationships and collaboration between people. In this emphasis, students will take a deep dive into interpersonal communication theory and research applied to the 21st century workplace. Students will learn how to leverage interpersonal skills such as social influence, nonverbal effectiveness, advanced speech communication, leadership and group problem solving, and digital literacy to foster the effective and ethical communication that creates successful teams and organizations.

### Bachelor of Arts in English for Secondary Education (IP/TL)

#### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Arts in English for Secondary Education degree program is designed to provide future secondary teachers with skills in comprehending and interpreting texts, thinking critically about texts in a number of media, and effectively expressing their ideas orally and in writing. The format and courses of this regionally accredited and Arizona State Board of Education approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. By studying works of literature in context, focusing on particular authors and genres of literature, and analyzing the English language, students will be introduced to diverse artistic expressions. They will grapple with major issues and themes common to human life. Writing courses within the major will give students further practice in effective communication for a variety of media. Emphasis will be given to examining and implementing methodologies needed to teach writing, texts, and language to adolescents, enabling majors in this area to make informed, context-based decisions about instruction at the middle and secondary levels. All courses are directly aligned with the Interstate Teacher Assessment and Support Consortium (InTASC), National Council of Teachers of English (NCTE), and the International Society of Technology in Education (ISTE) standards. Teacher candidates must have access to a grade 6-12 classroom to complete the program and practicum assignments, which guide them through 100 hours of observational experiences. The final semester of this Secondary Education program includes a full-time, 15-week student teaching component. Candidates are responsible for contacting their state department of education for licensure requirements and program approval.

## Bachelor of Arts in Government with an Emphasis in Legal Studies

The degree in Government with an Emphasis in Legal Studies is designed to provide students with a solid foundation in the skills, knowledge, and ethical leadership to excel in law school. Rooted in the study of politics and policy, the emphasis provides additional interdisciplinary course work in communication, justice studies, philosophy, business, and theology.

\*Program completion does not guarantee acceptance into law school.

## Degree Requirements

## Bachelor of Arts in History for Secondary Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Arts in History for Secondary Education degree program is designed to provide future middle and high school teachers with the content knowledge they need to be successful teachers of history and social studies. While completing a solid path in historical content, learners will complete the methodological courses necessary to become certified secondary educators. All education courses will be designed and offered by the College of Education. The format and courses of this regionally accredited and Arizona State Board of Education approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Teacher candidates will attain an extensive breadth and depth of content knowledge as well as research-based pedagogical practices prior to entering the classroom. This program prepares graduates to use the skills of the historian such as research, critical thinking, and effective communication in their future educational settings. Teacher candidates must have access to a grade 6-12 classroom to complete the program and practicum assignments, which guide them through 85 hours of observational experiences. The final semester of this Secondary Education program includes a full-time, 15-week student teaching component. Candidates are responsible for contacting their state department of education for licensure requirements and program approval

## Bachelor of Arts in History

Grand Canyon University's Bachelor of Arts in History degree program allows students to study the past as a means of understanding the complexity of the world today. Earning a history degree affords graduates essential skills including critical thinking and writing. These proficiencies may prepare graduates for careers in teaching, public service, government, policy making, communication, or business management. A history degree allows students to develop the skills and knowledge associated with a liberal arts degree, while providing an orientation to the complexity and diversity of the world through a disciplined study of the past, necessary to compete in a global economy. This degree program provides graduates with foundational structures that may prepare them for graduate degrees in business, history, or law.

## Bachelor of Science in Fire Science

The Bachelor of Science in Fire Science program provides the requisite skills and knowledge to be successful in the field of Fire Service. This program will also help students develop skills for leadership in ranking positions such as a Firefighter, Captain, or Chief Officer positions. Emphasizing servant leadership, the program will develop one's ability to communicate an organization's mission and vision to diverse audiences and key stakeholders. As part of GCU's Christian learning community, enrollees in the program will develop leadership skills that place special importance on contributing to the greater social good.

## Bachelor of Science in Mathematics for Secondary Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

Grand Canyon University's Bachelor of Science in Mathematics for Secondary Education program is designed to provide future teachers with the content and pedagogical knowledge for success in teaching mathematics. The format and courses of this regionally accredited and Arizona State Board of Education approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. Graduates will be prepared with the critical thinking and general problem-solving skills to tackle difficult problems from any field and to prepare their own students to do the same. With a balanced program of applied and theoretical mathematics and education courses, students complete a solid curriculum of mathematics content while developing the methodological expertise necessary to become effective and skilled secondary educators. Teacher candidates must have access to a grade 6-12 classroom to complete the program and practicum assignments, which guide them through 85 hours of observational experiences. The final semester of this Secondary Education program includes a full-time, 15-week student teaching component. Candidates are responsible for contacting their state department of education for licensure requirements and program approval.

## Master of Arts in Communication with an Emphasis in Education

Grand Canyon University's Master of Arts in Communication with an Emphasis in Education program prepares students for teaching undergraduate courses at the 2-year or 4-year institution in both ground and online modalities. The program balances communication content (e.g., intercultural and relational) with pedagogy to create a unique program that satisfies the requirements for ongoing professional development. Furthermore, graduates of this program will be able to fulfill the graduate course requirements necessary for opportunities in teaching at the postsecondary level.

## Master of Science in Mathematics with an Emphasis in Education

Grand Canyon University's Master of Science in Math with an Emphasis in Education program focuses on deeper understanding of mathematics while instilling the best practices in pedagogy. Redefining the graduate degree for professionals who would like to be the change-makers in higher education, graduates will grasp the conceptual knowledge of mathematics, which will drive their teaching in the classroom. Through a combined program of study offering graduate credits in mathematics and graduate credits in higher education teaching, the program open doors for its graduates and redefines mathematics education at the college level.

## Social and Behavioral Studies Programs

The Social and Behavioral Studies programs prepare students to understand, predict, and treat human behavior at both individual and societal levels. Depending on the program that is chosen, students are able to choose career paths that could involve direct patient care and treatment, justice services, social study, the development of impact initiatives, organizational understanding, human resource management, individual behavioral study and research, or consulting, to name a few. Graduates of the Social and Behavioral Studies programs will develop greater understanding and predictive knowledge of behavior at both the individual and societal levels that will provide significant impact on the overall behavioral health and wellness of society and its members.

### Bachelor of Science in Behavioral Health Science

Grand Canyon University's Bachelor of Science in Behavioral Health Science degree is designed to prepare students to work as behavioral health technicians or specialists in various settings as members of a clinical team. This program offers students an exhaustive study of human behavior. It prepares students to work in behavioral health, counseling, health services management, human services, government, and law enforcement. Additionally, this curriculum offers a strong foundation for students who want to pursue a master's degree in counseling, criminal justice, clinical or forensic psychology, or human services.

## Bachelor of Science in Behavioral Health Science with an Emphasis in Infancy and Early Childhood Studies

Grand Canyon University's Bachelor of Science in Behavioral Health Science with an Emphasis in Infancy and Early Childhood Studies program is designed for students interested in becoming behavioral health technicians or specialists in various settings as members of a clinical team, particularly in the fast-growing specialization in the Infancy and Early Childhood field. The program provides students with an introductory study on the development and behavior of infants and young children. Students will gain the knowledge and skills necessary to work with young children and advocate the importance of the family system and caregiving environment to the well-being of infants and young children. Graduates of this degree program will be prepared for careers in behavioral health, health services management, human services, government, and law enforcement.

### Degree Requirements

|                                                                                            |               |
|--------------------------------------------------------------------------------------------|---------------|
| Total General Education                                                                    | 34-40 credits |
| Total Behavioral Health Science with an Emphasis in Infancy and Early Childhood Studies    | 56 credits    |

## Bachelor of Science in Behavioral Health Science with an Emphasis in Substance Use Disorders

Grand Canyon University's Bachelor of Science in Behavioral Health Science with an Emphasis in Substance Use Disorders program is designed to prepare students to work as behavioral health technicians or specialists in various settings as members of a clinical team. This program offers students an introduction to behavioral health and substance abuse disorders and addiction. It prepares students to work in the fields of behavioral health, counseling, health services management, human services, government, and law enforcement. Additionally, this curriculum offers a strong foundation for students who want to pursue a master's degree in counseling, mental health, criminal justice, clinical or forensic psychology, or human services.

### Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse

The Bachelor of Science in Counseling with an Emphasis in Addiction, Chemical Dependency, and Substance Abuse is designed to meet the needs of learners who wish to pursue entry-level careers as addiction counselors/behavioral health technicians. The demand for addiction counselors is expected to grow in both the public and private sectors in the near future. A bachelor's degree is the first step for individuals seeking certification/licensure in many states. Graduates from this degree program are prepared to meet the minimum academic requirements for licensure in Arizona as Licensed Associate Substance Abuse Counselors and Licensed Substance Abuse Technicians. Additionally, program graduates from many other states will be academically prepared to begin the process of seeking certification and/or licensure in their home states.

Licensing and/or certification requirements may vary from state to state, and it is the student's responsibility to check the requirements in specific states.

### Degree Requirements

|                                                                                                                 |               |

## Bachelor of Science in Law Enforcement Advancement

The Bachelor of Science in Law Enforcement Advancement degree explores all components of the justice system while maintaining an emphasis on advanced leadership models for law enforcement professionals. Emphasizing servant leadership, the program will develop one's ability to communicate their organization's mission and vision to diverse audiences and key stakeholders. As part of GCU's Christian learning community, enrollees in the program will develop leadership skills that place special importance on contributing to the greater social good. By being a part of this unique program, a law enforcement student will explore the fundamentals of how to inspire and lead others through established, modern theories with the ethical principles of servant leadership. Candidates gain self-confidence in their leadership styles as they examine the core principles of communication, team-leading, and ethical practices in law enforcement. In addition, one will examine the function, organization, issues, and practices of law enforcement agencies. Students gain a thorough grounding in constitutional law, statutory law and case law interpretation, as well as 21st-century issues such as strategic policing and cybercrime. The Bachelor of Science in Law Enforcement Advancement degree offers candidates the opportunity to prepare themselves to advance within their organizations, ready to lead their agencies through the challenges of policing diverse communities facing modern policing problems.

## Bachelor of Science in Psychology

Grand Canyon University's Bachelor of Science in Psychology program offers a broad array of courses that increase the understanding of past and present human actions. With this understanding comes the responsibility to improve relationships with others and to help others achieve similar understanding of and insight into their own behaviors. The program helps prepare students for entry-level positions in agencies and organizations that seek to help those in need. It should be understood that the requirements for employment in many positions in the helping professions include advanced education beyond the bachelor's degree.

## Bachelor of Science in Psychology with an Emphasis in Forensic Psychology

Grand Canyon University's Bachelor of Science in Psychology with an emphasis in Forensic psychology degree is designed to supplement the study of psychology, criminology, or other justice-related areas with an overview of the intersection of psychology and the criminal justice system. Forensic psychology is where the science of the mind intersects with the law. The emphasis focuses specifically on the psychological experiences

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

of victims and offenders which sheds insight into behavior that leads to criminality.

#### Degree Requirements

## Master of Education in School Counseling (IL)

### (Initial Program—Leads to Licensure)

Grand Canyon University's Master of Education in School Counseling (IL) program is designed for any individual with a bachelor's degree interested in seeking certification as a school guidance counselor. The format and courses of this regionally accredited and Arizona-approved program are tailored to meet the needs of the adult learner and to maximize strengths that the candidate already possesses. Courses are taught by experts in

their respective fields who share knowledge and experience in child and adolescent development, counseling theory, group counseling, career and college counseling, trauma and psychopathology. Candidates gain knowledge and skills necessary to be effective counseling practitioners in PK-12 settings, working with students, parents, and school personnel to address the academic, social, and emotional needs of students. Graduates of this program are prepared to apply brief counseling, child and adolescent development theories, and research to school practice. This program is informed by the American School Counseling Association (ASCA) National Model. Candidates must have access to pre-approved PK-12 schools to complete program requirements. This program includes 25 field experience hours, 100 practicum hours, and 600 internship hours, for a total of 725 hours.

#### Master of Public Administration with an Emphasis in Health Care Management

Grand Canyon University's Master of Public Administration prepares students for careers in the public sector. The program is targeted at individuals working or desirous of finding employment in all levels of government, health care administration, and other quasi- and/or non-governmental organizations. The coursework gives students the opportunity to apply administrative skills in the areas of leadership, human capital development, policy, and governance within a public sector environment. Students will be challenged to identify and provide solutions for the unique issues facing public sector organizations today. This program offers two emphasis areas from which students can choose: health care management and government and policy.

#### Master of Science in Addiction Counseling

The Master of Science in Addiction Counseling degree is designed to meet the needs of learners who wish to pursue careers as addiction counseling professionals. This degree prepares students to treat substance abuse/dependency disorders.

The demand for licensed addiction counselors is expected to grow in both the public and private sectors in the foreseeable future. A Master's degree is a required step for individuals seeking the highest level of licensing and/or certification in many states. Graduates from the GCU program of study are prepared to meet the academic requirements for licensure in Arizona as a:

- Licensed Associate Substance Abuse Counselor (LASAC)
- Licensed Independent Substance Abuse Counselor (LISAC).

Additionally, program graduates from most other states will be academically prepared to begin the process of seeking certification and/or licensure in their home state. Licensing and/or certification requirements may vary from state-to-state. It is the students' responsibility to check the licensing/certification requirements in their respective states.

### Master of Science in Christian Counseling of Substance Use and Addictive Disorders

The Master of Science in Christian Counseling of Substance Use and Addictive Disorders degree is for learners who wish to pursue careers as addiction counseling professionals, treating individuals with substance abuse/dependency disorders and also able to integrate Christian principles into their counseling practice and to apply that knowledge in a counseling setting. With a master's in addiction counseling, graduates may be prepared to own and operate their own counseling clinic or work in a variety of settings including private practice, substance abuse clinics, group practices, and hospital settings. The demand for licensed addiction counselors is expected to grow in both the public and private sectors in the foreseeable future. A master's degree is a required step for individuals seeking the highest level of licensing and/or certification in many states.

The coursework that prepares students for licensure focuses on a variety of topics, including: theories of addiction, drug classification, assessment, and treatment; professional counseling orientation and ethics; counseling theories; group counseling theory and practice; social and cultural diversity issues in counseling; psychopharmacology theories of drug abuse, addiction, and treatment; psychiatric disorders in combination with an alcohol and/or drug abuse disorder; family issues and addictive disorders; diagnostics, assessment and treatment; and counseling chemically dependent adolescents.

Dispersed throughout the curriculum, the student will also take a number of courses that integrate a Christ-centered approach to emotional health, a foundational study of the integration of counseling theory and Christian thought, and a study of spiritual

formation, thereby providing supplemental study of spiritual growth for the counselor in life and practice.

A pre-practicum or supervised field work experience concludes the program, under the supervision of a faculty member. Following the pre-practicum, students take part in a supervised practicum/internship experience to develop their counseling skills and to perform all the activities that a regularly employed professional counselor would be expected to perform in a supervised setting.

Graduates from the Grand Canyon University Master of Science in Addiction Counseling program are prepared to meet the academic requirements for licensure in Arizona as a Licensed Associate Substance Abuse Counselor (LASAC) OR a Licensed Independent Substance Abuse Counselor (LISAC). Additionally, program graduates from most other states will be academically prepared to begin the process of seeking certification and/or licensure in their home state. Licensing and/or certification requirements may vary from state-to-state. It is the students' responsibility to check the licensing/certification requirements in their respective states.

### Master of Science in Clinical Mental Health Counseling

Grand Canyon University's Master of Science in Clinical Mental Health Counseling program is designed for students interested in becoming professional counselors. The program's courses were

<sup>Δ</sup> Writing intensive course | ♦ Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

chosen to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC), the Certified Clinical Mental Health Counselor credential (CCMHC), and by the Arizona Board of Behavioral Health Examiners. A master's degree in counseling is a required step in all 50 states for individuals seeking to become a licensed counselor. This program of study is designed to meet the academic requirements for licensure in Arizona as a:

- Licensed Associate Counselor (LAC)
- Licensed Professional Counselor (LPC)

Licensing and/or certification requirements may vary from state to state. It is the students' responsibility to check the licensing/certification requirements in their respective state.

## Master of Science in Clinical Mental Health Counseling with an Emphasis in Childhood and Adolescence Disorders

Grand Canyon University's Master of Science in Clinical Mental Health Counseling with an Emphasis in Childhood and Adolescence Disorders program is designed for students interested in becoming professional counselors. The program provides students with the knowledge and skills necessary to identify, assess, and address childhood- and adolescence-related disorders, developmental issues, child-parent-related issues, school and family life, and disorders specified in the DSM. The program's courses were selected to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC), the Certified Clinical Mental Health Counselor credential (CCMHC), and by Arizona Board of Behavioral Health Examiners. Students are provided with comprehensive training to achieve national certification and licensure in Arizona as a licensed counselor. This program of study is designed to meet the academic requirements for licensure in Arizona as a:

- Licensed Associate Counselor (LAC)
  - Licensed Professional Counselor (LPC)
- Licensing and/or certification requirements may vary from state to state. It is the students' responsibility to check the licensing/certification requirements in their respective state.

### Master of Science in Clinical Mental Health Counseling with an Emphasis in Christian Counseling

Grand Canyon University's Master of Science in Clinical Mental Health Counseling with an Emphasis in Christian Counseling program is designed for students interested in becoming professional counselors who are able to integrate Christian principles into their counseling practice and to apply that knowledge in a counseling setting. The program provides students with the knowledge and skills necessary for counseling clients experiencing a variety of psychological, social, behavioral, and emotional issues. This program is designed to prepare students for careers as clinical mental health counselors. Graduates may also be qualified to provide counseling services to clients with substance use issues and marital and family issues. Students will take a number of courses that integrate a Christ-centered approach to emotional health, a foundational study of the integration of counseling theory and Christian thought, and a study of spiritual formation, thereby providing a supplemental study of spiritual growth for the counselor in life and practice. The program's courses were selected to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC), the Certified Clinical Mental Health Counselor credential (CCMHC), and by Arizona Board of Behavioral Health Examiners. A master's degree in counseling is a required step in all 50 states, for individuals seeking to become a licensed counselor. This program of study is designed to meet the academic requirements for licensure in Arizona as a:

Licensed Associate Counselor (LAC) •

Licensed Professional Counselor (LPC) Licensing and/or certification requirements may vary from state to state. It is the students' responsibility to check the licensing/certification requirements in their respective states.

### Master of Science in Clinical Mental Health Counseling with an Emphasis in Marriage and Family Therapy

Grand Canyon University's Master of Science in Clinical Mental Health Counseling with an Emphasis in Marriage and Family Therapy program is designed for students interested in becoming professional counselors. The program provides students with the knowledge and skills necessary to identify, assess, and address marriage- and family-related issues, including, but not limited to, communication issues, parent-child relationship, different family dynamics, and couple's issues. The program's courses were selected to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC), the Certified Clinical Mental Health Counselor credential (CCMHC), and by Arizona Board of Behavioral Health Examiners. Students are provided with comprehensive training to achieve national certification and licensure in Arizona as a licensed counselor. This program of study is designed to meet the academic requirements for licensure in Arizona as a:

Licensed Associate Counselor (LAC) •  
 Licensed Professional Counselor (LPC) This degree does not lead to marriage and family licensure. Students are encouraged to review their marriage and family board licensure to see licensure requirements.

### Master of Science in Clinical Mental Health Counseling with an Emphasis in Trauma

Grand Canyon University's Master of Science in Clinical Mental Health Counseling with an Emphasis in Trauma program is designed for students interested in becoming professional counselors. The program prepares students to understand, assess, and treat developmental, childhood, and adulthood trauma-related disorders. This program offers students an exhaustive study of human behavior and trauma-informed care. The program's courses were selected to meet the academic requirements established by the National Board for Certified Counselors for the National Certified Counselor credential (NCC), the Certified Clinical Mental Health Counselor credential (CCMHC), and by Arizona Board of Behavioral Health Examiners. Students are provided with comprehensive training to achieve national certification and licensure in Arizona as a Licensed Professional Counselor. This program of study is designed to meet the academic requirements for licensure in Arizona as a:

- Licensed Associate Counselor (LAC)

- Licensed Professional Counselor (LPC)

Licensing and/or certification requirements may vary from state to state. It is the students' responsibility to check the licensing/certification requirements in their respective state.

### Master of Science in Criminal Justice with an Emphasis in Law Enforcement

Grand Canyon University's Master of Science in Criminal Justice with an Emphasis in Law Enforcement is designed for students seeking to expand their understanding of the law, social order, and justice. This program is particularly suited to law enforcement personnel who wish to advance in their field, as well as corrections, probation, and parole officers; law clerks; and other decision makers who address questions of public policy, social research, and administration of justice in the public sphere. The application of strategic planning and funding initiatives for justice organizations is also emphasized.

### Master of Science in Criminal Justice with an Emphasis in Legal Studies

Grand Canyon University's Master of Science in Criminal Justice with an Emphasis in Legal Studies is designed for students seeking to expand their understanding of the law, social order, and justice. This program is particularly suited to law enforcement personnel and other decision makers who address questions of public policy, social research, and administration of justice in the public sphere. This program also prepares students to work with legal concepts where in-depth analysis of law is required.

### Master of Science in Mental Health and Wellness with an Emphasis in Christian Ministry

Grand Canyon University's Master of Science in Mental Health and Wellness degree with an Emphasis in Christian Ministry offers a foundation in biblical knowledge and theological wisdom to serve individuals who are seeking support and encouragement within a Christian framework. Students develop a deep understanding of the gospel to discuss relevant issues from a Christian perspective. This includes an exploration of spiritual health, growth, and character development for the caregiver in life and practice. They explore human nature, including cognitive, behavioral, interpersonal, mental, social, and spiritual motivations. Students also become familiar with research and best practices of mental health and wellness as it relates to human resiliency, recovery, and daily functioning. This degree does not lead to licensure.

## Master of Science in Mental Health and Wellness with an Emphasis in Integrated Health

Grand Canyon University's Master of Science in Mental Health and Wellness with an Emphasis in Integrated Health program introduces students to theory, knowledge, and appropriate

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

strategies utilized within the field of integrated healthcare practices. In this program, students discuss integrated health program assessment, development, and implementation and are exposed to the therapeutic relationship between patients and practitioners. This program prepares students to assist, promote, and advocate for patient accessibility within integrated health services. Students explore areas of human nature, including cognitive, behavioral, interpersonal, mental, spiritual, resiliency, and social motivations. Students explore concepts of culture diversity, advocacy, ethics, human development, and the connection between mental and physical health. Students become familiar with research and best practices of mental health and wellness as it relates to human resiliency, recovery, and functioning within an integrated health focused environment. This degree does not lead to licensure.

### Master of Science in Psychology with an Emphasis in Industrial and Organizational Psychology

The Master of Science in Psychology with an Emphasis in Industrial and Organizational Psychology is a program designed for individuals who desire promotion and/or continued academic exposure in the field of psychology. Though the work environments and job titles vary widely, oftentimes individuals with a degree in industrial and organizational psychology pursue careers as consultants and academicians.

In the master's in industrial organizational psychology program, students will study the principles of psychology in order to gain an understanding of why people act the way they do in the workplace, allowing them to better predict employer behavior. A strong focus is placed on producing usable data regarding workplace performance in order to offer recommendations to management.

Other topics included in the Master of Science in Psychology with an Emphasis in Industrial and Organizational Psychology are: contemporary and ethical issues in psychology, industrial/organizational psychology, statistics, organizational behavior and development, research methods, strategies for effective leadership and consultation, social and cultural psychology, and principles of personnel and human resource management.

### Master of Science in Psychology with an Emphasis in Life Coaching

The Master of Science in Psychology with an Emphasis in Life Coaching is a program designed for individuals who desire promotion and/or continued academic exposure in the field of psychology. Life Coaching is an emerging field that involves and integrates areas of sociology, psychology and counseling. Student's pursuing a Master's degree in Psychology with an emphasis in Life Coaching will learn the skills necessary to assist others in facilitating change in their lives and include techniques and strategies related to helping others fulfill their personal and professional potential. Employment prospects in this area include working with a range of diverse individuals, groups and professional organizations. Building a business, utilizing resources to change careers, learning to create and sustain balance in one's life as well as growing and enhancing motivation levels are just a few of themes that a graduate from this program will master. Important topics in this field of study include advanced rapport building and communication strategies, identifying maladaptive cognitions, exploration of theories and models of effective leadership, interviewing and observational techniques as well as data analysis. The program prepares graduates for a non-licensed, helping profession beyond completion of the program.

## Graduate Certificate of Completion in Christian Counseling

Grand Canyon University's Graduate Certificate of Completion in Christian Counseling offers an introduction to counseling theory within a Christian worldview. Students will take courses that integrate a Christ-centered approach to emotional and behavioral health difficulties. This certificate introduces students to the counseling field, which includes the integration of counseling theory, Christian worldview, and the study of spiritual formation. This certificate also offers an exploration of spiritual health for the helping professional. This certificate does not lead to certification or licensure.

## Graduate Certificate of Completion in Life Coaching

The Graduate Certificate of Completion in Life Coaching is a program designed for individuals who desire promotion and/or continued academic exposure in the field of psychology. Life Coaching is an emerging field that involves and integrates areas of sociology, psychology and counseling. Student's pursuing a graduate certificate in Life Coaching will learn the skills necessary to assist others in facilitating change in their lives and include techniques and strategies related to helping others fulfill their personal and professional potential. Employment prospects in this area include working with a range of diverse individuals, groups and professional organizations. Building a business, utilizing resources to change careers, learning to create and sustain balance in one's life as well as growing and enhancing motivation levels are just a few of themes that a graduate from this program will master. Important topics in this field of study include advanced rapport building and communication strategies, identifying maladaptive cognitions, exploration of theories and models of effective leadership, interviewing and observational techniques as well as data analysis. The program prepares graduates for a non-licensed, helping profession beyond completion of the program.

| Graduate Certificate of Completion in Mental Health and Wellness Emphasis in Grief and Bereavement |                                                                             | 16 credits |

### Graduate Certificate of Completion in Mental Health and Wellness Emphasis in Christian Ministry

Grand Canyon University's Graduate Certificate of Completion in Mental Health and Wellness with an Emphasis in Christian Ministry offers a basic foundation in biblical knowledge and theological wisdom within the context of mental health and wellness. Students become familiar with concepts of human nature from a Christian perspective, including cognitive, behavioral, interpersonal, mental, social, and spiritual motivations. Students also become familiar with research and best practices in mental health and wellness as it relates to human

resiliency, recovery, and functioning. This certificate does not lead to licensure.

#### Degree Requirements

|                                                                                                 |                                                               |            |

### Doctor of Philosophy in Counselor Education and Supervision (Quantitative Research)

The doctoral degree in Counselor Education and Supervision is intended to prepare graduates to work as counselor educators, supervisors, researchers, and practitioners in academic and clinical settings. The standards for this program are intended to accommodate the unique strengths of students seeking to enhance their leadership and counseling skills. Students will be able to employ quantitative methodology to design, collect, and analyze information in alignment with conducting a scholarly dissertation.

## Minors

### Minor in African American Experiences

The minor in African American experiences allows students to gain a deeper understanding of the African American influence within the U.S. and global communities, including its rich history, diverse voices and important events. Graduates will learn how cultural differences unify around the core Christian doctrines and common practices of faith.

#### Minor Requirements

|                                       |                                                    |            |

| <a href="#">SOC-436</a>               | Stratification and Inequality in a Diverse Society | 4 credits  |
| <a href="#">HTH-380</a>               | Kingdom Diversity                                  | 4 credits  |
| Minor in African American Experiences |                                                    | 16 credits |

### Minor in Behavioral Health Sciences

The new minor in Behavioral Health focuses on a core of useful and requisite knowledge to successfully work within the behavioral health field. The five courses for this minor introduce students to the behavioral health field by teaching them concepts related to ethics, cultural diversity, and basic clinical skills to apply as behavioral health paraprofessionals. It will help fulfill the great demand for entry-level professionals to work as part of

an interdisciplinary team in behavioral health. This certificate will offer the necessary education to prepare students seeking employment as behavioral health paraprofessionals. This certificate does not lead to licensure or certification.

#### Minor Requirements

### Minor in Communication

The minor in Communication is designed to develop a student's knowledge base of the theory of communication as well as how to speak, write, and think critically. The minor in Communication prepares students for positions in business, government, education, science, and healthcare. Communication is essential for the development of the whole person—socially, culturally, and professionally.

#### Minor Requirements

|                         |                                |           |

### Minor in Counseling

The minor in Counseling is designed to develop students' understanding of counseling theories and how they relate to working in the human relations field of behavioral health. This minor prepares students with applicable skills in interpreting diagnoses, writing reports, and working on integrative health teams. It prepares students for positions in behavioral health settings such as community and private organizations. The minor in Counseling will also coordinate well with the theoretical backgrounds of psychology, sociology, communications, and ministry. The interplay of theory and practical skills will allow

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

students to market their skills to a wider audience of employers. This minor does not lead to licensure.

#### Minor Requirements

|                                      |                                                                 |            |
|--------------------------------------|-----------------------------------------------------------------|------------|
| <a href="#">PCN-100</a>              | Foundations of Addiction and Substance Use Disorders            | 4 credits  |

| Minor in Counseling                  |                                                                 | 16 credits |

#### Minor in Criminal Justice

The minor in criminal justice provides knowledge and skills across a broad range of real-world applications in criminal justice. Students acquire detailed knowledge of criminality and the justice system's response to criminal behavior. They are prepared for careers in local, state, and federal law enforcement such as police, sheriff, probation, and correctional officers.

#### Minor Requirements

|                           |                                      |            |

| Minor in Criminal Justice |                                      | 16 credits |

#### Minor in Forensic Psychology

The minor in forensic psychology focuses on the psychological experiences of victims and sheds insight into abnormal human behavior. Students are introduced to an understanding of the criminal justice system and exposed to crime-scene processing. The minor program better prepares students to work with people who need assistance coping with the aftereffects of a violent crime. More often than not, police officers are the first point of contact for these individuals. The program is designed for individuals seeking a career as a correctional professional, social worker, homeland security professional, community mental health professional, or private-sector worker.

#### Minor Requirements

#### Minor in Literature

The minor in Literature broadens students' exposure to, and deepens their understanding and appreciation of, essential works of fiction, poetry, and drama. The works selected represent every important period and genre in the history of British and American literature, from Anglo-Saxon poetry to Existentialist drama. The authors studied in this program include the mainstays of the literary canon such as Chaucer, Shakespeare, Pope, Wordsworth, Hawthorne, Whitman, Dickinson, James, and Eliot, as well as writers whose works exemplify the challenges faced by women, Native Americans, African Americans, and other overlooked groups.

### Minor in Performance and Sport Psychology

The Minor in Performance and Sport Psychology provides individuals interested in sport, performing arts, health and fitness, or mental health fields the opportunity to develop their skills and abilities to improve the performance and lives of those with whom they work. The field of sport and performance psychology is concerned with the psychological factors that influence human performance. It involves improving the lives of others through assessment and intervention strategies that enhance performance and personal growth.

### Minor in Psychology

The minor in Psychology introduces students to the study of human behavior of all ages (children through elderly adults). The program examines how personality and cognitive thinking are formed, developed, and influenced through each person's social and cultural environment. Since behavior and emotional development are often affected by both cognitive thinking and the environment, students will examine the roles of science and research in understanding and enhancing mental health.

### Minor in Public Administration

The minor in Public Administration enhances students' understanding of how various factions of government and the private sector interact. Students in a business, health care, or STEM-related field would benefit, especially if there is an interest in a career tied to the public sector. This minor helps students prepare for career opportunities in the nonprofit and government sectors.

# The College of Nursing and Health Care Professions

---

## College Description

The College of Nursing and Health Care Professions has over 40-years of preparing students to fill evolving health care roles as highly qualified professionals educated in direct care, management, health education, and administrative disciplines.

Grand Canyon University's (GCU) in-class, online, and hybrid learning environments advance critical thinking, professionalism, accountability, and ethical decision-making by applying science, health and nursing theories, along with a foundation of Christian Values.

## College Mission

The mission of the College of Nursing and Health Care Professions is to prepare competent, compassionate professionals empowered to promote health, wellness, safety and quality care for all. This mission is supported by academically rigorous programs built upon a strong foundation of liberal arts education and evidence-based practice that reflect missional, Christ-centered Christian values and a global worldview — catalysts for human flourishing.

Graduates are prepared to respond to ever-changing needs by implementing both innovative thinking and skills to address complex issues within healthcare. Our commitment to preparing the next generation of transformative, servant leaders, exercising their vocational calling, is evident in the diversity of healthcare offerings and an evolving curriculum that connects theory to the real world.

## College Features

The College of Nursing and Health Care Professions offers undergraduate and graduate nursing, healthcare, and health science degree programs that meet specific students' career and academic needs. College faculty members hold master's degrees and/or doctoral degrees.

Recognition of the spiritual needs of all persons is an integral part of caring for one's self and others therefore, the spiritual dimension is integrated into courses throughout the undergraduate and graduate curriculum.

## College Philosophy

The College of Nursing and Health Care Professions curriculum is designed to facilitate the students' abilities to creatively respond to continuously changing health care systems throughout the world. Educational experiences are planned to meet the needs of and to empower both students and clients. Clinical judgement, communication, compassionate care, ethics, evidence-based practice, health policy, social determinants of health, caring for diverse populations without consideration of their gender, age, color, creed, lifestyle, or cultural background are emphasized. This is achieved through the application of liberal arts constructs, science, health and nursing theories, and the values of the Christian faith of the faculty in relation to the concepts of health, environment, person, and nursing.

### Nursing

Grand Canyon University founded its College of Nursing in 1982, and the College of Nursing and Health Care Professions continues to educate nurses through rigorous academic and

clinical preparation in a tradition of values-based Christian education. The Bachelor of Science in Nursing (BSN) degree is offered both as pre-licensure (Fast and Accelerated Tracks) and degree completion programs for already licensed and registered nurses. Both the Fast and Accelerated Tracks of the pre-licensure BSN program allows students who have met all requirements for secondary admission the opportunity to complete a degree in approximately 16 months. Building on the baccalaureate degree, the College offers a Master of Science in Nursing (MSN) featuring nine areas of focus and a dual degree: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology, , Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, Health Care Informatics, Nursing Education, Nursing Leadership in Health Care Systems, Public Health Nursing, Health Care Quality and Patient Safety, and a Master of Business Administration/Master of Science in Nursing with an Emphasis in Nursing Leadership in Health Care Systems. The Doctor of Nursing Practice (DNP) and the DNP with Educational Leadership Emphasis program offers students the option to continue their education at GCU and expand upon their practice using application of evidence to improve population health outcomes.

In concert with the mission of the University, the College of Nursing and Health Care Professions faculty affirms the belief in educating nurses and healthcare professionals within a dedicated and supportive community of Christian values.

### Nursing

Baccalaureate nursing practice incorporates the roles of assessing, critical thinking, communicating, providing care, teaching, and leading. The caring professional approach includes the values of autonomy, altruism, human dignity, integrity and social justice with unconditional regard for all people. Nursing practice includes health promotion, disease prevention, early detection of health deviations, prompt and adequate treatment of the human response to acute and chronic illness, and compassionate care for those experiencing death.

Masters nursing practice expands upon baccalaureate nursing concepts to include primary care practice knowledge and advanced leadership with a focus on research and quality assurance, spirituality, diversity, critical thinking, caring, and learning. The advanced professional nursing role relies on best practices and evidence-based research with a focus on evaluation of health outcomes and process.

Doctoral nursing practice builds on the Masters to incorporate development of needed advanced competencies for increasingly complex practice, faculty, and leadership roles; enhanced knowledge to improve nursing practice and patient outcomes; enhanced leadership skills to strengthen practice and health care delivery; and provision of an advanced educational credential for

---

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

those who require advanced practice knowledge but do not need or desire a degree with a research focus (e.g. practice faculty).

### **Nursing Education**

Nursing education is theory driven. Theories are derived from the humanities, sciences, and biblical concepts. Nursing knowledge, theory, research, and health promotion are influenced by spiritual perspectives, ethical, legal, political, historical, and social influences. The faculty values excellence in teaching with an individual focus on the learner. Teaching includes a variety of methods, learning modalities, and practice situations. Faculty provides opportunities for students to give comprehensive care to diverse client populations.

### **Learning**

Learning environment is created and arranged to meet individual learning outcomes that are consistent with College of Nursing and Health Care Professions program outcomes. The College of Nursing and Health Care Professions supports life-long learning endeavors and fosters an appreciation of diversity among traditional and nontraditional learners. Students are educated to provide, direct and evaluate client-centered care while focusing on the person as an integrated whole

## **Health Care Professions**

### **Public Health**

The Master of Public Health degree is the most widely recognized professional credential for leadership positions in public health. The public health program is designed to draw on knowledge and skills from a variety of disciplines to define, assess, and ultimately resolve public health problems. Students study theories, concepts, and principles of public health and their application.

The curriculum, developed around national public health curriculum standards, uses a multidisciplinary approach that emphasizes psychological, behavioral, and social factors influencing population-based health disparities; principles of epidemiology and biostatistics; environmental public health concepts; public health administration systems and processes; and economic factors. It prepares students for an expanding range of professional opportunities and roles in public health and medicine. The Master of Public Health program culminates with a practicum and capstone project that students are able to design to best fit their area of specific interest.

The professional standards outlined by the Council on Education for Public Health (CEPH) were utilized as the foundation of this program. The following core areas of knowledge are included in the Master of Public Health curriculum:

- Biostatistics – Collection, storage, retrieval, analysis, and interpretation of health data; design and analysis of health-related surveys and experiments; and concepts and practice of statistical data analysis.
- Epidemiology – Distributions and determinants of disease, disabilities and death in human populations; the characteristics and dynamics of human populations; and the natural history of disease and the biologic basis of health.
- Environmental health sciences – Environmental factors including biological, physical, and chemical factors that affect the health of a community.
- Health services administration/policy – Planning, organization, administration, management, evaluation, and policy analysis of health and public health programs.

- Social and behavioral sciences – Concepts and methods of social and behavioral sciences relevant to the identification and solution of public health problems.

### **Health Care Administration**

Health care is the largest industry in the United States, and the second largest employer, providing more than 11 million jobs. The sector continues to grow, and faster than most other industries. There are many opportunities, requiring specialized skills sets, such as implementing policy and procedure, hiring and supervising staff, financial management, and technology management. A degree in health care administration can also be easily transferred into other industries.

The Bachelor of Science in Health Care Administration program is designed to prepare graduates for entry-level management positions in numerous health care settings such as hospitals, clinics, medical groups, long-term care facilities, physician offices, insurance companies, and state and federal organizations. The central focus of the program is to provide a comprehensive base in health-related business knowledge and concepts, with an emphasis on health care finance, the U.S. health delivery system and policy, strategic planning, health information technology, human resources, organization behavior, and legal/ethical issues in medicine. The program prepares students to excel in decision-making skills, critical thinking, and group communications. Courses offered are in traditional and online forums. Students in the Bachelor of Science in Health Care Administration program are excellent candidates for the Master of Science in Health Administration, Master of Public Health, and Master of Business Administration programs.

The Master of Science in Health Administration program is designed to prepare graduates for mid- to senior-level management positions in a variety of health care organizations. As the health care industry continues to grow, it is also becoming more competitive, and many employers prefer advanced degrees. The primary goal of this program is to develop the skills, knowledge, and experience for individuals interested in being innovative change agents and leaders within the health care industry. Individuals may be employed in a clinical health care role, with the desire to move into an administrative or management role, or have a desire to move into the health care industry in a nonclinical capacity.

The following core areas of knowledge are included in the Master of Science in Health Administration curriculum:

- Leadership - Explores business leadership models and theory, with special attention to application of these models within organizations.
- Organizational Behavior – Focuses on organizational structure and effectiveness, applying models for collaboration and teamwork, and the analysis of the impact of change.
- Financial and Analytical Issues – Focuses on specific financial issues in health care, the use of appropriate analytics to measure performance and budget. Evaluates economic variables that influence market performance and outcomes.
- Human Resources – Focuses on managerial communications. Areas include conflict management, negotiation, mediation, and coaching.
- Marketing and Communications – Explores internal, external, and consumer communications.

### **Health Informatics**

Health informatics is a rapidly emerging discipline. The Master of Science in Health Care Informatics program is designed to

---

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>£</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

prepare students for innovative leadership positions integrating technology with clinical operations, data management, decision support systems, and quality assessment. Graduates will be prepared for roles such as project manager, researcher, systems analyst, and mid- to senior-level management positions.

The following core areas of knowledge are included in the Master of Science in Health Informatics curriculum:

- Concepts in Health Care Informatics – Focuses on history, application, and future need in this specialty. Includes processes that affect evidence-based medicine, administrative and clinical support, security issues, and the growing use of electronic health records.
- Health Care Information Systems – Examines the use of information technology in health care, with emphasis on changing roles and challenges with implementation and communication.
- Health Care Data Management – Focuses on relational database management, hardware technology, and data communication protocols applied when designing and implementing networks and systems.
- Health Care Research Methods and Analysis – Examines the application of research in the delivery of health care. Focuses on strategies to synthesize and apply data.

### Health Sciences

The Bachelor of Science in Health Sciences program is designed for health care professionals who graduated from accredited certificate and/or associate degree programs who wish to acquire baccalaureate level competencies in health sciences theory and in health care professional issues. Allied health professionals are involved with all aspects of health care delivery and are integral members of the collaborative, health care team. This program provides a foundation for introducing essentials of baccalaureate education, emphasizing the unique role and scope of allied health professions, emphasizing an interdisciplinary and multifaceted approach to care in order to maximize their ability to meet the specific medical needs of the patient.

## Nursing: Undergraduate Programs

### Associate of Science in Pre-Nursing

The Associate of Science in Pre-Nursing degree at Grand Canyon University is designed for students who intend to pursue a Bachelor of Science in Nursing (BSN) and ultimately enter the field of professional nursing. This transfer-focused program provides the foundational coursework in biological, physical, and behavioral sciences required for entry into upper-division nursing programs. Students will engage in rigorous academic preparation that includes key pre-nursing courses such as human anatomy and physiology, microbiology, chemistry, and developmental psychology, alongside general education coursework that fosters critical thinking, communication skills, and ethical reasoning. While this degree does not lead to licensure as a registered nurse (RN), it equips students with the essential academic qualifications needed to apply to a prelicensure BSN program or other accredited nursing program. The AS in Pre-Nursing encourages students to view the practice of nursing as a form of servant leadership; an opportunity to reflect compassion through clinical excellence, cultural humility, and ethical integrity. Graduates of this program are well-positioned to transition seamlessly into a BSN pathway with a strong academic

foundation, a heart for service, and a commitment to whole-person care. The program highlights include preparing students for transfer into a BSN program with all standard prerequisite courses, integrating faith and science in alignment with GCU's mission, providing strong academic advising for competitive BSN admission, and offering a supportive, Christ-centered learning environment.

### Degree Requirements

|                                           |               |
|-------------------------------------------|---------------|
| Total General Education                   | 15-20 credits |
| Total Pre-Nursing Major                   | 24 credits    |
| Total Electives                           | 16-22 credits |
| Total Associate of Science in Pre-Nursing | 60 credits    |

### Required General Education

(Included in General Education total credits, applied to the Critical Thinking competency.)

|                          |                                    |           |
|--------------------------|------------------------------------|-----------|
| <a href="#">BIO-201</a>  | Human Anatomy and Physiology I     | 3 credits |
| <a href="#">BIO-201L</a> | Human Anatomy and Physiology I Lab | 1 credit  |

| <a href="#">MAT-274</a>  | Probability and Statistics         | 4 credits |

### Pre-Nursing Major

|                          |                                                        |           |
|--------------------------|--------------------------------------------------------|-----------|
| <a href="#">BIO-202</a>  | Human Anatomy and Physiology II                        | 3 credits |
| <a href="#">BIO-202L</a> | Human Anatomy and Physiology II Lab                    | 1 credit  |
| <a href="#">CHM-101</a>  | Introduction to General, Organic, and Biochemistry     | 3 credits |
| <a href="#">CHM-101L</a> | Introduction to General, Organic, and Biochemistry Lab | 1 credit  |
| <a href="#">BIO-205</a>  | Microbiology                                           | 3 credits |
| <a href="#">BIO-205L</a> | Microbiology Lab                                       | 1 credit  |
| <a href="#">BIO-322</a>  | Applied Pathophysiology                                | 4 credits |
| <a href="#">BIO-319</a>  | Applied Nutrition                                      | 4 credits |
| <a href="#">PSY-357</a>  | Lifespan Development                                   | 4 credits |

Pre-Nursing Major 60 credits

### Bachelor of Science in Nursing (BSN) Pre-Licensure (Fast and Accelerated Tracks)

Grand Canyon University's Bachelor of Science in Nursing (BSN) Pre-Licensure degree prepares the graduate to practice as a registered nurse generalist for clients across the life span as a member of the health care team in a variety of settings. The BSN program prepares students to provide evidence-based, holistic, safe, quality care for culturally and spiritually diverse individuals, families, communities, and populations. Program emphasis includes clinical nursing practice, health promotion and maintenance, hands-on experiences across the continuum of care, the use of innovative technologies and preparation for assuming leadership roles as a registered nurse. The Bachelor of Science in Nursing Pre-Licensure program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials: Core Competencies for Professional Nursing Education (AACN, 2021).

### Bachelor of Science in Nursing (RN-BSN)

The RN to BSN program is designed for registered nurses with an associate's degree or diploma in nursing. The format and courses of the regionally accredited program are tailored to meet the needs of the adult learner RN, and to maximize strengths that the working RN possesses. A bridge course facilitates the transition of the working RN into the baccalaureate program. Courses are taught by experts in their respective fields who share knowledge and experience in areas of clinical patient care, health care management, and professional nursing practice and

leadership. Opportunities are provided to apply concepts, theories, and research in the RN's clinical practice. Both the science and art of nursing are integral components of the program and are woven throughout. Graduates of the program are prepared to become leaders in the nursing profession.

### Program Description

The Registered Nurse to Bachelor of Science in Nursing (RN-BSN) program prepares registered nurses who have an associate degree or diploma in nursing to function as professionals within the health care team by providing holistic, safe, and quality care for individuals, families, and communities in diverse settings. The program includes an emphasis on spirituality, communication, health promotion, and disease prevention throughout the life span, which provides students the opportunity to achieve baccalaureate competencies.

The Registered Nurse to Bachelor of Science in Nursing program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials Core Competencies for Professional Nursing Education (AACN, 2021).

RN to BSN students who want to transition into GCU's Master of Science in Nursing (MSN) degree programs may complete two graduate level courses to meet their upper division elective credits for degree completion. Please refer to the [College of Nursing and Health Care Professions website](#) for additional information.

### Bridge to Master of Science in Nursing

The Bridge to Master of Science in Nursing pathway is designed for registered nurses with a bachelor's degree in health sciences or other related fields. The pathway is intended to meet the needs of adult learners who already possess a bachelor's degree and an RN license who desire to pursue a graduate degree in nursing.

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>£</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

Courses in the bridge pathway are a blending of RN to BSN core courses that are considered essential requisites to graduate study. Upon completion of bridge courses from the BSN core, students enter one of seven emphases offered for the Master of Science in Nursing or the Master of Business Administration and Master of Science in Nursing with an Emphasis in Nursing Leadership in Health Care Systems.

## Nursing: Graduate Programs

### Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology

The Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology program prepares experienced registered nurses for the advanced nurse practitioner role. Learners explore scope of practice, the role of evidence-based practice and research, and realistic ethical and legal issues. Graduates are eligible for certification as Adult-Gerontology Acute Care Nurse Practitioners. The program provides separate courses for advanced health assessment, advanced pathophysiology, and advanced pharmacology. All clinical courses and experiences in the program emphasize clinical and diagnostic reasoning, and the diagnosis and management of diseases. Learners also practice procedural skill acquisition and prepare for prescribing pharmacologic and nonpharmacologic treatments and management of adult and geriatric acute care patients, subacute patients, complex patients, and patients with exacerbations of chronic illness. Clinical experiences emphasize the physiological and psychosocial impact of acute and chronic illness on the patient, family, and community, and prepare the Adult-Gerontology Acute Care Nurse Practitioner in the diagnosis and management of acute and life-threatening health problems. This program includes 750 hours of direct patient care in clinical practice with qualified preceptors and two separate on-campus experiences. A post-master's certificate program is available to those nurses who already have a Master of Science in Nursing degree.

The Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (AACN, 2011).

### Master of Science in Nursing: Family Nurse Practitioner

The Master of Science in Nursing: Family Nurse Practitioner program prepares experienced professional nurses for advanced practice as primary care providers. The family nurse practitioner program (FNP) prepares learners to make independent critical decisions in all levels of prevention, including health promotion; illness prevention; and diagnosis and management for individuals, families, communities, and populations. The FNP learner performs comprehensive health assessments, implements diagnosis and disease management, and prescribes pharmacologic and nonpharmacologic treatments to manage acute and chronic health problems to achieve quality, cost-effective outcomes in a culturally sensitive environment. The FNP program equips students to take on roles that involve educating, consulting, collaborating, applying evidence-based practices for clinical decision-making, and influencing both professional and public policies. Within various practice settings, the FNP learner provides health care for clients across the life span. This program includes 750 hours of directly supervised clinical practice with qualified preceptors and two separate on-campus experiences. A post-master's certificate program is available to those nurses who already have a Master of Science in Nursing degree.

The Master of Science in Nursing: Family Nurse Practitioner program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (AACN, 2011).

## Master of Science in Nursing with an Emphasis in Health Care Quality & Patient Safety

The Master of Science in Nursing with an Emphasis in Health Care Quality and Patient Safety prepares licensed nurses to apply analytical processes to improve system level health and patient safety outcomes. Learners will develop the essential knowledge and skills to lead clinical and non-clinical process improvement projects in a complex health care environment. The Master of Science in Nursing with an Emphasis in Health Care Quality and Patient Safety program is designed to meet standards set by the American Association of Colleges of Nursing (AACN): The Essentials: Core Competencies for Professional Nursing Education (2021) and the Commission on Collegiate Nursing Accreditation Standards and the Graduate Quality and Safety Education for Nurse Competencies (2024)

## Master of Science in Nursing with an Emphasis in Health Informatics

Grand Canyon University's Master of Science in Nursing with an emphasis in Health Informatics incorporates the advanced roles of a clinician, researcher, learner/educator/coach, leader, community advocate, systems manager, collaborator, and consultant. Health informatics is a rapidly evolving discipline requiring innovative leadership. Graduates of the Master of Science in Nursing with an Emphasis in Health Informatics program will be introduced to different programming languages such as SQL and Python. Additionally, learners will gain skills in project management, user interfaces with technology, electronic health records, privacy and security with technology, and analytics. Graduates may perform a variety of functions for organizations, such as automating clinical care; choosing, customizing, or building new operational data systems; training health care workers in computer systems; and collecting and analyzing data to improve patient care and outcomes. Depending on their areas of strength and focus, graduates may serve as project managers, project designers, researchers, systems analysts, educators, administrators, or executives at all levels of the organization. The Master of Science in Nursing with an Emphasis in Health Informatics program is designed to meet standards set by the American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (2021) and the Commission for Collegiate Nursing Education (CCNE).

## Master of Science in Nursing with an Emphasis in Nursing Education

The Master of Science in Nursing with an Emphasis in Nursing Education program prepares advanced professional nurses to address the ever changing and expanding educational needs of the nursing profession. The program consists of graduate nursing

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

core and education-focused courses. From the graduate nursing core courses, learners gain the knowledge, values, and skills needed for advanced generalist nursing practice in an evolving health care system. The education emphasis is designed for those learners in the Master of Science in Nursing program who are interested in pursuing or advancing in a position in nursing education. Graduates will be prepared for a variety of roles in nursing education, either as a clinical educator or academic educator in both traditional and nontraditional settings in nursing education. A post-master certificate program is available to those nurses who already have a Master of Science in Nursing degree. The Master of Science in Nursing with an Emphasis in Nursing Education program is designed to meet standards set by the American Association of Colleges of Nursing (AACN): The Essentials: Core Competencies for Professional Nursing Education and the National League for Nursing (NLN) Nurse Educator Core Competencies.

#### Master of Science in Nursing with an Emphasis in Leadership in Health Care Systems

The Master of Science in Nursing with an Emphasis in Leadership in Health Care Systems program prepares nurses for leadership roles in today's rapidly changing health care delivery systems. The program consists of graduate nursing core and leadership courses, as well as leadership courses taken with Master of Science in Health Administration (MS-HA) learners. From the graduate nursing core courses, learners gain the knowledge, values, and skills needed for advanced generalist nursing practice in an evolving health care system. The coursework in health administration provides insight into the functioning of organizations, including emphasis on strategic and human resource management within health care organizations. Nursing leadership courses also emphasize financial management, the role of quality and performance improvement, and the effective communication and interdisciplinary collaboration skills required of leaders in contemporary health care. The Master of Science in Nursing with an Emphasis in Leadership in Health Care Systems program is designed to meet standards set by the American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (2021).

#### Master of Business Administration & Master of Nursing: Nursing Leadership in Health Care Systems

Refer to the Colangelo College of Business section of the catalog for specific degree requirements and course sequence information on this program: [Master of Business Administration and Master of Science in Nursing: Nursing Leadership in Health Care Systems Dual – Degree](#).

#### Master of Science in Nursing: Psychiatric Mental Health Nurse Practitioner

The Master of Science in Nursing: Psychiatric Mental Health Nurse Practitioner program prepares experienced professional nurses for advanced practice as psychiatric mental health care providers across the life span. The psychiatric mental health nurse practitioner (PMHNP) makes independent critical judgments in all levels of prevention of behavioral health problems, mental disorders, and comorbid conditions. This includes mental health promotion, illness prevention, and diagnosis and management for individuals, families, communities, and populations. The PMHNP performs comprehensive psychiatric assessments, diagnoses mental disorders, and prescribes pharmacologic and nonpharmacologic treatments to manage acute and chronic mental health problems to achieve quality, cost-effective outcomes in a culturally sensitive context. The role of the PMHNP includes educating, consulting, collaborating, using research to make practice decisions, and influencing professional and public policies. Within various practice settings, the PMHNP provides psychiatric mental health care for patients across the life span. This program includes 750 hours of directly supervised clinical practice with qualified preceptors and two separate on-campus experiences. A postmaster's certificate program is available to those nurses who already have a Master of Science in Nursing degree.

### Master of Science in Nursing with an Emphasis in Public Health Nursing

The Master of Science in Nursing with an Emphasis in Public Health Nursing program prepares advanced professional nurses to address disease prevention, community, and population health needs. The program's emphasis is designed for learners interested in a multidisciplinary approach to reducing health disparities across diverse populations. Learners integrate epidemiological and biostatistical principles to address community and population public health needs, as well as public health administration. Learners prepare for an expanding range of professional opportunities and roles in public health and nursing. The program culminates in a practicum experience, where learners apply public health nursing concepts and skills in a public health setting and complete a capstone project. The Master of Science in Nursing with an Emphasis in Public Health Nursing program is designed to meet standards set by the American Association of Colleges of Nursing (AACN): The Essentials: Core Competencies for Professional Nursing Education (2021), the Commission on Collegiate Nursing Education (CCNE) Standards of Accreditation of Baccalaureate and Graduate Nursing Programs (2024), and the American Nurses Association (ANA) Public Health Nursing: Standards of Practice, 3rd edition (2022).

### Post-Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology Certificate

The Post-Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology Certificate program prepares experienced registered nurses to provide competent advanced practice nursing care in complex, acute, and critical care settings through an evidence-based program of study. Graduates are eligible for certification as Adult-Gerontology Acute Care Nurse Practitioners. The program combines courses in advanced health assessment, clinical diagnosis, procedural skill acquisition, and care management of adult and geriatric acute care patients, subacute patients, complex patients, and/or patients with exacerbations of chronic illness. Clinical experiences emphasize the physiological and psychosocial impact of acute and critical illness on the patient, family, and community, and prepare the ACNP-AG in the diagnosis and management of acute and life-threatening health problems. This program includes 675 hours of directly supervised clinical practice with qualified preceptors and two separate on-campus experiences. The Post-Master of Science in Nursing: Acute Care Nurse Practitioner with an Emphasis in Adult-Gerontology Certificate program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (AACN, 2011).

## Post-Master of Science in Nursing: Family Nurse Practitioner Certificate

The Post-Master of Science in Nursing: Family Nurse Practitioner Certificate program prepares the professional nurse for advanced practice as a primary care provider. The family nurse practitioner (FNP) makes independent critical judgments in all levels of prevention, including health promotion; illness prevention; and diagnosis and management for individuals, families, communities, and populations. The FNP performs comprehensive health assessments, diagnoses illness, and prescribes pharmacologic and nonpharmacologic treatments to manage acute and chronic health problems to achieve quality cost-effective outcomes in a culturally sensitive context. The role of the nurse practitioner includes educating, consulting and collaborating, using research to make practice decisions, and influencing professional and public policies. Within various practice settings, the FNP provides health care for clients across the life span. This program includes 675 hours of directly supervised clinical practice with qualified preceptors and two separate on-campus experiences. The Post-Master of Science in Nursing: Family Nurse Practitioner program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (AACN, 2011)

## Post-Master of Science in Nursing: Nursing Education Certificate

The Post-Master of Science in Nursing: Nursing Education Certificate prepares advanced professional nurses in the specialty of nursing education within the expanding educational needs of the nursing profession. Nurse educators practice in a variety of settings, including acute or chronic care settings, as staff educators or in a role responsible for planning, implementing, and evaluating continuing education programs. The advanced professional nurse educator will also be prepared to assume a faculty position in a traditional college of nursing or in a nontraditional program that relies on online technology as a teaching medium. Competencies of the professional practice nurse educator include assessing educational needs, planning programs to meet those needs, and evaluating program outcomes in the context of evidence-based practice models. The Post-

Master of Science in Nursing: Nursing Education Certificate program is designed to meet current professional standards including but not limited to: American Association of Colleges of Nursing (AACN): The Essentials of Master's Education in Nursing (AACN, 2011)..

## Post-Master of Science in Nursing: Psychiatric Mental Health Nurse Practitioner Certificate

The online Post-Master's MSN Psychiatric/Mental Health Nurse Practitioner program is designed to prepare students to provide a wide range of mental health services across the lifespan. It includes the study and application of diagnostic and treatment modalities and approaches to practice. Students learn to work with other healthcare professionals to provide mental healthcare services in all settings. The program enables graduates to deliver advanced practice services to individuals who are at risk for and/or require mental health services.

| <a href="#">PMH-656CE</a>                                                                   | On-Campus Experience II                                                 | 0 credits  |
| Post-Master of Science in Nursing: Psychiatric Mental Health Nurse Practitioner Certificate |                                                                         | 37 credits |

## Nursing: Doctoral Programs

### Doctor of Nursing Practice

Grand Canyon University's Doctor of Nursing Practice program provides broad and in-depth preparation for advanced practice and leadership roles in nursing. The program expands on current theoretical and scientific foundations of health care practice,

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

including the discipline knowledge base, the design and evaluation of clinical solutions, and clinical and organizational change leadership. The program prepares nurse leaders to design and implement evidence-based strategies for practice that improve health care delivery and patient outcomes. Emphasis will be placed on preparing graduates to practice from the foundation of our Christian heritage through an intentional focus on values and ethics.

#### Doctor of Nursing Practice with an Emphasis in Educational Leadership

Grand Canyon University's Doctor of Nursing Practice with an Emphasis in Educational Leadership program provides broad and in-depth preparation for advanced practice and leadership roles in nursing and education. The program expands on current theoretical and scientific foundations of health care practice, including the discipline knowledge base, the design and evaluation of clinical solutions, and clinical and organizational change leadership. The program prepares nurse leaders to design and implement evidence-based strategies for practice that improve health care delivery, patient outcomes, and educational programs. Emphasis is placed on employing methods of curriculum design and development, applying teaching strategies, and designing assessments to evaluate teaching and learning outcomes to prepare advanced practice nurses, faculty, program directors, and deans to lead nursing education programs in academia or institutions. Graduates will be prepared to practice from a foundation of the Christian heritage through an intentional focus on values and ethics.

## Bachelor of Science in Health Care Administration

The Bachelor of Science in Health Care Administration (BSHA) is an undergraduate professional degree designed to prepare students for entry-level supervisory roles in health care organizations. Ideal candidates for the BSHA program are those students looking for career entry in health care administration and those looking to advance from clinical/technical roles to supervisory roles. The BSHA program emphasizes both the conceptual and analytical skills required to manage in contemporary health care organizations. Graduates prepare themselves for administrative positions in hospitals, long-term care, outpatient facilities, physician offices, mental health organizations, insurance companies, public health agencies, and other types of health organizations. The BSHA program also prepares students who wish to eventually seek their master's degree in order to obtain senior health care executive positions.

The BSHA program features investigative and experimental opportunities in project management, teamwork, and leadership. Students of this program will have the opportunity to gain an in-depth understanding of the following:

- The organization and structure of components of the health care sector to permit development and implementation of successful management strategies within the industry.
- The managerial skills needed to work in teams, build cross-functional teams, and facilitate collaborative decision making.
- The industry-specific business knowledge and skills related to finance management, human resources, strategic planning, marketing, information management, and quality improvement.
- The impact that various dynamics (e.g., regulatory, legal, ethical, public policy, and political) can have on health service organizations and the management or administration of any specific sector of the health care industry.
- The manner in which public, private, and social forces can shape the health care system and affect health care providers.
- The financial options and strategies within and between component sectors of the health care industry.

## Bachelor of Science in Health Information Management

The Bachelor of Science in Health Information Management program prepares students to assume administrative positions in health data management, information policy, information systems integration, quality improvement, medical record processing, and operations management. The health information management sector of health care provides the knowledge, resources, and tools needed to advance professional standards and professional practice to ensure the delivery of quality health care.

### Program Vision and Mission Statements

#### Vision

To empower healthcare communities in transforming healthcare through the application of health information management and information systems and to incorporate collaborative initiatives led by program students, faculty, and alumni.

#### Mission

Grand Canyon University's BS Health Information Management program prepares graduates to promote quality health information for the benefit of the public, healthcare consumers, providers, and other users of clinical data. This mission is accomplished through a program that focuses on integrating Christian values and servant leadership.

### Degree Requirements

## Bachelor of Science in Occupational Therapy Assistant

The Bachelor of Science in Occupational Therapy Assistant program qualifies graduates to work in the occupational therapy field. These individuals will be trained to work under the supervision of an occupational therapist. Graduates will work with individuals who have emotional, developmental, and physical disabilities and teach them new methods or techniques to perform daily activities, maximize independent functioning, and improve quality of life. Course content is research-based and prepares students to meet the requirements for the National Board for Certification in Occupational Therapy.

### Degree Requirements

### Bachelor of Science in Public Health

Grand Canyon University's Bachelor of Science in Public Health program prepares students to work as public health practitioners in various health-related settings, including community-based organizations, government agencies, behavioral health agencies, primary care centers, and global or domestic nonprofit organizations. Public health practitioners focus on the prevention of communicable diseases, health education and promotion, and reducing the impact of environmental hazards. The discipline of public health provides the knowledge, resources, and tools needed to design and implement effective health promotion programs, including health education and policies for specific populations within the larger community. The Bachelor of Science in Public Health program also integrates the National Commission for Health Education Credentialing (NCHEC) Seven Areas of Responsibility for Health Education Specialists, addressing fundamental skills in community assessment, program planning, and program implementation and evaluation.

#### Degree Requirements

|                         |               |
|-------------------------|---------------|

## Health Care Professions: Graduate Programs

### Master of Science in Athletic Training

The Master of Science in Athletic Training program prepares graduates for employment as athletic trainers in various clinical and educational settings including secondary schools, colleges and universities, rehabilitation clinics and hospitals, as well as emerging settings in amateur and professional sports. Students in this program participate in lecture, lab, simulation, and clinical experiences at athletic and rehabilitation facilities. Students are prepared in each of the five domains of professional practice: Domain 1) Injury and Illness Prevention and Wellness Promotion; Domain 2) Examination, Assessment, and Diagnosis; Domain 3) Immediate and Emergency Care; Domain 4) Therapeutic Intervention; and Domain 5) Health Care Administration and Professional Responsibility. Students who successfully complete the coursework are prepared to take the Board of Certification (BOC) exam.

### Master of Public Health

Public health is a multidisciplinary and collaborative field of study integrating the biological, social, psychological, anthropological, political, and environmental sciences to improve health outcomes among populations. There is a high demand for trained public health professionals as a result of the increased prevalence of chronic diseases, emerging and re-emerging infectious diseases, environmental health concerns, trends toward population health management in health care, health care reform, and global health concerns. Grand Canyon University's (GCU) Master of Public Health (MPH) program prepares graduates to apply public health theories to relevant and emerging health issues in order to develop, implement, lead, and evaluate health promotion and disease prevention programs through collaborative partnerships. The program prepares students for leadership

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

positions in state and local health departments, international government agencies, nonprofit organizations, health policy and planning organizations, health care organizations, universities, community-based education programs, and faith-based ministries addressing public health issues. The curriculum combines core subject areas like epidemiology, environmental health, quantitative analysis and interpretation, health policy, social and behavioral factors, planning, and evaluation with unique applications to community engagement and health ministry. The program culminates with a practicum and capstone project that students are able to design based on their professional interest area. The GCU MPH program is unique because the program focuses on integrating Christian values, servant leadership, and community engagement throughout the program.

#### Master of Science in Health Administration

The Master of Science in Health Administration (MSHA) provides the skills and experience necessary to perform as middle- and upper-level managers in a variety of health care organizations. Students also gain skills and experience necessary to serve as innovative change agents and leaders of organizational improvement and adaptation within the health care industry. The MSHA program emphasizes the conceptual, analytical, and application skills required to manage in contemporary health care organizations. Graduates prepare themselves for administrative positions in hospitals, long-term care facilities, outpatient facilities, physician offices, mental health agencies, insurance companies, public health agencies, and other types of health care organizations.

## Master of Science in Health Care Informatics

Health care informatics is a rapidly emerging discipline that offers new frontiers requiring innovative leadership. As health care reform begins to impact all areas of the health care system, greater attention is being focused on the value of health informatics in reducing health care costs, increasing access, and improving the quality of health care services. Health care informatics is quickly becoming vital to the growth and security of the United States' health care system. The integration of information technology into health care and the continuous

changes in patient-care systems require professionals and leaders with training in clinical operations, data management systems, health care system operations, project management, decision making, and quality assessment.

Graduates may perform a variety of functions for the organization, such as automating clinical care, building new operational data systems, training health care workers in the use of computer systems, collecting and analyzing data to improve patient care, etc. Depending on their areas of strength and focus, graduates may serve as project managers, project designers, researchers, systems analysts, or administrators and executives at all levels of the organization. Graduates may work in a variety of settings, including hospitals, primary care facilities, doctors' offices, insurance companies, pharmacies, technology suppliers, consulting firms, and more. Organizations of potential employment include the Centers for Disease Control and Prevention; National Institutes of Health; clinical data exchange insurance sites; the government's Military Health System (hospitals); Centers for Medicare & Medicaid Services; state health care; and informational technology vendors.

#### Master of Science in Occupational Therapy

The Master of Science in Occupational Therapy (MS-OT) program focuses on preparing occupational therapy learners to become competent, client-centered, board-certified OT practitioners. Utilizing evidence-based, academic, and clinical curricula, this program fosters critical thinking and application of best practices. Through application and skill-based experiences, learners develop the skills and knowledge to promote quality of life and the health of people, populations, and communities in traditional and emerging practice settings. Course content is research-based and prepares the learner to meet the requirements for the National Board for Certification in Occupational Therapy.

## Graduate Certificate of Completion in Health care Quality and Patient Safety

The Graduate Certificate of Completion in Health Care Quality and Patient Safety is designed for health care professionals seeking to acquire specific knowledge and skills in the areas of health care quality and patient safety. Courses in the certificate focus on nationally recognized expectations and metrics for quality, approaches to support quality improvement measures, and technologies that support clinical decision-making for patient safety.

# The College of Theology

## College Description

Christian Studies programs are designed to equip students with an understanding of the Bible and its historical and theological significance for the Christian faith, to prepare them for ministry, and to provide them with spiritual guidance. Students are equipped, as well, to relate to diverse other religions in global culture. The faculty is committed to helping students formulate their call to ministry by exploring the various directions that a call may take, and by helping students develop character and integrity in all aspects of life.

## College Mission

Grand Canyon University's College of Theology, in keeping with its commitment to the authority of the Bible as Scripture and the centrality of Jesus Christ, exists to resource, educate and equip students in theological scholarship, ethical integrity, effective leadership, and ministry in service to God, the Church, the academy, and the world.

## Christian Studies: Undergraduate Programs

### Bachelor of Arts in Christian Ministry

Grand Canyon University's Bachelor of Arts in Christian Ministry prepares students for pastoral leadership in the local church and other Christian ministries. This practically-oriented program is designed to equip students with the broad understandings and skills needed for faithful, Christian ministry. Graduates of this program will possess basic biblical and theological knowledge, understand the dynamics of pastoral leadership, develop Christian character, and acquire the skills needed for effective ministry. The core of this pre-seminary curriculum provides a well-rounded theological education with emphasis on personal and professional formation and the development of ministerial abilities. Coursework in biblical, theological, and historical studies is combined with practical courses in leadership, spiritual formation, communication, and ministry. Students learn how to apply biblical and theological truth personally and practically to life and ministry contexts. Ministry internships provide additional opportunities for students to connect sound doctrine and practical ministry experience within the context of local churches and ministries.

### Bachelor of Arts in Christian Studies

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry.

The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments.

## Bachelor of Arts in Christian Studies with an Emphasis in Apologetics

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry.

The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments.

Graduates of the Bachelor of Arts in Christian Studies with an emphasis in Apologetics program are equipped for ministry that requires a rational and compelling defense of the Christian faith. Coursework for this emphasis introduces students to logic, apologetic methodology, current topics in apologetics, and effective communication within various ministry contexts. Students are trained to analyze and assess various perspectives and express foundational truths of the Christian worldview both winsomely and persuasively while responding to objections to the faith with humility and respect.

### Bachelor of Arts in Christian Studies with an Emphasis in Biblical Studies

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry.

The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments.

Graduates of the Bachelor of Arts in Christian Studies with an Emphasis in Biblical Studies program are prepared for a variety of ministerial and leadership positions that require a depth of knowledge about the content of Scripture and the ability to communicate biblical teaching effectively. Coursework focuses on the study of the books and major divisions of the Bible, from the Genesis to Revelation, for the sake of teaching the Bible to a variety of audiences including student groups and congregations. This program of study is designed to equip students with the competencies necessary for service as faithful teachers, preachers, and Christian leaders in churches and Christian institutions.

#### **Bachelor of Arts in Christian Studies with an Emphasis in Global Ministry**

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry.

The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments.

Graduates of the Bachelor of Arts in Christian Studies with an Emphasis in Global Ministry program are prepared for cross-

cultural ministry in a variety of national and international contexts. Coursework for this emphasis introduces students to cross-cultural studies and provides them with the skills required for a contextualized gospel ministry. Students are equipped with biblical and theological foundations for mission work, an understanding of missions from a historical perspective, and the skills needed for effective communication of the gospel across cultures. This program of study is designed to equip students with competencies necessary for service as effective ministers and missions leaders in churches and mission agencies, in North American and international settings.

Christian Studies with an Emphasis in Global Ministry (Accelerated Pathway to MDiv) Major 72 credits

#### Bachelor of Arts in Christian Studies with an Emphasis in Philosophy

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry.

The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments.

Graduates of the Bachelor of Arts in Christian Studies with an Emphasis in Philosophy program are equipped for ministry that requires ethical and ideological engagement in the public arena and are prepared for further study at the graduate level in preparation for a career in the church or academy. Coursework for this emphasis introduces students to philosophical studies in key areas including knowledge and reality, ethics, and philosophy of religion. Students are trained to analyze and assess ideas and ethical systems and express their understandings effectively to others. This program of study is designed to provide students with competencies necessary for service as effective ministers who are capable of engaging the public square and leading others to do the same.

### Bachelor of Arts in Christian Studies with an Emphasis in Worship Leadership

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry. The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments. Graduates of the Bachelor of Arts in Christian Studies with an Emphasis in Worship Leadership program are prepared for careers in worship ministry. Coursework emphasizes a biblical theology of worship and an exploration of various historical and contemporary approaches to worship while developing character and leadership skills for a faithful and fruitful worship ministry. This program of study is designed to equip students with competencies necessary for service as effective worship leaders within the church and other Christian worship environments.

### Bachelor of Arts in Christian Studies with an Emphasis in Worship Leadership (Accelerated Pathway to MDiv)

The Bachelor of Arts in Christian Studies is designed to prepare students for careers in ministry within the church, on the mission field, or within Christian organizations. Graduates of this program will possess a strong foundation of biblical and theological knowledge, will develop spiritually and professionally, and will gain communication and leadership skills necessary for effective ministry. The core of the Bachelor of Arts in Christian Studies program is designed to offer a well-rounded theological education and to equip students with the basic knowledge and skills required for faithful ministry. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian environments. Graduates of the Bachelor of Arts in Christian Studies with an Emphasis in Worship Leadership program are prepared for careers in worship ministry. Coursework emphasizes a biblical theology of worship and an exploration of various historical and contemporary approaches to worship while developing character and leadership skills for a faithful and fruitful worship ministry. This program of study is designed to equip students with competencies necessary for service as effective worship leaders within the church and other Christian worship environments. This is an accelerated program (3+2) which requires a 12-month program of study and entails undergraduate and graduate coursework. Graduates will earn a BA after completing all undergraduate requirements and a Master of Divinity after completing all graduate requirements.

### Undergraduate Certificate in Christian Theology

The Undergraduate Certificate in Christian Theology provides students with foundational understandings of basic Christian theology and the Christian life. Coursework focuses on theological methodology, essential doctrine, historical understandings of Christian thought, and the formation of a character and way of life that accords with sound doctrine. This program of study is designed to equip students with healthy, biblically-grounded understandings of God, humanity, Christ, salvation, and the church in order to serve as faithful teachers and leaders in churches and other Christian organizations.

### Undergraduate Certificate in Christian Worldview Studies

The Undergraduate Certificate in Christian Worldview Studies equips students with the knowledge and dispositions for faithfully integrating the Christian vision for the world into their life and vocation. Coursework focuses on foundational biblical knowledge, advanced worldview studies, the Christian life, life in community, and the development of an ability to engage the culture rationally and winsomely with biblical truth. This program of study is designed to enable students to authentically follow Jesus in ways that are contextually-wise and biblically-informed in ways that are transformative within the communities where they live and serve.

## Worship Arts: Undergraduate Programs

The Bachelor of Arts in Worship Arts is a 120-credit-hour degree designed to prepare students for careers in contemporary worship ministry and the Christian music industry. Worship Arts refers not only to worship leadership within local churches but, more broadly, to performance, visual media, production, and the business aspects of the contemporary Christian music industry. Students who graduate from this program will possess a strong foundation of biblical and theological knowledge and will be skilled in worship leadership, musical performance, production, and business management.

The core of the worship arts program is designed to offer a well-rounded theological education and to equip students with basic knowledge and skills in the areas of vocal and instrumental performance, production (lighting, digital film, sound systems, and recording), management and marketing, and worship leadership. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian worship environments.

### Bachelor of Arts in Worship Arts with an Emphasis in Media and Production Ministry

Grand Canyon University's Bachelor of Arts in Worship Arts is designed to prepare students for careers in worship leadership, ministry, technical direction, and production. Worship Arts refers not only to worship leadership within local churches but, more broadly, to songwriting, performance, media, production, and technical direction. The core of the Worship Arts program is designed to offer a well-rounded theological education and to equip students with basic knowledge and skills in the areas of worship leadership, performance, lighting, media, and sound production. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian worship environments. Students who graduate from this program will possess a strong foundation of biblical and theological knowledge and will be skilled in worship leadership, ministry, production, and the technical aspects of worship arts. In addition to the core, students will choose an emphasis in either Worship Ministry or Media and Production Ministry depending on their desired area of specialization. Graduates of the Bachelor of Arts in Worship Arts with an Emphasis in Media and Production Ministry are prepared to provide vital leadership and creative direction for worship services through media, audio/visual production, and technical direction. This degree emphasizes ministerial leadership in the areas of technical ability, artistic excellence, and production. Upon completion of the program, students will possess a strong foundation of biblical and theological knowledge and will be prepared to lead in the areas of media and production ministry. Coursework emphasizes media and production ministry for contemporary worship, sound recording and reinforcement, and audio/visual direction. Students study lighting design, technical direction, media preparation and presentation, sound and lighting enhancements, and stage and set design while learning to coordinate instrumentalists, vocalists, and audio/visual teams. Significant emphasis is placed on project management, team building, and effective leadership. An internship provides learners with diverse opportunities to apply their knowledge and continue to develop their worship arts skills.

#### Bachelor of Arts in Worship Arts with an Emphasis in Media & Production (Accelerated Pathway to MDiv)

The Bachelor of Arts in Worship Arts is designed to prepare students for careers in worship leadership, ministry, technical direction, and production. Worship Arts refers not only to worship leadership within local churches but, more broadly, to songwriting and performance. The core of the Worship Arts program is designed to offer a well-rounded theological education and to equip students with basic knowledge and skills in the areas of worship leadership. Attention is also given to the inward formation of Christlike character and an ability to minister with wisdom and sensitivity within the local church and in other Christian worship environments. Students who graduate from this program will possess a strong foundation of biblical and theological knowledge and will be skilled in worship ministry. Graduates of the Bachelor of Arts in Worship Arts with an

Emphasis in Media and Production Ministry are prepared to provide vital leadership and creative direction for worship services through media, audio/visual production, and technical direction. This degree emphasizes ministerial leadership in the areas of technical ability, artistic excellence, and production. Upon completion of the program, students will possess a strong foundation of biblical and theological knowledge and will be prepared to lead in the areas of media and production ministry. Coursework emphasizes media and production ministry for contemporary worship, sound recording and reinforcement, and audio/visual direction. Students study lighting design, technical direction, media preparation and presentation, sound and lighting enhancements, and stage and set design while learning to coordinate instrumentalists, vocalists, and audio/visual teams. Significant emphasis is placed on project management, team building, and effective leadership. A capstone internship provides learners with diverse opportunities to apply their knowledge and continue to develop their worship arts skills under the supervision of experienced worship pastors in local ministry settings. This program is part of an accelerated BA to MDiv (3+2) which requires a 12-month program of study. Graduates of the entire accelerated program will earn a BA after completing all undergraduate requirements and a Master of Divinity after completing all graduate requirements.

Bachelor of Arts in Worship Arts with an  
Emphasis in Media & Production (Accelerated  
Pathway to MDiv) 76 credits

### Bachelor of Arts in Worship Arts with an Emphasis in Worship Ministry

Grand Canyon University's Bachelor of Arts in Worship Arts is designed to prepare students for careers in worship leadership, ministry, technical direction, and production. Worship Arts refers not only to worship leadership within local churches but, more broadly, to songwriting, performance, media, production, and technical direction. The core of the Worship Arts program is designed to offer a well-rounded theological education and to equip students with basic knowledge and skills in the areas of worship leadership, performance, lighting, media, and sound production. Attention is also given to the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the local church and in other Christian worship environments. Students who graduate from this program will possess a strong foundation of biblical and theological knowledge and will be skilled in worship leadership, ministry, production, and the technical aspects of worship arts. In addition to the core, students will choose an emphasis in either Worship Ministry or Media and Production Ministry depending on their desired area of specialization. Graduates of the Bachelor of Arts in Worship Arts with an Emphasis in Worship Ministry program are prepared for careers in worship leadership and ministry. This program emphasizes creativity, artistry, musical ability, and performance in addition to ministerial preparation and leadership skills. Upon completion of the program, students will possess a strong foundation of biblical and theological knowledge and will be capable of coordinating and leading corporate worship, songwriting and arranging, and musical performance. Coursework emphasizes musical direction for contemporary worship, fundamentals of music theory for contemporary worship, song writing and arranging, mastery training in a primary performance instrument, and proficiency training in a secondary instrument. An internship provides learners with diverse opportunities to apply their knowledge and continue to develop their worship ministry skills under the supervision of experienced worship leaders in local ministry settings.

## Christian Studies: Graduate Programs

### Master of Arts in Biblical Studies with an Emphasis in New Testament

The MA in Biblical Studies with Emphasis in New Testament focuses on the use of original biblical Greek to properly interpret the New Testament and faithfully communicate it to a modern audience. This program prepares students for a variety of academic, pastoral, and leadership positions that require a depth of knowledge about the content of the New Testament and an ability to communicate biblical teaching effectively. This program of study is designed to equip students with the competencies necessary for service as faithful teachers, preachers, and Christian leaders in schools, churches, and Christian organizations. This degree features a rigorous curriculum that provides students with a biblical and theological foundations for teaching, ministry, and graduate studies. In addition to foundational courses in Bible and theology, students study hermeneutics, biblical Greek, books and major divisions of the New Testament, character formation, academic writing, and effective verbal communication. As a result, students in this program learn to handle the Word of God faithfully by developing the skills needed for the interpretation of Scripture and application within a variety of ministry contexts. This program culminates in a capstone course that includes a thesis.

#### Master of Arts in Christian Leadership

Grand Canyon University's Masters of Arts in Christian Leadership degree is designed for individuals who plan to provide distinctively Christian leadership within various contexts, including church, parachurch, non-profit organizations, business, community, and public service contexts. This degree program offers basic biblical knowledge, practical theology, and skills necessary for effective leadership in order to make maximum impact for God's kingdom.

Curriculum for the Masters of Arts in Christian Leadership degree explores Old and New Testament foundations, biblical interpretation, Christian doctrine, ministerial ethics, and various styles of leadership. Coursework also guides students through the process of developing theologically sound strategies for leading in ways that align well with the needs of the community and individual giftedness.

This degree prepares students with the knowledge and skills necessary for service as Christian leaders within the church or the community. Students complete the program with foundational understandings and the ability to apply those understandings practically in leadership settings. The program teaches how to lead with Christ-like character through good times and through crises. It was created for those with a passion for biblical leadership who intend to serve faithfully within their church or community. Supervised ministry field experiences are embedded throughout the coursework to apply the program's concepts, theories, and research into real-world contexts.

#### Master of Arts in Christian Ministry

Grand Canyon University's Masters of Arts in Christian Ministry degree prepares graduates to provide spiritual guidance and care to members of their church or Christian organization. This program is designed for those who are called to part-time, bi-vocational, or lay ministry and require theological training to lead in the local church.

Curriculum for the Masters of Arts in Christian Ministry degree explores Old and New Testament foundations, biblical interpretation, Christian doctrine, ministerial ethics, and basic pastoral care. Coursework also guides students through the process of preparing spiritually and professionally in order to shepherd others with grace, compassion, and skill.

This degree prepares students with the knowledge and skills necessary for service as assistant pastors, pastoral associates, administrative pastors, Bible study leaders, deacons, lay elders, or in various supporting roles related to Christian ministry and service. Students complete the program with foundational understandings and the ability to apply those understandings within the context of Christian ministry. The program teaches how to provide pastoral care that centers on the gospel of Jesus Christ, edifies the Christian community, and serves the needs of those inside and outside of the local church. It was developed for the lay person with a passion for Christ-like service and ministry. Supervised ministry field experiences are embedded throughout the coursework to apply the program's concepts, theories, and research into real-world contexts.

## Master of Arts in Theology

The Master of Arts in Theology offers students the opportunity to deepen their biblical and theological knowledge and strengthen their ability to engage culture with charity and grace. The program guides students in forming a theologically orthodox vision to participate in God's overall mission to save and redeem fallen humanity and renew creation. Through the study of historical and contemporary theology, the program equips students to engage their context faithfully and wisely with theological and biblical insight.

Coursework prepares students to form a contextual basis for theological engagement in the church and society. The curriculum focuses on various aspects of theological studies with a concentration on theology and culture, cultural exegesis and contextualization, and Christian apologetics. As a result, the program provides academic engagement that equips God's people to bear witness to God's kingdom in ways that further human flourishing. This program culminates in a capstone course that includes a thesis.

## Master of Arts in Urban Ministry

Grand Canyon University's Masters of Arts in Urban Ministry degree was created for individuals with a heart for the city who are concerned to meet spiritual needs in urban settings. This degree program features basic biblical knowledge, practical theology, and the skills necessary to address the unique needs that arise in urban contexts.

Curriculum for the Masters of Arts in Urban Ministry degree explores Old and New Testament foundations, biblical interpretation, Christian doctrine, and ministerial ethics. Coursework also provides students the ability to contextualize the Christian message without compromising the integrity of the gospel. Emphasis is placed on the dynamics of urban communities, challenges facing the church today, and the need to minister to people holistically through the power of the gospel while maintaining the priorities of evangelism and discipleship.

Students complete the program with foundational understandings and the ability to apply those understandings within urban contexts. Inner cities can present a unique set of issues and circumstances. Graduates of the program are prepared to address these specific challenges and offer guidance to urban communities. This program is also appropriate for those

interested in working at a suburban church with an outreach to urban church counterparts, those who wish to work for a nonprofit, or individuals interested in starting their own nonprofit ministry in an urban setting. Supervised ministry field experiences are embedded throughout the coursework to apply the program's concepts, theories, and research into real-world contexts.

## Master of Arts in Youth and Family Ministry

Grand Canyon University's Masters of Arts in Youth and Family Ministry degree is designed for people who have a passion for discipleship that addresses the key stages of human development, from childhood through adulthood. This degree program offers basic biblical knowledge, practical theology, and skills necessary for effective ministry to youth and families within the local church or a Christian organization.

Curriculum for the Masters of Arts in Youth and Family Ministry degree explores Old and New Testament foundations, biblical interpretation, Christian doctrine, and ministerial ethics. Coursework also guides students through the process of learning to apply biblical and theological principles within the context of ministry to specific groups and members of families. Special emphasis is placed on learning to listen and guide youth and their families through the challenging years of pre-adult growth and development.

This degree prepares students with the knowledge and skills necessary for service as youth leaders, children's ministers, assistant pastors, family ministers, or para-church leaders. Students complete the program with foundational understandings and the ability to apply those understandings within the context of youth and family ministry. The program teaches how to provide biblical care that centers on the gospel of Jesus Christ while meeting the unique needs of family life and personal development at each of life's stages. It was created for those with a strong desire to provide discipleship that addresses today's challenges with godly wisdom. Supervised ministry field experiences are embedded throughout the coursework to apply the program's concepts, theories, and research into real-world contexts.

## Master of Divinity

The Master of Divinity is the standard degree for professional ministry preparation and is designed for students who intend to serve in local churches, Christian organizations, and other ministerial roles. The Master of Divinity program offers comprehensive biblical and theological knowledge while developing skills necessary for effective Christian ministry. The Master of Divinity curriculum focuses on biblical, historical, theological, and ethical knowledge as well as exegetical, pastoral, and homiletic skills. Significant attention is also directed at the inward formation of Christ-like character and an ability to minister with wisdom and sensitivity within the community of faith and as leaders in the public domain. Thus the Master of Divinity provides a strong basis for ordained, professional ministry and a substantial foundation for advanced study in preparation for an academic career. This degree features a foundational, pastorally oriented program of study that emphasizes the centrality of the gospel, the significance of the church, and the pressing need to advance the Kingdom through missions. The program's courses are designed to offer the crucial components of a well-rounded, theological education and to equip students for a life of faithful ministry.

## Graduate Certificate in Advanced Biblical Languages

The Graduate Certificate in Advanced Biblical Languages program prepares students with advanced understanding and skill in the biblical languages of Hebrew and Greek. Coursework for this emphasis deepens skills related to grammar and syntax in the original biblical languages and provides additional opportunities to gain additional experience in hermeneutics. Grand Canyon Theological Seminary has adopted a tools-based curriculum in learning the biblical languages, which shapes coursework in advanced language coursework as they continue to learn ways in which to use biblical software tools in order to train competent expositors and teachers of the Scriptures.

## Graduate Certificate in Ministry Education

The Graduate Certificate in Ministry Education equips students with fundamental knowledge and skills needed for ministry within a variety of church and ministerial contexts. This program of study is designed to prepare students with basic understandings for biblical interpretation, theology, ethics, and pastoral ministry, while also cultivating Christian character. Coursework will help students engage in biblical exegesis and hermeneutics, think theologically, and reason and act ethically within various ministerial contexts.

## Graduate Certificate of Completion in Christian Theology

The Graduate Certificate of Completion in Christian Theology provides students with fundamental understandings of systematic and historical theology. This program of study is designed to equip students with knowledge and competencies necessary for local church service by instilling a foundational knowledge of Christian theology including the biblical and historical roots of key doctrines of the faith. Coursework for this emphasis introduces students to the major doctrines of Christianity and traces the development of theological understanding throughout Church history.

## Post-Master of Arts in Theology: Introductory Biblical Languages Certificate

The Post-Master of Arts in Theology: Introductory Biblical Languages Certificate provides students with fundamental understandings and skills that prepare them to properly interpret and communicate the biblical text for the sake of ministry within a local church. This program of study is designed to equip students with the foundational skills necessary for basic analysis of Scripture in the original languages in conjunction with biblical software. Students hone their exegetical skills through application within selected portions of the Old and New Testaments. Coursework for this emphasis introduces biblical Hebrew and Greek and selected biblical passages.

### Degree Requirements

## Christian Studies: Doctoral Programs

### Doctor of Ministry

The Doctor of Ministry (DMin) is an advanced professional doctoral degree. This doctoral program involves extensive research and the practical application of theory to a specific ministry context. The DMin supports the vocational goals of pastors, church leaders, missionaries, and other Christian leaders through a combination of robust theological reflection, application, and an exploration of various models for ministry. Doctoral students are prepared to engage their ministry context with biblical insight as they develop a theological vision for faithful and effective leadership and service. The program provides a variety of learning and formative experiences while requiring students to engage in extensive academic research in an area of ministry aligned with the student's sense of vocational calling. The DMin entails residency requirements and culminates in a writing project that applies appropriate research methodologies and resources.

## Minors

### Minor in Biblical Studies

A minor in Biblical Studies provides students in any major with basic knowledge of the Bible and the ability to interpret Scripture effectively. Coursework surveys the Bible as a whole, introduces principles and practices for sound interpretation, and applies interpretive skills to major divisions of the Bible. This minor is

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

designed for students who want to understand the Bible more fully and learn to interpret it faithfully.

#### Minor Requirements

#### Minor in Christian Ministry (Pre-Seminary)

The Minor in Christian Ministry prepares students for pastoral leadership in the local church and other Christian ministries and a pathway to a Master of Divinity. This pre-seminary curriculum provides a well-rounded theological education with emphasis on personal and professional formation and the development of ministerial abilities. Coursework in ministry, hermeneutics, and ministerial ethics is combined with practical lab-based experiences in pastoral identity, relational skill, spiritual formation, and ministry skill.

### Minor in Short-Term Missions

A minor in Short-Term Missions provides students with basic biblical understandings and the ability to communicate the gospel effectively within cross-cultural contexts. Coursework surveys the Bible as a whole, introduces principles and practices for global and local missions, and culminates in a short-term missions experience. This minor is designed for students who want to understand how to share the Christian faith in word and deed within various cross-cultural contexts while gaining hands-on experience through short-term missions experiences in local and international contexts.

### Minor in Spiritual Formation and Discipleship

A minor in Spiritual Formation and Discipleship equips students with the knowledge and dispositions for cultivating spiritual formation and discipleship skills both individually and in community. Students who pursue this minor receive training in the principles, practices, and history of spiritual formation. This minor involves coursework in biblical studies, character formation, evangelism and discipleship, as well as history and theories of spiritual formation.

### Minor in Worship Ministry

A minor in Worship Ministry offers a basic understanding of the Bible, theology, music, and technology used in contemporary worship services. This minor is designed for students who have a calling to serve and lead within a worship ministry context. Students gain the knowledge and skill needed to serve as an effective worship pastor in a broad variety of ministry opportunities.

# The College of Engineering and Technology

## College Description

The College of Engineering & Technology (CET) at Grand Canyon University offers engineering and technology programs whose teaching inspires students to excellence and cultivates the critical foundation of the Christian worldview. From pathways in the trades, certificates, four-year baccalaureate degrees, to graduate degrees, our growing program offerings and learning modalities are available in-person and online. With ABET accreditation and the National Centers of Academic Excellence in Cybersecurity (NCAE-C) designation, CET ensures students receive the worldclass education highly sought after by industry.

CET is dedicated to shaping graduates of character who are equipped to solve real-world problems ethically and with integrity. Emphasizing an entrepreneurial mindset and a Christian worldview, the college fosters a close-knit community where students, faculty, and staff are committed to excellence. Through active, practical, hands-on learning experiences, CET prepares students to pursue their purpose, encouraging human flourishing and making a meaningful impact on society.

## College Mission & Vision Statement

The College of Engineering & Technology is dedicated to advancing excellence in engineering and technology, while fostering a Christ-centered environment of support and encouragement for students, faculty, and staff. Here at GCU, we are focused on...you, the student. Our goal is to unlock the potential of every student by equipping them with the skills and knowledge needed to become innovative leaders and entrepreneurs in their fields. Through transformative, hands-on learning and an entrepreneurial mindset, CET nurtures a community where faith, engineering, technology, and entrepreneurial mindedness converge, empowering students to become innovators who honor God through their gifts to serve others and solve challenges.

## Guiding Principles

The guiding principles of the College of Engineering & Technology are:

- Focusing on Christ-centered, servant leadership, ethical decision making, and acknowledging occupation as a ministry.
- Meeting students where they are and helping guide them to where their purpose lies using various education pathways from trades, certificates, bachelor's to graduate programs.
- Incorporating emerging technologies to provide innovative active-learning environments laser-focused on an ever-changing workforce.
- Utilizing an interdisciplinary approach to education via industry capstones and research projects.
- Exceptional teaching led by a dedicated team of faculty and staff with industry expertise, a focus on innovation, entrepreneurial excellence, and a strong commitment to fostering a vibrant student community.

## Technology Programs

### Bachelor of Science in Applied Technology

Grand Canyon University's Bachelor of Science in Applied Technology prepares students for professions in Information Technology such as IT Project Manager, Network Support Specialist, and Technology Trainer. Students take courses in networking, security, database systems, and information technology process management. The curriculum includes intensive, project-based courses that help students develop skills in project management and communication within the profession.

This program focuses on problem-solving using technology, with hands-on activities designed to provide students technical experience required in the workplace.

#### Degree Requirements

|                                                 |               |
|-------------------------------------------------|---------------|
| Total General Education                         | 34-40 credits |
| Total Applied Technology Major                  | 40 credits    |
| Total Electives                                 | 40-46 credits |
| Total Bachelor of Science in Applied Technology | 120 credits   |

#### Applied Technology Major

|                                     |                                                                            |            |
|-------------------------------------|----------------------------------------------------------------------------|------------|
| <a href="#">CST-111</a>             | Introduction to Computer Science and Information Technology                | 4 credits  |
| <a href="#">SYM-400</a>             | Introduction to Database Structures                                        | 4 credits  |
| <a href="#">STG-390</a>             | Professionalism in Science & Technology-Communications, Conduct and Ethics | 4 credits  |

| Applied Technology Major            |                                                                            | 40 credits |

### Bachelor of Science in Artificial Intelligence

The Bachelor of Science in Artificial Intelligence (AI) is a four-year program focusing on designing, developing, and deploying intelligent systems. This degree program covers various topics, such as machine learning, natural language processing, SDLC, and ethics. The curriculum provides students with a strong foundation in computer science, mathematics, development, and software engineering and an in-depth understanding of AI technologies and their applications. Graduates of this program will be equipped with the skills and knowledge to pursue careers in industries such as technology, finance, healthcare, transportation, and academia.

### Bachelor of Science in Computer Science with an Emphasis in Big Data Analytics

Grand Canyon University's Bachelor of Science in Computer Science with an Emphasis in Big Data and Analytics prepares students for career options which include computer systems

analyst, networks specialist, database manager, programmer and software engineer. Students learn algorithms, discrete structures, programming languages, software development, networks, operating systems and computing systems fundamentals. Students also learn professional and ethical practices associated with computing through the lens of our Christian worldview. Students will explore the problems and trends associated with the management of huge volumes of data, gaining fundamental knowledge in the design of highly scalable systems that can collect, process, store and analyze large volumes of unstructured data. Competencies include large scale data processing, data mining and interpretation, pattern analysis and data-based decision making. This program integrates math, chemistry, physics and biology and emphasizes critical thinking, real-world application and practical project experience. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability and self-confidence. Students entering the Bachelor of Science in Computer Science with an Emphasis in Big Data and Analytics program should possess knowledge of algebra and common office software applications.

### Degree Requirements

|                                                                                      |               |
|--------------------------------------------------------------------------------------|---------------|
| Total General Education                                                              | 34-40 credits |
| Total Computer Science with an Emphasis in Big Data Analytics Major                  | 88 credits    |
| Total Electives                                                                      | 0-6 credits   |
| Total Bachelor of Science in Computer Science with an Emphasis in Big Data Analytics | 128 credits   |

### Required General Education

*(Included in General Education totals credits, applied to the Global Awareness competency.)*

|                                     |                                                    |           |

## Bachelor of Science in Computer Science with an Emphasis in Business Entrepreneurship

Grand Canyon University's Bachelor of Science in Computer Science with an Emphasis in Business Entrepreneurship prepares students for career options which include computer systems analyst, networks specialist, database manager, programmer and software engineer. Students learn algorithms, discrete structures, programming languages, software development, networks, operating systems and computing systems fundamentals. Students also learn professional and ethical practices associated with computing through the lens of our Christian worldview. This emphasis provides a foundation for business leaders and innovators of new technologies and business processes. Graduates will learn how to plan and manage projects, grow business opportunities, identify market opportunities and commercialize original products and services. They will also learn the best practices for creating innovative work environments and the importance of societal wealth ventures, social responsibility and community outreach. This program integrates math, chemistry, physics and biology and emphasizes critical thinking, real-world application and practical project experience. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability and self-

confidence. Students entering the Bachelor of Science in Computer Science with an Emphasis in Business Entrepreneurship program should possess knowledge of algebra and common office software applications.

### Degree Requirements

|                                                                                             |               |
|---------------------------------------------------------------------------------------------|---------------|
| Total General Education                                                                     | 34-40 credits |
| Total Computer Science with an Emphasis in Business Entrepreneurship                        | 88 credits    |
| Total Electives                                                                             | 0-6 credits   |
| Total Bachelor of Science in Computer Science with an Emphasis in Business Entrepreneurship | 128 credits   |

### Required General Education

*(Included in General Education totals credits, applied to the Global Awareness competency.)*

|                                     |                                                    |           |

## Bachelor of Science in Cybersecurity

Grand Canyon University's Bachelor of Science in Cybersecurity was developed with industry guidance to address the broad, foundational knowledge and skills necessary to be contributors as Cybersecurity Technician, Security Operation Center Analysts, Penetration Testers, Malware Analysts, and Digital Forensic Technician. This program teaches topics and assesses competency in all aspects of defensive and offensive cybersecurity, cyber law, and cyber ethics, in addition to information assurance foundations, digital forensic investigations, malware reverse engineering, wireless security, security architecture design, security frameworks, and secure system administration. This program emphasizes critical thinking, real-world application and practical project management project experience. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability and self-confidence. Students learn professional and ethical practices associated with engineering through the lens of our Christian worldview.

## Bachelor of Science in Game Development

The Bachelor of Science in Game Development program is designed to equip students with an understanding of the technical intricacies involved in building and designing games and interactive applications. The program places a strong emphasis on the technical aspects, including advanced software development, fundamental game design principles, the game development life cycle, game engine architecture, 2D and 3D graphics, visual effects, and animation techniques. Students also study game physics and mechanics, streamlined production pipelines, rapid prototyping, artificial intelligence (AI) implementation, networking for games, and comprehensive game testing and quality assurance methodologies. Additionally, the program equips students with vital business and marketing acumen specific to the gaming industry, as well as the team collaboration and project management skills necessary for successful game development endeavors.

## Bachelor of Science in Information Technology

Grand Canyon University's Bachelor of Science in Information Technology prepares students for career options which include information systems manager, information security specialist, IT project manager, network support specialist, systems programmer, IT instructor, and system integrator. Students learn platform technologies, networking, information assurance, security and management, programming fundamentals, cloud computing, and web systems and technologies. Students also learn professional and ethical practices associated with information technology through the lens of our Christian worldview. Students will be prepared to enter careers in the rapidly expanding field of information technology. The program provides an understanding of the value of information technology and how it can improve the performance and efficiency, and lower cost of enterprise systems. Graduates will utilize technology to improve the deployment, configuration, and management of technologies using a variety of local and cloud-based platforms. Competencies include knowledge about IT-driven business, software technology and tools, enterprise information systems, and cyber-security. This program provides preparation in problem-solving using technology, with a focus on applied, hands-on activities, leveraging learners' current experience and certifications. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability and self-confidence. Students entering the Bachelor of Science in Information Technology program should possess knowledge of algebra and common office software applications.

Information Technology Major 56 credits

## Bachelor of Science in Information Technology with an Emphasis in Cybersecurity

Grand Canyon University's Bachelor of Science in Information Technology with an emphasis in Cyber Security prepares students for career options which include information systems manager, information security specialist, IT project manager, network support specialist, systems programmer, IT instructor, and system integrator. Students learn platform technologies, networking, information assurance, security and management, programming fundamentals, cloud computing, and web systems and technologies. Students also learn professional and ethical practices associated with information technology through the lens of our Christian worldview. Students will be prepared to enter careers in the rapidly expanding field of information technology. The program provides an understanding of the value of information technology and how it can improve the performance and efficiency, and lower cost of enterprise systems. Graduates will utilize technology to improve the deployment, configuration, and management of technologies using a variety of local and cloud-based platforms. Competencies include knowledge about IT-driven business, software technology and tools, enterprise information systems, and cyber-security. This program provides preparation in problem-solving using technology, with a focus on applied, hands-on activities, leveraging learners' current experience and certifications. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability and self-confidence. The Cyber Security Emphasis exposes students to the relationships between cyber defense, cyber operations, and cyber law. Students acquire working knowledge of processes and goals of cyber forensics and develop plans and strategies for security architectures. The emphasis culminates with an IT capstone project in cybersecurity. Students entering the Bachelor of Science in Information Technology with

<sup>A</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Q</sup> Non-Transferable

an Emphasis in Cyber Security program should possess knowledge of algebra and common office software applications.

#### Bachelor of Science in Software Development

Students who earn the Bachelor of Science in Software Development degree are able to work with web technologies, mobile technologies, and today's cloud platforms. They attain proficiency in several programming languages and web application frameworks. The technology courses that make up the Software Development degree coursework ensure graduates have a well-rounded understanding of the topics listed below and provide the students with solid skills in communication, teamwork, initiative, self-confidence, and a strong work ethic.

#### Bachelor of Science in Software Development with an Emphasis in Mobile App Development

Students who earn the Bachelor of Science in Software Development degree with a Mobile App Development emphasis are able to work with web technologies, mobile technologies, and today's cloud platforms. They attain proficiency in several programming languages and web application frameworks. The technology courses that make up the Software Development degree coursework ensure graduates have a well-rounded understanding of the topics listed below and provide the students with solid skills in communication, teamwork, initiative, self-confidence, and a strong work ethic. In addition to the core program, students will take a three-track sequence of courses focused on mobile application development using the top mobile application development platforms/frameworks.

## Bachelor of Science in Software Engineering

The Bachelor program in Software Engineering spans software engineering principles, processes and practices with application to a series of complex systems and challenges faced by enterprises in a variety of private and public (ex. Government) sectors. A particular emphasis is placed on embedded systems, system verification, design, architecture, software analysis, process and project management, and the Software Development Lifecycle (SDLC). Graduates of the Bachelor of Science in Software Engineering may take roles within an organization, at any stage of the software development life cycle such as Software Engineer, Project Manager, Embedded Software Engineer, Systems Analyst, Chief Technology Officer (CTO), Chief Information Officer (CIO), and many others. Graduates of the Software Engineering program may work in a variety of settings, including embedded applications development, social media companies, healthcare providers, large corporations, software engineering corporations, financial institutions, insurance companies, educational institutions, technology suppliers, consulting firms, research facilities, and more. The program culminates in a capstone course that provides an opportunity for students to develop an evidence-based practice project proposal that addresses a current problem, issue, or concern in software engineering. Students identify a problem amenable to research-based intervention; search literature; propose a solution; develop a theoretical model, a system architecture, an implementation plan for a software solution, then evaluate its outcome(s), and disseminate the findings.

### Degree Requirements

|                                                   |               |
|---------------------------------------------------|---------------|
| Total General Education                           | 34-40 credits |
| Total Software Engineering                        | 88 credits    |
| Total Electives                                   | 0-6 credits   |
| Total Bachelor of Science in Software Engineering | 128 credits   |

## Required General Education

*(Included in General Education totals credits, applied to the Global Awareness competency.)*

|                                      |                                                    |           |
|--------------------------------------|----------------------------------------------------|-----------|
| <a href="#">CST-320</a> <sup>Δ</sup> | Human-Computer Interaction and Communication & Lab | 4 credits |
| <a href="#">CYB-420</a>              | Global Perspectives on Cyberwarfare                | 4 credits |

*(Included in General Education totals credits, applied to the Critical Thinking competency.)*

|                          |                                        |           |
|--------------------------|----------------------------------------|-----------|

| <a href="#">JRE-111</a>                                                                | English for Professional Written and Verbal Communication | 4 credits  |
| <a href="#">JRE-121</a>                                                                | Math Applications                                         | 4 credits  |
| <a href="#">JRE-171</a>                                                                | CNC Machinist Foundations                                 | 4 credits  |
| Undergraduate Certificate for Computer Numerical Control (CNC) Machinist/Manufacturing |                                                           | 24 credits |

### Undergraduate Certificate in Construction

This program focuses on equipping students with the knowledge and skills necessary to start on the path toward a career in the construction industry. Students will gain skills in workplace safety, communication, applied mathematics, and workplace success. The program allows for customization in the second semester through a specialized class teaching skills in one of the following fields: Mechanical, Electrician, Civil (Concrete), Plumbing, and HVAC.

#### Degree Requirements

|                                           |                                                           |            |

### Undergraduate Certificate in Cybersecurity Foundations

This certificate provides students with concepts and practical application of cybersecurity tools, technologies, and procedures. Deploying advanced techniques in exploitation, vulnerability assessment, penetration testing, policy management, security program design, and cyber defense activities, with real-world hands-on practical activities that go beyond theory are integrated within this certificate.

#### Degree Requirements

|                         |                                        |           |

|--------------------------------------------|------------|
| Undergraduate Certificate for Electricians | 24 credits |
|--------------------------------------------|------------|

### Undergraduate Certificate in Full-Stack Software Development

Certificate learners develop foundational knowledge and hands-on experience in the development of a Web-based application. The six-course sequence encompasses experience with the tools and development skills needed to build a full-stack web application from the user interface (UI) to the data storage component. The student will connect the UI and data using Java and REST technologies, providing the complete pathway. By combining the courses in the program, the student will be able to enter the in-demand career of web and application development. The program focuses on understanding web technologies and the various activities expected in a job as a Full Stack Developer within the Java technology stack. Each class builds on the previous content while teaching the student about the methodology and tools involved in tackling the Full-Stack development process.

#### Degree Requirements

|                         |                                        |           |

<sup>^</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

## Undergraduate Certificate of Completion in Java Programming

This certificate offers expanding opportunities for students to learn in-demand programming skills. This certificate is applicable to any major and provides the requisite knowledge that aligns with a certificate in Java Programming. Enhancing your knowledge in computer programming, this certificate focuses on object-oriented techniques in Java, software development using the Java programming language and building applications using software engineering methods. You will also learn concepts and techniques for improving new code and refactoring existing code. This certificate concludes with skills in professional communications and conduct associated with a career in technology.

### Degree Requirements

|                                                             |                               |            |

| <a href="#">CST-105</a>                                     | Computer Programming I        | 4 credits  |
| <a href="#">CST-239</a>                                     | Programming in Java II        | 4 credits  |
| <a href="#">CST-339</a>                                     | Programming in Java III       | 4 credits  |
| <a href="#">CST-345</a>                                     | Database Design & Development | 4 credits  |
| Undergraduate Certificate of Completion in Java Programming |                               | 16 credits |

## Undergraduate Certificate in Programming in C#

Certificate learners develop foundational knowledge and hands-on experience in the development of software applications. The four-course sequence encompasses experience with the tools and development skills needed to build C# web and desktop applications. The lessons in development include everything from the core programming language to the deployment of applications. The student will connect the front-end tools from a .NET (C#) framework and server-side C# application to provide the complete pathway. By combining the courses in the program, the student will be able to enter the in-demand career of C# software and application development. The focus of the series of courses entails understanding programming technologies and the various activities expected in a job as a Developer. Each class builds on the previous content while teaching the student about the methodology and tools involved in tackling the software development process.

### Degree Requirements

## Bridge (Master of Science in Cybersecurity)

Grand Canyon University's Master of Science in Cyber Security program trains students on using current, open source, and advanced techniques in digital forensics, penetration testing, vulnerability assessment, exploitation techniques, and other software and applications to protect organizations' systems, data, and processes. This program focuses on the various areas of cybersecurity, providing students with the tools to understand and protect against the enemy in Cyber Warfare/Cyber Defense activities; including an exploration of policies, cyber law, national and international ramifications, and ethical

considerations. Students enrolled in this program will gain the technical skills and hands-on experience with real world data integrating a Christian worldview into cybersecurity. These students, applying the Hackers-with-Halos™ methodology, will build and become part of a vast network of highly-skilled professionals and white-hat penetration testers in the field of Cybersecurity.

## Master of Science in Artificial Intelligence

The Master of Science in Artificial Intelligence (AI) program focuses on designing, developing, and deploying intelligent systems. This degree program covers various topics, including machine learning, natural language processing, SDLC, and ethics. The curriculum provides students with a strong foundation in computer science, mathematics, development, and software engineering, and an in-depth understanding of AI technologies and their applications. Graduates of this program will be equipped with the skills and knowledge necessary to pursue careers in industries such as technology, finance, healthcare, transportation, and academia.

## Master of Science in Computer Science

The Master of Science in Computer Science is designed for Computer Science or for Engineering and other Science professionals with a strong background in areas related to Computer Science, who want to deepen their knowledge of the interplay between computer science and how theory and practice influence each other. The master program in Computer Science spans topics in abstraction, complexity, evolutionary change, and a set of general principles, such as sharing common resources, security, and concurrency. Graduates will be able to design, implement, and improve theoretical and functional systems based on quantitative and qualitative assessments of their functionality, usability and performance. Graduates of the Master of Science in Computer Science may take on senior and leadership roles within an organization such as Researcher, Algorithm Designer, Enterprise Software Tool Developer, Senior Software Architect, Senior Software Developer, Director of Software Development, and many others. Graduates of the Computer Science program may work in a variety of settings, including game developers, social media companies, healthcare providers, large corporations, financial institutions, insurance companies, educational institutions, technology suppliers, consulting firms, research facilities, and more. The program culminates in a capstone course that provides an opportunity for students to develop an evidence-based practice project proposal that addresses a current problem, issue, or concern in computer science. Students identify a problem amenable to research-based intervention; search literature; propose a solution; and develop a theoretical model and implement the software solution, evaluate its outcome(s), and disseminate the findings. The Master of Science in Computer Science prepares graduates for pursuing a doctoral degree in Computer Science or related disciplines.

## Master of Science in Cybersecurity

Grand Canyon University's Master of Science in Cyber Security program trains students on using current, open source, and advanced techniques in digital forensics, penetration testing, vulnerability assessment, exploitation techniques, and other software and applications to protect organizations' systems, data, and processes. This program focuses on the various areas of cybersecurity, providing students with the tools to understand and protect against the enemy in Cyber Warfare/Cyber Defense activities; including an exploration of policies, cyber law, national and international ramifications, and ethical considerations. Students enrolled in this program will gain the technical skills and hands-on experience with real world data integrating a Christian worldview into cybersecurity. These students, applying the Hackers-with-Halos™ methodology, will build and become part of a vast network of highly-skilled professionals and white-hat penetration testers in the field of Cybersecurity.

## Master of Science in Data Science

The Master of Science in Data Science program is designed for computer science or engineering professionals who want to better understand and apply predictive analytics theory, principles, and tools to a wide variety of problems in science, engineering, and business. The Data Science master program spans interdisciplinary topics such as predictive analytics, computing, statistics, business intelligence, machine learning, and software tools. The program culminates in a capstone course that provides an opportunity for students to develop an evidence-based practice project proposal that addresses a current problem, issue, or concern in data science. Students identify a problem amenable to research-based intervention; search literature; propose a solution; and develop a plan to implement the solution, evaluate its outcome(s), and disseminate the findings.

## Master of Science in Engineering Management

Grand Canyon University's Master of Science in Engineering Management program equip graduates with the skills for leadership and management in the engineering sector. It integrates advanced engineering principles with business concepts, highlighting project management, team dynamics, and effective communication. Graduates will excel in decision-making, process optimization, innovation facilitation, and compliance assurance. They will spearhead organizational expansion while supervising diverse tasks, setting goals, managing staff, and aligning work with quality and regulatory standards to enhance technology and infrastructure, all while upholding the highest ethical standards.

## Master of Science in Systems Engineering

Grand Canyon University's Master of Science in Systems Engineering program is designed for professionals who are looking to advance their career. It aims to cultivate skilled professionals capable of designing, developing, and implementing innovative and sustainable solutions for complex engineering challenges in diverse industries and domains. Graduates of this program are equipped to oversee the application of technology in a corporate setting, as well as provide an understanding of the complex forces governing industry. Graduates understand advanced concepts and practices within the realm of systems development and engineering, opening doors to diverse industries such as aerospace, technology, energy, transportation, manufacturing, and related fields.

| Master of Science in Systems Engineering |                                                                         | 38 credits |

## Master of Science in Human Computer Interaction

The MS in Human Computer Interaction (HCI) provides students with the knowledge and skills to design, evaluate, and implement effective interfaces between humans and computers. Through courses in user experience design, prototyping, data visualization, and simulation modeling, students gain expertise in creating innovative interactive systems and virtual environments. Graduates are prepared for careers as user experience designers,

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>†</sup> Honors Major Course | <sup>Δ</sup> Non-Transferable

interaction designers, HCI researchers, and simulation developers in technology companies, research labs, healthcare, entertainment, education, and more.

#### Master of Science in Information Technology

Grand Canyon University's Master of Science in Information Technology (MSIT) program prepares students for a diverse range of career fields by expanding knowledge of the latest emerging technologies including operating systems, networks, and databases. This program focuses on providing students with innovative hands-on technical skills and real-world leadership know-how to create the well-rounded technical manager companies are looking for to lead their teams into the future.

#### Master of Science in Software Development

A program that focuses on the general writing and implementation of generic and customized programs to drive operating systems and that generally prepares individuals to

apply the methods and procedures of software design and programming to software installation and maintenance. Includes instruction in software design, low- and high-level languages and program writing; program customization and linking; prototype testing; troubleshooting; and related aspects of operating systems and networks.

Master of Science in Software Development 34 credits

#### Master of Science in Software Engineering

The Master of Science in Software Engineering prepares students to work at any stage of the software development life cycle. This contains eliciting project requirements, writing algorithms, development, validating that the software is meeting its intended purpose and verifying that it is safe, secure and dependable. Software engineers concentrate on how a software project is performing by being knowledgeable of software development life cycles, different software development processes, estimation techniques and measurement, and risk management. The primary objective of this program is to prepare students to develop the next generation of software products and services for consumers, industry, and government. The curriculum includes comprehensive, intensive coverage of modern software concepts and techniques, and emphasizes a holistic approach encompassing financial, legal, and presales issues; technical concepts; security; software design techniques; methods; and project management. Graduates of the Master of Science in Software Engineering may take on senior and leadership roles within an organization, at any stage of the software engineering life cycle such as Lead Software Engineer, Project Manager, Embedded Software Engineer, Systems Architect, and many others. Graduates of the Software Engineering program may work in a variety of settings, including mobile application development, game development, social media companies, healthcare providers, large corporations, financial institutions, insurance companies, educational institutions, technology suppliers, consulting firms, research facilities, and more.

## Graduate Certificate in Artificial Intelligence

The Graduate Certificate in Artificial Intelligence is an intensive 20-credit program designed for academic and professional individuals seeking foundational knowledge in the rapidly evolving field of AI. This program combines theoretical underpinnings with practical applications to equip participants with the requisite skills to navigate the AI landscape effectively. Upon successful completion, graduates will be equipped to apply AI concepts and tools to diverse academic, industry, or research challenges. The GCAI serves as a stepping stone for those looking to delve deeper into AI specializations or integrate AI capabilities into their existing roles. Audience: Researchers transitioning to AI domains Professionals aiming to integrate AI into their business processes Computer scientists and engineers seeking specialized knowledge in AI Academic professionals aiming to teach or incorporate AI concepts into the curriculum.

## Graduate Certificate in Cybersecurity

The Cybersecurity Graduate Certificate program at Grand Canyon University is designed for professionals with a bachelor's degree in a different field who are looking to advance their careers in cybersecurity. The program provides students with the technical skills, ethical decision-making abilities, and communication skills necessary to protect organizations from cyber-attacks. Upon completion of the program, graduates will be prepared to lead technical cybersecurity teams. The program is offered online and is designed to be affordable.

## Engineering Programs

### Bachelor of Science in Aeronautical Engineering

Grand Canyon University's Bachelor of Science in Aeronautical Engineering was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in aeronautical engineering and related fields. This program focuses on the design, development, testing, and production of an aircraft. It explores essential areas such as aerodynamics, propulsion, flight mechanics, stability and control, aircraft structures, materials, and experimental techniques, integrating math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into several courses, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Aeronautical engineering graduates will enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

## Bachelor of Science in Biomedical Engineering

Grand Canyon University's Bachelor of Science in Biomedical Engineering was developed with industry and clinical guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in biomedical engineering and related fields, such as medical devices, medical imaging, tissue engineering and implantable design, government regulatory compliance, clinical research, and biomedical research. This program teaches topics and assesses competency in multidisciplinary engineering design principles linked with knowledge of human anatomy and physiology, including: biomechanics, materials properties/biocompatibility, biomedical instrumentation and imaging, and tissue engineering. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem

solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Biomedical engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

|                                                     |               |
|-----------------------------------------------------|---------------|
| Total General Education                             | 34-40 credits |
| Total Biomedical Engineering Major                  | 90 credits    |
| Total Electives                                     | 0-6 credits   |
| Total Bachelor of Science in Biomedical Engineering | 128 credits   |

### Required General Education

*(Included in General Education total credits, applied to the Effective Communication competency.)*

|                         |                                              |           |
|-------------------------|----------------------------------------------|-----------|
| <a href="#">ESG-395</a> | Engineering Economics and Project Management | 4 credits |
|-------------------------|----------------------------------------------|-----------|

*(Included in General Education total credits, applied to the Critical Thinking competency.)*

|                          |                         |           |

## Bachelor of Science in Biomedical Engineering with an Emphasis in Pre-Med

Grand Canyon University's Bachelor of Science in Biomedical Engineering with an emphasis in PreMed was developed with industry and clinical guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in biomedical engineering, while preparing students to take the MCAT. This program teaches topics and assesses competency in multidisciplinary engineering design principles linked with knowledge of human anatomy and physiology, including: biomechanics, materials properties/biocompatibility, biomedical instrumentation and imaging, and tissue engineering. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Biomedical engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

## Bachelor of Science in Civil Engineering

Grand Canyon University's Bachelor of Science in Civil Engineering has been developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in civil engineering and related fields. This program addresses the planning, design, construction, operations, maintenance, and forensics of natural, private, and public works and infrastructure, including transportation (i.e., roads, railways, and airports), geotechnical, hydrology, hydraulics, water resources (i.e., rivers, dams, canals, pipes, and treatment systems), and structures (i.e., walls, bridges, buildings, and parks). The program focuses on the application of math and science in the broad technical and management areas of civil engineering, as well as other related areas, with an emphasis on analytical thinking, creativity, adaptability, problem solving, pragmatic application, and practical project management experience. The Christian worldview is also integrated into several courses, preparing graduates to apply Christian principles of stewardship, mission, and discipline, making a commitment to professional and ethical standards with a focus on environmental sustainability and social equality. Civil engineering graduates enter the workforce well versed and prepared to start work directly in the civil engineering profession, or in areas that desire those with civil engineering degrees as an entry-level requirement. Additionally, these graduates are ready to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

|                                                |               |
|------------------------------------------------|---------------|
| Total General Education                        | 34-40 credits |
| Total Civil Engineering Major                  | 88 credits    |
| Total Electives                                | 0-6 credits   |
| Total Bachelor of Science in Civil Engineering | 128 credits   |

## Bachelor of Science in Computer Engineering

Grand Canyon University's Bachelor of Science in Computer Engineering was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in computer engineering and related fields, such as computer hardware design, control systems, project engineering, electronics, test engineering, or engineering sales. This program teaches topics and assesses competency in operating systems, circuits, signals, communications, algorithms and data structures, computer architecture, and controls. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Computer engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

|                                                   |               |
|---------------------------------------------------|---------------|
| Total General Education                           | 34-40 credits |
| Total Computer Engineering Major                  | 88 credits    |
| Total Electives                                   | 0-6 credits   |
| Total Bachelor of Science in Computer Engineering | 128 credits   |

## Bachelor of Science in Electrical Engineering

Grand Canyon University's Bachelor of Science in Electrical Engineering was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in electrical engineering and related fields, such as electronics, electrical design, project engineering, controls, test engineering, hardware design, communications, circuits engineering, or engineering sales. This program teaches topics and assesses competency in circuits, analog and digital electronics, electromagnetic fields, optics, signal processing, communications, computer design, power, and controls. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Electrical engineering graduates enter the workforce prepared to work in diverse teams,

Electrical Engineering Major 88 credits

### Bachelor of Science in Electrical Engineering with an Emphasis in Power Systems

The Bachelor of Science in Electrical Engineering program guides students through a rigorous curriculum. Students will develop a solid framework of knowledge in chemistry, physics and mathematics before diving into degree-specific courses. In engineering classes such as Circuits, Science of Solid Materials, Electromagnetic Fields & Optics and Electrical Design Principles. The emphasis focuses on the application of these skills toward power systems.

### Degree Requirements

|                                                                                       |               |

## Bachelor of Science in Electrical Engineering Technology

Grand Canyon University's Bachelor of Science in Electrical Engineering Technology was developed with industry guidance to address the broad, foundational knowledge and skills required to be contributors as electrical engineering technicians, electronics engineering technicians, service engineers, industrial automation technicians, robotics technicians, telecommunications technicians, electric machinery technicians, and technician supervisors. This program teaches topics and assesses competency in circuits, analog and digital electronics, signal processing, communications, computer design, electronic materials, controls and robotics, power and machinery, and technical documentation. This program integrates math, chemistry, physics, and biology and emphasizes critical thinking, real-world applications, and practical project management project experience. In addition, students develop valuable workplace skills, including effective communication, teamwork, initiative, strong work ethic, analytical skills, adaptability, and self-confidence. Students learn professional and ethical practices associated with engineering through the lens of the Christian worldview.

## Bachelor of Science in Industrial Engineering

Grand Canyon University's Bachelor of Science in Industrial Engineering was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in industrial engineering and related fields, such as manufacturing, quality engineering, systems design, project management, process improvement, and supply chain management, including logistics, inventory control, and distribution. This program teaches topics and assesses competency in probability and statistics, human factors, sustainable design, productivity analysis, lean work, and automation for manufacturing and distribution. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. BS in Industrial Engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

## Degree Requirements

|                                                     |               |
|-----------------------------------------------------|---------------|
| Total General Education                             | 34-40 credits |
| Total Industrial Engineering Major                  | 88 credits    |
| Total Electives                                     | 0-6 credits   |
| Total Bachelor of Science in Industrial Engineering | 128 credits   |

## Required General Education

## Bachelor of Science in Mechanical Engineering

Grand Canyon University's Bachelor of Science in Mechanical Engineering was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in mechanical engineering and related fields, such as mechanical design engineering, systems engineering, manufacturing engineering, project engineering, and engineering sales. This program teaches topics and assesses competency in mechanical design principles: statics, dynamics, material science, mechanics of materials, fluid mechanics, thermodynamics, heat transfer, instrumentation, and controls. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Mechanical engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

## Bachelor of Science in Mechanical Engineering with an Emphasis in Aerospace

Grand Canyon University's Bachelor of Science in Mechanical Engineering with an Emphasis in Aerospace was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in mechanical engineering, aerospace engineering, and related fields, such as mechanical design engineering, systems engineering, manufacturing engineering, project engineering, and engineering sales. This program teaches topics and assesses competency in mechanical design principles such as statics, dynamics, materials science, fluid mechanics, thermodynamics, and heat transfer, as well as aerospace engineering, including aerodynamics, propulsion, flight control systems, and aerospace design. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Mechanical engineering graduates with an emphasis in aerospace enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

|                                                                                   |               |
|-----------------------------------------------------------------------------------|---------------|
| Total General Education                                                           | 34-40 credits |
| Total Mechanical Engineering with an Emphasis in Aerospace Major                  | 88 credits    |
| Total Electives                                                                   | 0-6 credits   |
| Total Bachelor of Science in Mechanical Engineering with an Emphasis in Aerospace | 128 credits   |

scale facilities, commercial buildings, power plants and manufacturing facilities, students are prepared to design, oversee, improve, and maintain complex manufacturing facility equipment. The degree also focuses on PLC operation, programming, and control, fluid system design, and air pollution control, combining math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application, and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Mechanical engineering with an emphasis in Facilities Engineering graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

Mechanical Engineering with an Emphasis in Robotics Major 88 credits

#### Bachelor of Science in Mechanical Engineering Technology

Grand Canyon University's Bachelor of Science in Mechanical Engineering Technology was developed with industry guidance to address the broad, foundational knowledge and skills required to meet or exceed the expectations of employers in Mechanical Engineering Technology and related fields, such as application engineering, test engineering, project engineering, production engineering, product development engineering, and manufacturing engineering. This program teaches topics and assesses competency in computerized design and manufacturing tools, fluid/thermal transport, material and processes, and controls and instrumentation. This program integrates math, natural sciences, and computer programming with an emphasis on critical thinking, problem solving, real-world application and practical project management experience. The Christian worldview is integrated into the classroom, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. BS in Mechanical Engineering Technology graduates enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

#### Degree Requirements

|                                                                |               |

## Bachelor of Science in Systems Engineering

Grand Canyon University's Bachelor of Science in Systems Engineering is an interdisciplinary degree that focuses on how to design, integrate, and manage complex systems over their life cycles. The Christian worldview is integrated into several courses, preparing graduates to apply Christian principles of stewardship and discipline with a commitment to professional and ethical standards. Systems engineering graduates will enter the workforce prepared to work in diverse teams, communicate effectively, and pursue leadership roles and advanced learning.

### Degree Requirements

|                                                  |               |
|--------------------------------------------------|---------------|
| Total General Education                          | 34-40 credits |
| Total Systems Engineering Major                  | 88 credits    |
| Total Electives                                  | 0-6 credits   |
| Total Bachelor of Science in Systems Engineering | 128 credits   |

### Required General Education

*(Included in General Education total credits, applied to the Effective Communication competency.)*

|                         |                                              |           |
|-------------------------|----------------------------------------------|-----------|
| <a href="#">ESG-395</a> | Engineering Economics and Project Management | 4 credits |
|-------------------------|----------------------------------------------|-----------|

*(Included in General Education total credits, applied to the Critical Thinking competency.)*

|                          |                          |           |
|--------------------------|--------------------------|-----------|
| <a href="#">ESG-162</a>  | Engineering Math         | 3 credits |
| <a href="#">ESG-162L</a> | Engineering Math Lab     | 1 credit  |

## Graduate Certificate in Software Engineering

The Software Engineering Graduate Certificate program at Grand Canyon University is designed for professionals with a bachelor's degree in a different field who are looking to advance their careers in software engineering. The program provides students with the technical skills, ethical decision-making abilities, and communication skills necessary to design, develop, and maintain software. Upon completion of the program, graduates will be prepared to lead technical software engineering teams. The program is offered online and is designed to be affordable.

### Degree Requirements

|                                              |                                             |            |
|----------------------------------------------|---------------------------------------------|------------|
| <a href="#">DSC-510</a>                      | Advanced Probability and Statistics         | 4 credits  |

| Graduate Certificate in Software Engineering |                                             | 20 credits |

## Master of Science in Biomedical Engineering

The MS in Biomedical Engineering will follow the traditional BME engineering background track but with an emphasis on industrial preparation with a business exposure (MedTech venture creation) as well as clinical immersion to create a well-rounded engineer with experiences, coursework, and collaborations and hands on project-based learning.

### Degree Requirements

## Minors

### Minor in Cybersecurity

The minor in Cybersecurity provides students with foundational information technology skills in programming, system administration, and computer networks as well as concepts and practical applications of cybersecurity tools, technologies and procedures. Deploying advanced techniques in exploitation, vulnerability assessment, penetration testing, policy management, and security program design, with real-world hands-on practical activities that go beyond theory are integrated within this minor.

#### Minor Requirements

|                         |                                                             |           |
|-------------------------|-------------------------------------------------------------|-----------|
| <a href="#">MAT-154</a> | Applications of College Algebra                             | 4 credits |

Minor in Cybersecurity 24 credits

### Minor in Embedded Systems

The Minor in Embedded Systems equips current technology students with the skills to design, implement, and optimize the integration of software and hardware within electronic devices. This program combines hands-on learning with real-world knowledge, preparing students for careers in industries ranging across the any field including manufacturing, finance, engineering, and technology.

#### Minor Pre-requisites

|                         |                        |           |
|-------------------------|------------------------|-----------|
| <a href="#">CST-105</a> | Computer Programming I | 4 credits |
|-------------------------|------------------------|-----------|

#### Minor Requirements

|                         |                               |           |
|-------------------------|-------------------------------|-----------|
| <a href="#">CST-239</a> | Java Programming II           | 4 Credits |
| <a href="#">CST-321</a> | Operating System Fundamentals | 4 Credits |
| <a href="#">SWE-350</a> | Embedded Systems I            | 4 Credits |
| <a href="#">SWE-450</a> | Embedded Systems II           | 4 Credits |

---

Minor in Embedded Systems 16 credits

### Minor in Machine Learning

The Minor in Machine Learning offers students a foundational and advanced understanding of how to build algorithms that improve automatically through experience. This interdisciplinary program covers theoretical concepts, practical applications, and ethical considerations in machine learning, preparing students for a range of careers in data science, artificial intelligence, and beyond.

#### Minor Requirements

|                         |                                  |           |
|-------------------------|----------------------------------|-----------|
| <a href="#">CST-180</a> | Python Programming I             | 4 Credits |
| <a href="#">AIT-104</a> | Data Mining and Machine Learning | 4 Credits |
| <a href="#">AIT-110</a> | Statistical Learning Theory      | 4 Credits |
| <a href="#">AIT-204</a> | Deep Learning                    | 4 Credits |

<sup>Δ</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>⁄</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

|                           |            |
|---------------------------|------------|
| Minor in Machine Learning | 16 credits |
|---------------------------|------------|

## Minor in Mixed Reality

The Minor in Mixed Reality introduces students to the cutting-edge field of mixed reality, merging real and virtual environments to produce new spaces where physical and digital objects co-exist and interact in real time. Through hands-on projects and theoretical study, students will learn to create applications for augmented reality (AR), virtual reality (VR), and beyond, preparing them for innovative roles in entertainment, education, and industry.

### Minor Prerequisites

|                         |                                 |           |

## Minor in Networking Technology

This minor in networking technology offers opportunities for students to learn in-demand technical skills. This minor provides the knowledge in selection, design, deployment, integration, and administration of networks and communication infrastructures in an organization using in-house and cloud-based solutions. Learning how to implement routing and switching while explaining the physical and transport layers relevant to the IT discipline are offered in this minor. This minor also provides opportunities to implement tools and strategies to meet business objectives and ensure network security as well as explore issues around network management.

### Minor Requirements

|                         |                                                               |           |
|-------------------------|---------------------------------------------------------------|-----------|
| <a href="#">MAT-154</a> | Applications of College Algebra                               | 4 credits |
| <a href="#">CST-111</a> | Introduction to Computer Science and Information Technology   | 4 credits |
| <a href="#">ITT-116</a> | Platforms and Network Technologies                            | 4 credits |

# The College of Natural Sciences

## College Description

The College of Natural Sciences (CNS) is focused on preparing exceptionally competent graduates to enter the dynamic and highly competitive workforce of the future. While we emphasize excellence in essential content knowledge and skills, our students develop abilities such as creativity, adaptability, collaboration, and effective communication along with personal qualities such as social awareness, responsibility, ethical character, and compassion, as these are significant differentiators of the strongest candidates for either graduate school or workforce entry.

To help students develop these abilities, we provide ample opportunity through our curricular and co-curricular activities to apply skills, solve problems, and innovate through inquiry-based learning; to participate in multifaceted team projects; and to experience cross-disciplinary exposure; ensuring that their acquired skills are relevant to the workplace and their future success.

With an intentional focus on student success, we provide unparalleled support throughout the curriculum and continuous opportunities for comprehensive mentoring and advisement. Students are also provided opportunity to develop the personal interactional qualities necessary to be an ethical team player within the workforce and productive contributor to the greater society. Such opportunities include participation in faculty mentoring, engagement in the GCU and local communities, and developing an understanding of, or fully embracing, a Christian worldview as well as developing an understanding of how their personal worldview affects both the intention and the outcome of their interactions and personal success.

## College Mission & Vision

The College of Natural Sciences is an academic community dedicated to supporting, engaging and empowering each student with the knowledge and skills to be innovative, entrepreneurial and impactful leaders. By integrating scientific discovery and a Christ-centered culture, we provide all students the opportunity to transform the world, promote human flourishing, and glorify God through their service to others.

## Guiding Principles

The College of Natural Sciences:

- Empowers students to find and fulfill their purpose.
- Offers an educational experience of superior value.
- Prepares students with the knowledge, skills and mental disciplines to succeed in the contemporary job market and to positively impact their world.
- Develops in students an informed, critical-thinking mind and a servant's heart.
- Fosters qualities of creativity, adaptability, collaboration, effective communication, problem solving, and appreciation that support students in their continuous learning and spiritual growth.
- Instills social awareness, responsibility, ethical character, and compassion in students that emanates from the Christian worldview and the example of Christ.

## Science Programs

### Bachelor of Science in Biological Sciences

Grand Canyon University's Bachelor of Science in Biological Sciences prepares students for careers in a wide range of fields that utilize biological principles and provide the foundation to develop as scientists or biology professionals. Possible career paths include: technicians, naturalists, environmental education/outreach professionals, museum coordinators, conservation biologists, park rangers, Game and Fish professionals, zookeepers, and EPA, NRCS, USGS, or other government professionals. Students completing the Bachelor of Science in Biological Sciences will understand and demonstrate competency in a broad body of knowledge that includes the

domains of biology, chemistry, environmental sciences, ecology, and conservation. Students will also learn about professional and ethical practices associated with biology, all presented through the lens of a Christian worldview..

### Degree Requirements

|                                 |               |
|---------------------------------|---------------|
| Total General Education         | 34-40 credits |
| Total Biological Sciences Major | 64 credits    |
| Total Electives                 | 16-22 credits |
| Biological Sciences Major       | 120 credits   |

### Biological Sciences Major

|                          |                                           |           |

## Bachelor of Science in Biology for Secondary Education (IP/TL)

### (Initial Program—Leads to Initial Teacher Licensure)

This program is offered by the College of Natural Sciences, in conjunction with teaching licensure requirement courses provided by the College of Education for students who are preparing for a teaching career in grades 7-12 and who are seeking initial teacher licensure. The format and courses of this regionally accredited and Arizona-approved program are designed to maximize the content knowledge that the teacher candidate will possess upon graduation. All courses are directly aligned with Interstate Teacher Assessment and Support Consortium (InTASC) principles. Content courses are aligned to the standards of the National Science Teachers Association (NSTA). Opportunities are provided to apply concepts, theories, and research throughout the program. Assessments within many of the courses guide students through 85 hours of practicum/field experiences prior to student teaching, and the final semester of the program requires a full-time, 16-week student teaching component. Applicants to the program are responsible for contacting their state department of education for licensure requirements and program approval. Arizona or home state fingerprint/background clearance is required for all practicum/field experiences and student teaching. Furthermore, applicants should consult the Grand Canyon University Catalog, the University Policy Handbook, and an academic counselor to obtain information regarding current policies and procedures inherent in a teacher licensure program.

### Degree Requirements

|                                             |               |
|---------------------------------------------|---------------|
| Total General Education                     | 34-40 credits |
| Total Biology for Secondary Education Major | 86 credits    |
| Total Electives                             | 0-6 credits   |
| Biology for Secondary Education Major       | 126 credits   |
| Total Practicum/Field Experience            | 85 hours      |

### Required General Education

*(Included in General Education total credits, applied to the Critical Thinking competency.)*

|                         |                            |           |

## Bachelor of Science in Biology with an Emphasis in Pre-Dentistry

The Bachelor of Science in Biology with an Emphasis in Pre-Dentistry is well-suited for students seeking acceptance into graduate study in dental medicine and other related degree programs. This program will prepare graduates for graduate school entrance exams (DAT) and includes specialized coursework focused on preparing students for success in their graduate studies and professional careers. Graduates will acquire

<sup>A</sup> Writing intensive course | <sup>♦</sup> Fulfills General Education requirement | <sup>‡</sup> Honors Major Course | <sup>Ω</sup> Non-Transferable

foundational knowledge in biological sciences, physical sciences, social sciences, and general human health and dental care issues. They will also study interpersonal and intercultural communication skills and investigate the psychological, spiritual, and physical components of health, wellness, and medical intervention.

#### Degree Requirements

|                                                       |               |
|-------------------------------------------------------|---------------|
| Total General Education                               | 34-40 credits |
| Total Biology with an Emphasis in Pre-Dentistry Major | 80 credits    |
| Total Electives                                       | 0-6 credits   |
| <hr/>                                                 |               |
| Biology with an Emphasis in Pre-Dentistry Major       | 120 credits   |

#### Required General Education

*(Included in General Education total credits, applied to the Critical Thinking competency.)*

|                         |                            |           |
|-------------------------|----------------------------|-----------|
| MAT-154                 | Applications of Algebra    | 4 credits |
| <a href="#">MAT-261</a> | Pre-Calculus               | 4 credits |
| <a href="#">MAT-274</a> | Probability and Statistics | 4 credits |

*(Included in General Education total credits, applied to the Global Awareness, Perspectives, and Ethics competency.)*

|                         |                                             |           |
|-------------------------|---------------------------------------------|-----------|
| <a href="#">PSY-362</a> | Social Psychology and Cultural Applications | 4 credits |
|-------------------------|---------------------------------------------|-----------|

#### Biology with an Emphasis in Pre-Dentistry Major

|                                      |                                                  |           |
